ATLANTA GEORGIA.

Hastings' Seed and Plant Bargains

In 1908 over twenty thousand of our friends bought one or more of our seed or plant collections. This shows their great popularity. We have sold these special collections for the last fourteen years and each year finds the sale of them increasing. Every one of these collections is a big seed bargain. The packets are full size (except peas and beans in the 50 cent. Vegetable Collection) and of exactly the same quality as any others we sell. These collections are put up in advance of the regular seed selling season, and are ready for mailing immediately on receipt of the order. That is one reason why we can afford to sell them at a reduced price.

Each one of them is a big bargain, and contains only such varieties as are adapted to all Southern Home Gardens. Try one or more of our Special Collections this year. They will give you the right results in your garden.

HASTINGS' INTRODUCTORY 10 Packets VEGETABLE COLLECTION Cts.

Packet All-Head Early Cabbage Packet Lentz Early Blood Turnip Beet Packet alifornia Cream Butter Lettuce Packet Improved Acme Tomato Packet Early L g Scarlet Radish Packet True Southern Collard	c 1 Packet Florida Fav. c 1 Packet Rocky Ford c 1 Packet Purple or Re	ern Curled Mustard
1 Packet True Southern Collard	C 1	500

For 25 cents we will send the above 10 full size packets of seed by mail, postpaid. No changes will be allowed in this collection. No others will be sold at these prices.

HASTINGS' HALF DOLLAR 20 Packets 50 Cts. VEGETABLE COLLECTION

1 Packet All-Head Early Cabbage 05c	1 Packet Chinese Mustard 050
1 Packet Sure Crop Cabbage 10c	1 Packet Prizetaker Onion 050
1 Packet Lentz Early Blood Turnip Beet 05c	1 Packet Perkins' Mam. Long Pod Okra 050
1 Packet Red St. Valery Carrot 05c	1 Packet Rosy Gem Radish 050
1 Packet Hastings' White Spine Cucumber 05c	1 Packet Enrly Long Scarlet Radish 050
1 Packet (half size, 2-ounce) Valentine Bean 05c	1 Packet Early White Bush Squash 050
1 Parket True Southern Collard 05c	1 Packet Improved Acme Tomato 050
1 Packet California Cream Butter Lettuce 05c	1 Packet (halfize) Home Delight Pea 050
1 Packet Rocky Ford Cantaloupe 05c	1 Packet Purple Top Globe Turnip 05c
1 Packet Florida Favorite Watermelon 05c	
1 Packet Rattlesnake Watermelon 05c	\$.05

For 50 cents we will send the above 20 packets of seed by mail, postpaid. No changes will be allowed in this collection. No others will be sold at these prices.

\$1 Family Garden Collection ONE DOLLAR POSTPAID

1 Pint Extra Early Red Valentine Bean 25c 1 Pint Bliss' Everbearing Peas 25c 1 Ounce Eclipse Beets 10c 1 Packet Sure Crop Cabbage 10c 1 Packet Centennial Flat Dutch Cabbage (late) 10c 1 Packet California Cream Butter Lettuce 05c 2 Packet Long-Keeper Tomato 10c 1 Ounce Long Scarlet Radish 10c 1 Packet Prizetaker Onion 05c	1 Packet Hastings' White Spine Cucumber

No changes will be allowed in any of the above collections. No others will be sold at these prices.

STRAWBERRIES OUR SPECIAL HOME GARDEN COLLECTION \$1,50, POSTPAID.

300 Strong, Healthy, Vigorous Plants. Varieties Best Adapted to Home Use. Every Garden Needs a strawberry bed. This Collection Is Just What You Need to Furnish Your Table With a Good Supply of Delicious Berries Through the Berry Season. Early, Medium and late Varieties. The Collection Contains 100 Plants of Excelsior Extra Early, 100 Lady Thompson. 100 Gandy, 300 Plants in all, delivered, all charges Prepaid, to any point reached by the Southern Express Co. for \$1.50, or to any point reached by the Wells-Fargo, American, or Pacific Express Co. for \$1.75. Plant Strawberries This Spring.

Special Dollar Collection Some don't want as many as 300 Plants. For \$1.00 we will send by mail, postpaid, 50 Plants each of Excelsior, Lady Thompson and Gandy to any postoffice in the United States.

Home Peach Orchard PREPAID S

12 Peach Trees, 11 Varieties, ripening from May to October, of best varieties for home use. 1 Early Wonder, 1 Sneed. 1 Dewey, 1 Greensboro, 1 Carman, 1 Belle of Georgia, 1 Lady in Gold, 2 Elbertas, 1 Stonewall Jackson, 1 Eaton's Gold, 1 Stinson's October, a continuous supply of peaches for nearly half the year. Delivered, all charges prepaid to any express office east of Mississippi River for \$2.50 or to any express office west of the Mississippi (Texas, Arkansas and Oklahoma) for \$2.75.

All these varieties of Peaches, Strawberries and Fruit Trees of all kinds described fully in our "Nursery Catalogue," Free if you ask for it.

HASTINGS' SURE CROP The Money-Making Cotton for the Planter

HASTINGS' SURE CROP COTTON—The Great Big Boll, Five Lock Cotton. 3½ Pounds of Seed Cotton.
Were Picked from the Above Stalk After the Photograph Was Taken. Can You Beat It?

The great specialty of our seed business is the "breeding up" and growing for seed purposes the best varieties of cotton for the South, the kinds that make the biggest yields of best quality of staple. Our SURE CROP COTTON is one of the best things we have ever introduced. The illustration on this page was reproduced from a photograph of a single stall of Sure Crop. After this photograph was taken, 31/2 pounds of seed cotton was picked from this single plant. This simply shows what one plant of the right kind of cotton will make with the right kind of treatment.

It is rightfully named Sure Crop, for no matter what the weather conditions have been, it has never failed to make

have been, it has never failed to make a good average crop.

It's easy to get varieties of cotton that make good crops under favorable conditions, but what we all want is a cotton that makes good crops in unfavorable seasons. Sure Crop is such a variety. The plant shown here was grown in one of the most unfavorable seasons we have ever seen. This is not a specially grown stalk, but taken direct from our seed crops on the plantation where this variety is grown.

Sure Crop is a dependable cotton one that will stay by you year after year, making heavy crops of such fine quality and length of fibre that it will always bring the top of the market price.

Sure Crop is a big bolled four and

Sinc top of the market price.

Sinc Crop is a big bolled four and five-lock cotton. It has been bred up to stand either very dry or very wetseasons and it does it. It fruits heavily and from the ground up; begins opening almost as early as King's and bears heavily throughout the entire season. It stands severe windstorms without losing the lint, at the same time it is easy to pick. severe windstorms without losing the lint, at the same time it is easy to pick. It will make 35 to 40 per cent lint. One trial field, this past year, on poor quality land, and purposely given careless treatment, made over a bale per acre. Sure Crop is well worthy to stand beside our other great varieties—Mortgage-Lifter and Rosser No. 1. Sure Crop was originated by a grower far up in the cotton growing section. Starting with a high grade, big boll cotton, he crossed it with other varieties giving it greater hardiness, earliness, and heavy bearing qualities. Remember, Sure Crop, as well as our other great varieties, are all grown in the high hill section of Georgia. Cotton seed grown up in this section has a ton seed grown up in this section has a vigor that has no equal in any seed grown elsewhere in the cotton States. Planted elsewhere it shows an earliness, heavy bearing qualities and a freedom from disease that is not found in any seed grown elsew here. If you doubt this, plant some seed of Sure Cropside by side with the common cotton you have been planting and see the difference. You will find out, as some of our customers write us, that "the improved seed would be chean at \$5.00 per bushel." Sure Crop is fine for Boll Weevil sections.

with the same cultivation and fertilizer. Can you afford to continue to plant the common seed? Stop and think about this. Can you not use to advantage the extra money that five or six bales more cotton would bring?

Make Your Land Work Full Time

Did you ever stop to think about that? Is your land working full time bid you ever stop to think about that? Is your land working full time or isit loading on the job of producting crops. If you are only getting a third to a halfbale of cotton off of averag land, that and is not working full time. It's loading, and if you are planting just "cotton seed," any kind that happens to be around handy or has not been kept "bred up" you are the one responsible for the land loading on you. You can't blame the hoe hands for not getting over a piece of ground in a certain time if you furnished them hoes with four-inch blades when you ought to have given them six or eight-inch hoes. If you are planting your land with common cotton seed or varieties that have not been kept up by careful seed growers, you are placing your land in just the same position as you would if you gave field hands small hoes instead of large ones. The land is able to do the work all right if you will give it the tools to work with, and in the case of cotton it means right varieties, and rightly grown, and selected seed of those varieties. It has proved true thousands of times that simply changing the seed has increased the yield per acre 100 to 250 pounas of lint. 100 pounds increase at 10 cents per pound means \$10.001 ncrease in your returns per acre. Suppose it does cost you \$1.25 to \$1.50 per acre for the right kind of seed? You make a profit of not less than \$8.50 per acre. It don't cost a cent extra for fertilizer or cultivation, and for every \$1.50 you spend you get a profit of not less than \$8.50 in six or seven months. It's just a little matter of business, the making use of your opportunity. Don't you think it's about time to give your land a change to work full time for once?

PRICES Pound, postpaid, 35 cents; 3 pounds, \$1.00, postpaid; peck, by express or freight, not prepaid, 5" cents, bushel, \$1.50; 10 bushels, \$12.50; 100 pounds, \$4.50; 100 bushels, \$100. Freight rate to Texas, Arkansas and Oklahoma points, \$1.15 per hundred pounds.

MORTGAGE-LIFTER

Our Biggest Cropping, Biggest Boll Cotton

DO YOU WANT MORE MONEY?

Mortgage-Lifter Cotton Will Make It For You how much cotton money did you lose in 1908?

Mr. R. J. Redding, former Director of the Georgia Experiment Station, it answer to an inquiry from a corton grower as to whether it paid to use improved cottonseed, said recently a According to a comparison at the Georgia Station for ten years together it was found that the average value of the total yield of the best varieties glanted each year was \$20.08 per acre greater than the average value of the total yield of the poorest varieties

planted each year of the ten years, valuing lint at 10 cents per pound and seed at 80 cents per 160 pounds. Fam quite sure that it would prove pointable for a majority of cotton grovers to pay from \$2.00 to \$3.00 per bushel for improved seed and that it would pay some farmers to buy seed at even \$5.00 per bushel rather than plant an unimproved scrub variety." (See Bulletin No. 66, Georgia far periment Station, page 220.)

A Georgia Man Spent \$17.50 and Made \$332.50 Profit

Below we print reports of some peavy yields from various States. These yields were made in prize contests of previous years, and you may think or say that it's very well for "high pressure" crops, but it won't do to pay \$1.50 per bushel for seed to plant an entire crop with. There are tens of thousands of cotton growers who will, and do say that "they can't afford to pay over 50 cents to a dollar a bushel for planting seed," If you are one of these we want you to read the experience of Mr. Ivey, of Wilkinson County, Georgia. We printed it in last year's catalogue, but it's well worth reading what he says again. Mr. Ivey wanted to find out whether it paid to use glood seed—not in a prize contest, but in just plain ordinary farm culture, and he thought he would risk a few dollars finding out whether good selected seed paid or not. He sent us \$17.50 for 10 bushels of Mortgage-Lifter seed. (It was higher priced then than now.) On October 17th Mr. Ivey wrote us as follows:

"I bought of you last spring ten bushels of Mortgage-Lifter Cottonseed, and had it dropped in hills. I have now picked eleven bales and have two or three bales now to pick. I had two croppers, each with the same amount of the same kind of land. Theirs was planted in common cottonseed, with the same cultivation and fertilizer. Theirs are about all picked out and one has six and the other seven bales. Mortgage-Lifter will double the

yield over common cotton. My second picking made thirty nine pounds of lint to one hundred pounds of seed cotton."

No prize cultivation here, just plain ordinary, every-day sort of cultivation. Our seed made 7 Bales More Cotton under exactly the same conditions than the common seed did.

Cotton, at the time Mr. Ivey sold, was worth 10 cents per pound and as a result of his use of our seed he had 7 extra bales worth \$350.00, as a direct profit on his investment of \$17.50 fix or seven months before. It beats every "get rich quick scheme" that has been put out. It paid Mr. Ivey big and it will pay you.

"get rich quick scheme" that has been put out. It paid Mr. Ivey big and it will pay you.

While we believe in highest culture and good fertilization, we want to impress you strongly with the profit from the use of our selected high-grade seed. In Mr. Ivey's case not an extra cent was spent for labor or cultivation; the land and fertilizer was the same, yet he had just double what the others had who planted common seed. The \$17.50 he spent in the spring made him a direct cash profit of \$332.50 by fall. He deubled his yield simply by using good seed. You can do the same in 1999 if you get seed direct from us, seed that is being closely selected and bred up every year. One of your neighbors may have gotton seed of us two or three years ago, but the chances are that it has "gone back" and will make 25 to 50 per cent, less than our own growth, for with ordinary culture and the mixture of seed in public gins, pure, high grade seed is an impossibility.

Mortgage-Lifter, The Biggest Cropping Biggest Boll Cotton

Mortgage-Lifter is today the best big-boll cotton for a main crop there is.
Well troduced Mortgage-Lifter in 1902. It was a mighty good cotton then,
hastour work of "breeding up" has gone on steadily and the seed we have for
property is just as far ahead of the 1902 seed as that was ahead of "run of the gin"
seed then. It's the most highly "bred up" big boll white-seeded cotton. It
has the longest lint of any short staple varieties and has brought as high as
the cents against a general market price of 9½ cents. This made a difference of 88.12 in selling a 500-pound bale.

Mortgage-Lifter is a middlum early main crop cotton, which begins to

once of \$8.12 in selling a 500-pound bale.

Mortzage-Lifter is a needlum early main crop cotton, which begins to obe nearly and is a continuous bearer until killed by frost. You get cotton from it from early in the season until killing cold weather comes. It is a true, big-bolled, five-lock cotton with an exceptionally long and fine fibre for an upland or short staple cotton. This variety, while firmly set in the boll, and holding up well in wind storms, is easily picked, some of our Texas growers who planted it saying that 350 to 400 pounds are easily

Margage-Lifter makes from 37 to 40 per cent, lint. This fact, combined with its extra heavy bearing qualities, makes it one of the finest prieties that ever originated in the South. The plant grows large and stong; it roots deeply and is a wonderful variety to resist dry weather. It

grows close and upright and the experience of our customers who have planted Mortgage-Lifter the past seven years shows that it yields two to three times as much as the ordinary varieties with the same cultivation,

Right Seed Is Half The Crop

Mr. Chas. F. Green, of Hill County, Texas. wrote us: "I raised 6.7.0 pounds of seed cotton from 1 bushel of Mortgage Lifter seed. It is the best cotton I ever saw. I would have made \$20.00 more per acre on every acre I planted if I had gotten all my cottonseed from you, as that is the amount I got over and above my own cotton with Mortgage Lifter. It would have paid me weil to have paid you \$5.00 per bushel to plant all my crop."

The average yield of cotton is 191 pounds per acre. If you are using common seed or seed two or three crops removed from a seedsman you are not making more than half where you could be the contract of th

The average yield of cotton is 191 pounds per acre. If you are using common seed or seed two or three creps removed from a seedsman you are not making more than half what you ought to. Mortgage Lifter has been planted in every Southern State for T years. If "makes good" wherever planted. It doubles the yield over other varieties without a cent extra cost for cultivation or fertilizer. We sell a man a bushel of seed this year. Next year he comes back for it in 10 to 50 bushel lots. That's the best kind of evidence that it pays to plant Mortgage-Lifter. It will pay you in 1909.

PRICES

Pound, postpaid, 35 cents; 3 pounds, postpaid, to your address, \$1.00; peck by express or freight, not prepaid, 50 cents; bushel (30 lbs. Georgia Legal Weight), not prepaid, \$1.50; 10 bushels, not prepaid, \$12.50; 100 pounds, not prepaid, \$4.50. Freight rate to Texas, Arkansas and Oklahoma points is \$1.15 per 100 pounds.

Sworn Statements of Yields in Different States

We have paid out \$2,700.00 in cash prizes during the last 4 years for the largest yields of cotton from our seed. We have space for only a few of these reports of yields in this catalogue, but we give them to you just to show you what can be done with our magnificent cottonseed in the hands of cotton frowers. Remember, every one of these reports was sworn to before proper officers.

Alabama G. J. Blevins, Culturan County, planted 1 bushel of manother year's contest he planted 3 pounds and grew therefrom 9,707 pounds of seed cotton.

John I. Watson, Monroe County, planted 3 pounds on 1 acre and made 4,074 pounds of seed cotton. This yield was at rate of 2½ bales per acre.

W. C. Naftel. Montgomery County, grew 1,923 pounds of seed cotton from one pound of Mortgage-Lifter.

Milton A. Deese, Dale County, made 5,874 pounds of Mortgage-Lifter from 3 pounds of seed.

Eugene Burton, Lee County, grew 1,793 pounds of Sure Crop from one pound of seed.

Fred M. Wilson, Winston County, made 1,627 pounds of Mortgage-Lifter from one pound.

Georgia F. B. Moss. Telfair County, made 13,360 pounds of seed control ton from one bushel of Mortgage-Lifter.

W. W. Atkinson, Morgan County, in his first year's trial for prize, grew 2.447 pounds of seed cotton from 3 pounds of Mortgage Lifter. The following year he grew 4,576 pounds of seed cotton on the same ground from 3 pounds.

Jeff Dean, Hart County, made as follows, using Mortgage-Lifter: from t bushel plauted, 17.888 pounds of seed cotton; from 3 pounds, 4,326 pounds; from 1 pound, 1,538 pounds.

M. C. Carter, Emanuel County, grew 6,113 pounds of Mortgage-Lifter from 3 pounds of seed; further, 716 pounds were picked from 5000 stalks, some of the stalks producing 4 pounds of seed cotton each.

Louisiana-Mississippi P. E. McCasland, Clathorne pounds of seed cotton from 3 pounds of Morgage-Lifter.

pounds of seed cotton from 3 pounds of Mortgage-Lifter.

J. E. Perkins, Harrison County, Miss., made 15,005 pounds of seed cotton from 1 bushel of Mortgage-Lifter. He says "The best cotton ever seen in

C. Douglas, Lauderdale County, Miss., made 4,600 pounds from 3 pounds J. M. King, Rankin County, made 3,912 pounds from 3 pounds,

"NEW BANK ACCOUNT" COTTON

this section.

"NEW BANK ACCOUNT" COTTON

THE NEW "BANK ACCOUNT"

AN EXTRA EARLY, VERY PROLIFIC, STORM-PROOF COTTON

This is the fourth distinct variety of cotton introduced by us and in many respects it's our best. It is the result of eleven years of cross breeding and selection, and a glance at the illustration on the opposite page, reproduced from a hotograph of a single stalk, shows just what can be done with it here in North Georgia.

THE "BANK ACCOUNT" is an extra early, medium-size boll, storm-proof, mostly five locks, and does not blow

THE "BANK ACCOUNT" is not a chance variety. It was bred with a distinct purpose in view. We wanted a variety as early or earlier than the King Extra Early, medium to large bolls that were storm-proof; open foliage to let the oun in so that bolls would open quickly when grown; a prolific cotton that would equal in yield any of our later big boll varieties and produce a quality lint that would sell at the top of the market prices. All of these good qualities are comuned in the "Bank Account" together with deep-rooting and drought-resisting powers.

WEEVIL SECTIONS COTTON for BOLL

iets Ahead of Big Boll Weevil The "Bank Account" is ust the cotton to get ahead of the boli weevil. It makes a good crop beore the boll weevil has any chance to get in his work, and for this reason ne Bank Account" cotton is worth millions upon millions of dollars to ne cotton growers in boll weevil sections. Every year the weevil moves sass. If you are already in a boll weevil sections. Every year the weevil moves sass. If you are already in a boll weevil section you need this new variety. To one is just as early as King Extra Early and it don't blow out or drop out see King. Its bolls are larger. It's a heavier bearer and makes better and oncer lint. It roots deeply, resisting both drought and storms. It branches well and has light open foliage, letting in the sun perfectly to all parts of ne plant. It don't have dense shade for Mr. "Boll Weevil" to hide away a This gets you ahead of the boll weevil in boll-weevil sections, and in any section it enables you to market long before any other variety is ready.

An All Purpose Cotton It has been truthfully said that there is no one variety of cotton best for all sections, all lands and all seasons, but our New "Bank Account" cotton best for all sections, all lands and all seasons, but our new "Bank Account" cotton will come nearer being an all purpose cotton for all sections than anything we have ever seen. We have tried it under all sorts of soil conditions from Middle Georgia to the Tennessee line, in uplands and in bottoms and it has "made good" everywhere it has been planted. It possesses a vigor that enables it to go on and make a fair crop when other varieties have died out completely from drought. It is hardy, remarkably so. Every cotton farmer East of the Mississippi River knows the difficulties experienced in getting a stand in 1907. Four or five plantings were frequently necessary and even with that the stands were Door. ings were frequently necessary and even with that the stands were poor.

Every one of our growers of the "Bank Account" cotton got a perfect stand with the first planting in 1907. You can't find a hardier, more vigorous, more prolific cotton than our New "Bank Account."

PER ACRE 1.056 POUNDS

Right Through the Crop We all know that it is related on a single acre, fertilized to the limit and tended like a good garden, but the real test of a cotton is knowing what it will do on ordinary land, with the ordinary culture and fertilizing; just the ki-d of treatment that a good average cotton grower would give his crop. To test this id acres of fair. Georgia red clay uplands, rather hilly, was set aside in 1907, fertilized with 400 pounds per acre of a standard brand of cotton fertilizer. Regular cultivation was give. Seed planted between May 10th and 15th, killing frost October 13th. It opened perfectly and the final reports from the gin showed a yield of lint to the amount of 16.896 pounds an average yield of 1,056 pounds of lint per acre right through the crop. Two bales per acre on 16 acres of very ordinary land without special treatment and in a short growing season. Do you know of any other cotton that will do it. We don't, but if we did we would buy it just as quick as we could find the man who had it. had it.

On Bottom Lands In the Cotton States of the South there are hundreds of thousands of acres of cold bottom lands that are risky to plant ir. cotton. Plantings on this sort of land are necessarily late and much of the time the crop is lost because the bolls wont open. The "Bank Account" cotton is just the right variety to make a perfectly safe crop on bottom lands. Its naturally open growth and light foliage lets the sun in and the cotton opens just as well as it does on the uplands. We purposely had a field planted on cold bottom land in North Georgia. It made an immense crop with May 20th planting and killing frost on October 13th and it opened perfectly. The grower who handled this crop said recently "I will never be without the 'Bank Account' cotton to plant on my bottom lands."

If you have a piece of cold late bottom land on your farm don't fail to plant some of the "Bank Account" cotton on it in 1909.

43 PER CENT

One of our growers in Northern Alabama had 100 acres in "Bank Account" last year. In a letter making a report on the crop he said: "My cotton, so far, has turned out 43 \%100 per cent. lint. That was in 1907 and it beat any record we had heard of up to that time."

Our own crop of "Bank Account" in 1908 has turned out exactly 43 per cent. lint, duplicating in Georgia what it did the previous year in Alabama.

"BANK ACCO Planters Say About

Alabama A. D. Chancellor, Cherokee Co. "Am getting good!results from Bank Account' planted May 20th, and had damaging drought in July and August. Have already picked more cotton than has been taken from same land in any one season for 15 years and will get 5 to 6 bales more." F. D. Hayles, Escambia Co. "It makes well to top of stalk. From 6% acres have ginned 2,628 pounds lint, have still 1,400 pounds seed cotton and a light picking." Thos. J. Lovvorn, Randolph, Co. "It has more bolls to the stalk than any cotton I ever saw." J. H. Rollins, Houston, Co. "I planted 1 acre in 'Bank Account.' Have gathered 2,000 pounds seed cotton. Drought cut it off one-third." D. M. Jones, Antanga, Co. "I have made no mistake in getting "Bank Account." No trouble to make a bale per acre. 1,250 pounds seed cotton made 510-pound bale."

Arkansas J. L. Lyons, Sevier Co., "Planted Bank Account on upland that had not made % bale to the acre for years. Seed planted May 20th, no fertilizer. Gathered 1.680 pounds per acre. Rest of my crop did not reach half that. I just think it is the cotton."

Louisiana L. L. Perdue, Union Parish. "Sorry I didn't get enough to plant my entire crop. The 'Bank Account' is the cotton for boll weevil districts." R. C. Corbin, West Carroll Parish. "Common cotton is making 1/2 to 1/2 bale per acre, 'Bank Account' 508 pounds lint per acre. That's the difference." Levy Tassin, Avoyelles Parish. "Bank Account' has given the best of results. Made 3/4 bale per acre and boll-wearils were fiarce." boll-weevils were fierce.

Mississippi T. M. Manning, Hinds Co., "Bank Account' OK. Planted May 27th, made 2,263 pounds lint from 1 bushel seed." J. M. Adams, Jones Co. "I will get 8 bales from 6 acres, 3 of those acres made 5 bales." L. A. Boggan, Simpson Co. "Planted 1½ acres ridge pine land. Have picked 3,126 pounds and am good for 1,000 more." R. E. Cameron, Panola Co. "Will make 2,400 pounds seed cotton per acre."

Texas R. H. Allen, Grimes Co. "Never saw anything make so fast. Does its work so quick, boll-weevil can not keep it from making crop." A. D. Armstead, Houston, Co. "The best variety one can plant in boll-weevil districts. A great linter and forms bolls with unusual rapidity." R. B. Knight, Sabine Co. "It made bale per acre where only half bale had been made before.

New "Bank Account" Cotton, pound, postpaid, 50 cents; 2½-pound package, postpaid, \$1.00; peck, not prepaid, 75 cents; 1 bushel (30 pounds, Georgia legal weight), \$2.00; 10 bushels, \$17.50.

pounds, not prepaid, \$6.00. Freight rate to Texas, Arkansas and Oklahoma \$1.15 per 100 lbs.

THE ROSSER NO. 1

Our Extra Early Large Boll Cotton XXXIII

Gets Ahead of the Boll Weevil

Rosser No. 1 has been on the market for 3 years and for an extra early cotton, especially for boll weevil sections and extreme northern districts in the cotton belt it has proven itself unsurcoulon belt it has proven itself unsur-passed. It is a hybrid cotton, the result of a cross between Kings' Extra Early and a large extra big bolled sort. It begins opening just as early as the earliest strains of Kings', bolls are double the size and a far better lint. One of our Texas customers reports that in Texas it opened one week be-fore the King and enabled him to make a good full crop before the weevil had a good full crop before the weevil had done any damage.

Rosser No. I puts you in ahead of the boll weevil in the boll weevil sections, enables you to market early if you desire to, and gives you a larger boiled, easily picked variety. It has none of the ba qualities of King's or a late variety that is slow to open. It's an alright early cotton that will give you heavy yields where the crop has to be made in a short time.

Rosser No. 1 holds the record of making slightly over one bale per acre in 134 days—seed being planted June 8th and plants being killed by frost October 20th. This was on rather poor Georgia red clay, upland, in a dry

Rosser No. 1 will enable growers in the worst boll weevilsections of Texas to again make profitable crops because it pu's on the greater part of the crop before the boll weevll has a chance to get in its worst work.

It is unlike other extra early varieties, in that, while it puts on and opens a heavy crop early still it continues to bear until frost kills the plant.

Bolls are mediun to large and do not blow or drop out easily. Adapted to all parts of the cotton section, and after seeing it grow for several years here in Georgia, in all sorts of seasons and on different soils, we can recommend it fully to any one who wants an extra early, large bolled, heavy bearing cot-ton. It is cross-bred and contains both white and green seeds.

For three years our crops of Rosser No. 1, near Atlanta, were pronounced by cotton experts the best fields in this section. One grower in 1904 produced lint at a net cost of 3% cents per pound, giving him a net profit of over 6% cents per pound on every pound of lint grown by h m that season, having sold his crop at 10 cents.

PRICES Pound, postpaid, 35 cents; 3 pounds, \$1.00 postpaid; peck, by express or freight, not prepaid, 50 cents; bushel, \$1.50; 10 bushel, \$1.50; 10 bushel, \$1.50; 10 bushel, \$1.50; 10 rate to Texas, Arkansas and Oklahoma, \$1.15 yer hundred pounds.

Rosser No. 1-Our Extra Early Large Boll Cotton.

King's Extra Early A standard extra early variety; close. Makes 30 to 35 per cent lint. Our seed is grown in extreme North Georgia and is the best obtainable. Pound, postpaid, 20 cents; 3 pounds, 50 cents. Not prepaid, peck, 40 cents; bushel, \$1.00; 10 bushels, \$9.00; 100 pounds, \$3.00. Write for special prices on large quantities.

Russell Big Boll Big boll late variety. Seed both green and white. Strong, vigorous grower, but very late and should not be planted in any section where earliness of crop is desired. Seed grown from original stock. Pound, postpaid, 20 cents; 3 pounds, 50 cents; peck, not prepaid, 40 cents; bushel, \$1.00; 10 bushels, \$9.00; 100 pounds, \$3.00. Write for special prices on large quantities.

Truitt > Culpepper > Christopher

Three varieties of main crop; big boll varieties that were much planted
before the introduction of Mortgage-Lifter and Sure Crop. Plants of each
of these are vigorous growers and withstand drought well. They are all
fair croppers in favorable seasons. Price of each, 30 cents per pound, so
paid; 3 pounds, 50 cents. Not prepaid, peck, 40 cents; bushel, \$1.00; 10
bushels, \$9.00; 100 pounds, \$3.00.

Peterkin Improved A splendid drought-resisting cotton. Heavy bearer; open growth; fine staple. Pound, 20 cents; 3 pounds, 50 cents. Not prepaid, peck, 40 cents; bushel, \$1.00; in any quantity.

KEEPING THE BOYS ON THE FARM A Heart-to-Heart Talk With Farmer Fathers

I want this to be a personal talk between us, and what I say is not meant in a spirit of fault-finding but is meant to be a help on a matter that either In a spirit of fault-finding but is meant to be a help on a matter that either has come or will come home to every farmer father of boys. First, I have three boys of my own, and while I do business in the city my boys are not being raised in the city, but are out in the country. Second, I have lived in both city and country, my life having been about equally divided between the two, so I am in a position to know both sides and do.

The farmer boys and young men are drift ng steadily to the cities and towns. The majority of our 75 employees here in Atlanta are from the farms and small country towns. This is true of almost every other large business house here in Atlanta and other cities. We are mighty glad to get them, too, for they average up a whole lot better than the city raised boys.

Almost every successful business man in the city of Atlanta was a country

Almost every successful business man in the city of Atlanta was a country boy. There is a whole lot of foo I for thought in that fact. It's an absolute fact that the farms are being drained of some of the best blood and brainsto build up the city. Boys and young men that the farms are being drained of some of the best blood and brainsto build up the city. Boys and young men that the farms ne d for their proper development, both social and financial, drift steadily to the cities and towns.

Why Do They Leave the Farm? Possibly one or more off your boys has left home and now is a city or town boy. If so, why did he leave? I have had plenty of chances to talk to these "farm boys" and had out. A few are simple, foolish ones, attracted by the glare and glitter of city life, who come largely with the idea of having a good time. These are so few that they hardly count. The farm boys that are the steady workers, the ones whose pay we are glad to raise frequently, tell me they leave because their is no chance for them on the farm. Why no chance? Because their fathers held them back, wouldn't keep up with improvements or let the had the them to the farm. The fathers continued to farm hy main strength and the by do it either. The fathers continued to farm by main strength, and wanted the boys to do the same. I am talking now of hard working boys with plenty of sound, common sense, the ones who make successful business men in the city.

These Are Ambitious Boys and they ought to The boy without ambition never amounts to much anywhere. If the ambitious boy is la back at home he is going to use that ambition somewhere, and the city h lo back at home he is going to use that ambition somewhere, and the city is the first place in sight. He hears of the successful city men. He don't hear of the dozen failures to every successful one. He gets the idea that to be successful he has got to do something except farming. He has never been taught that farming is a business, when he ought to have been taught, by the example of his father, that farming is not only a business, but a business that brings higher average returns for the amount of capital invested than any line of business in the city. How many of the farmer fathers run their farms as a business? Is it was true that most of his look on farming simply as an occupation that affords not true that most of us look on farming simply as an occupation that affords us a living only, with little or nothing more than a living to look forward to? With that kind of a proposition in view, is it any wonder the boys leave the farms?

All Across the Country in groups I go all the way across the United States every year, traveling usually about 15/c00 miles, During that time I am in almost daily contact with farm life from the Atlantic to the Pacific. I can't help but think of the things I see on these trips and one of them I that the better the farm methods are in any section, there you will find the most young men staying on the farms. It's true, East or West, South or North. Low quality farming, with small crops, low priced lands, bad roads, everything going on as it did 25 or 50 years ago, making only one-third to one-half what the land is capable of producing with up-the date methods and varieties, driving the boys to the towns and cities just as

date methods and varieties, driving the boys to the towns and cities just as surely as if they had been ordered off the place. These ambitious boys can't remain contented under such conditions.

In sections of the country where the value of farm lands has been brought up to \$100.00 to \$200.00 per acre by the best farm methods, where the best farm machinery is used, where there are good roads, schools and churches; where the farms are run in a strictly up-to-date business manner, the boys are staying at home on the farm and glad to stay. Under such

where We "Fall Down" Not all, but most of us right chance. It isn't necessary to turn the whole farm over to him, but if the father won't use the best methods he certainly ought to be willing to let the boy have a chance to try out new ideas on from one to five acres. He couldn't, if he tried, make a much worse showing than the average cotton production. We have got young men in our employ now that, if they had been given the chance, would have made first-class business farmers. The great lack on our farms today is the failure to make our lands produce more than one-third or one-half what they are capable of with the use of good seed and best methods. Rightly handled, farming can be made the best

kind of a paying business.

As a result of more than 20 years' contact and observation of average farm methods, I am entirely fair in saying that if the average business in the city was run on the lines that the average farm is, that nine out of ten business men would be bankrupt in a year, not because of a lack of economy in management, but because of a failure to make the most of chances or opportunities for profit.

chances or opportunities for profit.

The Business of Farming rightly managed, is ness as shoes, hardware, groceries or dry goods. The successful business farmer makes his land work full time. Are you doing it or letting that boy of yours do it? Do you plow deep? Do you plant pure bred seed or do you plant "just cotton seed?" If you are growing less than a bale of cotton per acre in a good season your land isn't working full time. Good, well selected seed is half the crop. (See statement on page 3.) Land, with good cultivation, is the other half. The average yield per acre of the cotton states is only 191 pounds of lint cotton. Not over one million acres out of the thirty million acres of cotton is planted in good, selected seed. An increase of one big boll per plant means an increase of 25 pounds of lint perace. Well selected seed often means ten more bolls to the plant—an increase of a halt bale ber acre. It was estimated recently that an increase of a single grain on each ear of corn grown in the United States would increase the value of on each ear of corn grown in the United States would increase the value of the corn crop \$1,620,000.0°. A single grain of corn or a single boll of cotton looks small, but they add up fast, and every extra one you produce means that much extra profit. That's where the seedsman comes in, just where he helps make the farming business 1 ay.

If you are already a business farmer, you know that every word I have said is true. If you haven't been working your land full time, this is the year to begin. This catalogue will help you to begin. If you will run that farm as a business instead of just something to make a living out of, the boys will stay with it. Get into the "farming business" and let the boys in as full partners with an equal say as to how things should be done, and they will stay with it and make a good comfortable income both for you and H. G. HASTINGS.

SEED OME FLOW

For several years we have given as a premium a packet of flower seed absolutely tree on every order no matter what the size of the order. In making out your order, select one variety from the following list of flower seeds and we will send it absolutely free if you ask for it. We want to help make Southern farm homes attractive and nothing helps like flowers. Remember this extra packet of flower seed don't cost a cent extra.

NASTURTIUM, TALL MIXEU-A fine mixture containing all the finest NASTURFUM, DWARF MIXED-No such combination of rich, brill-

NASIURIUM, DWARF MIXED—NO SUCH COMBINATION OF ICH, DILI-iant coloring and strong, vigorous growth has ever been sold before, PANSY, f REN H MIXE—A splendid mixture of all shades and colors from our French growers. A good variety for planting in the South. PHLOX, GRANDIFLORA MIXED—An extra fine strain of large flowered phlox, nearly twice the size of the old kind. All shades and colors.

PETUNIAS, FINEST MIXED-Our best mixture of fine single petunias, all shades and colors.

HASTINGS' UNRIVALED MIXED ASTERS-Best possible mixture of all colors and kinds of asters from the best European growers.

BALSAMS, DOUBLE MIXED-Very fine large double flowers, all shades and colors. These make a brilliant display.

DIANTHUS, SUPERB MIXED-Our best mixture of all the best varieties of Chinese and Japanese pinks

POPPIES, SPLENDID MIXED-A fine selection of all the popular double and single varieties. They make a most brilliant display of color.

HASTINGS' MIXED FLOWER GARDEN-Oursplendid mixture of annual flowers all to be sown together in one bed. Furnishes continuous bloom.

TWO DOLLARS FOR ONE

By buying seeds from us to the amount of one dollar or more from this catalogue you will get, without a cent's additional cost, a year's subscription to that best of all Southern agricultural papers, the Southern Ruralist. We are able to do this by a special agency arrangement with its publishers. We want you to have THE BE T, in both seeds and paper. That's why we make this offer to you. The Ruralist is the only thoroughly practical up-to-date Southern farm paper published in the South. Its editors are real Georgia farmers. They know what they are talking or writing about and every number is full of thoroughly practical Southern farm and garden information. It contains from 24 to 40 pages each issue and will come to you twice every month for one year it you buy seeds from us to the amount of \$1,00 or over. There is not one to whom this catalogue goes that does not need at least a dollar's worth of seeds this spring. By sending to us you not only get full value in the seeds but you also get another dollar's worth of paper without its costing you a cent extra. Full particulars as to the Ruralist on the order sheet. Send now and get two dollars worth for one. It's the best seed-buying bargain ever offered. You can't afford to be without Hastings' Seeds and the Southern Ruralist on your farm in 1909.

Successful Seeds for Southern Sowers

Hastings' Right Varieties of Right Quality at Right Prices

Every Time You Order Seeds or Write to Us Be Sure and Give YourName, Postoffice and State Plainly. Hundreds of Orders Are Delayed Every Year Because the Sender Forgets to Sign His Name or Give His Address.

SEEDS POSTPAID BY MAIL Remember that the prices given in this list include the delivery of all seeds by the packet, ounce, quarter-pound, pound, pint or quart, except where noted. Send us the amount named in this catalogue, and we guarantee safe delivery by mail in these quantities.

LIBERAL PREMIUMS Please bear in mind that on seeds in packets and ounces only except ('auliflower in ounces) (no quarter-pounds, pounds, pints or quarts), the purchaser may select 25 cents worth extra on each dollar sent. This does not apply to orders for collections, prices of which are net.

COST OF SENDING MONEY In all cases where the order for seeds amounts to one dollar or more, the cost of post-order or cost of registering the letters from places that are not money order offices, may be deducted from the amount.

STAMPS On orders for seeds where the amount is less than 50 cents, we will accept postage stamps in good condition (one-cent and two-cent stamps preferred) the same as cach, but we would ask those remitting stamps to wrap them in oiled paper, if possible, to prevent them sticking together or to the order.

SPECIAL EXPRESS RATES We have obtained from the Southern Express Co. a special express rate on seeds about one-third from the regular rates, and on shipments of less than 30 pounds, we can, in most cases, ship by express cheaper than by freight. As a rule, we can ship 15 pounds of seeds or a peck of peas, or beans, or corn to any point reached by the Southern Express Co. for 35 cents. This does not apply to points on the Wells-Fargo. American or Pacific Express. The cost in those cas swill be 35 cents for each company on a 10 or 15 pound shipment, making a charge of 70 cents for a point when shipment is handled by two different express companies.

ABOUT WARRANTY H. G. Hastings & Co. give no warranty either express or implied, as to description quality, productiveness or any other matter, of any seeds, bulbs or plants they send out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned, and any money that may have been paid for them will be refunded. Crops are dependent for success or failure on so many things besides the seed that it is impossible to give any warranty or guarantee. This does not mean that we lack confidence in the seeds we sell, but we have no coutrol over the goods after they leave our house, especially so, as to methods of planting, cultivation and fertilizing, all of which are important factors in the success of any crop. If we should warrant or guarantee seeds in any way we could be held responsible for the failure of the a responsibility we can not and will not accept.

crop, regardless of cause, and this is

Palmetto Asparagus

Palmetto Asparagus Seed The Palmetto, while an old variety, is beyond question the best variety for the South. Seed can be sown in either fall or spring, thinly in drills one foot apart. When up well, cultivate frequently and continue until the roots have grown for one year. In transplanting put the roots 18 inches apart each way and 4 inches below the surface. Use your richest piece of ground and remember that you can not use too much manure on them. Palmetto is earlier, a better yielder and more even and regular in growth than many of the later introductions. Packet, 5 cents; ounce, 10 cents; ½ pound, 20 cents young 60 cents

Palmetto Asparagus Roots You save from 1½ to 2 years' time in getting your Asparagus bed Palmetto Asparagus Roots. Plant them this spring and cut good Asparagus next spring. While this is a little more expensive than planting the seed, yet the time saved and the generally more satisfactory growth makes it well worth while to use the roots. 50 roots, 85 cents; \$1.50 per 100; postpaid. By express or freight, not prepaid, per 100, 75 cents; per 1,000, \$5.00; per 10,000, \$40.00.

French Globe Artichoke A vegetable little known or liked by Americans, but highly prized Best imported French seed. Packet, 10 cents; ounce, 30 cents; ½ pound, \$1.00.

Jerusalem Artichoke, the Greatest Hog Food.

The Southern farmer who grows hogs and does not grow Artichokes is neglecting a most important hog-food crop. It is a most valuable food for hogs, fattening them quickly, and it is said by many hog raisers that a hog fed on artichokes has never been known to have cholera. They are fully adapted to Southern plantings, growing and increasing through the entire

season. They are grown from tubers, the same as with Irish potatoes. It requires 6 bushels to plant an acre. On very rich land they have produced 1,000 bushels per acre. Turn the hogs into the field and they will harvest them. Cut the tubers to a single eye, planting in March and April in rows 3 feet apart, dropping seed every 2 feet in the row. Let grow until fall. Hogs will harvest them all through the winter. Pound, postpaid, 25 cents; pounds, 65 cents. By freight or express, not prepaid, peck, 65 cents; bushel, \$2.00; barrel (of about 3 bushels), \$5.00.

Jerusalem Artichoke

SH OR BUNCH BEANS

FOR SPRING PLANTING

Culture In this latitude (Atlanta) sow bush beans from March till Seltember. Continuous crops may be grown through the entire summer. In Florida and along the Gulf Coast planting may be done earlier, but bush beans will not do well in that section during June, July and August, so that spring and fall plantings must be made. Sow in drills 18 inches to 2 feet apart, dropping a bean every 4 inches and covering 2 inches. Soil should be warm and moist for successful germination. When about to bloom draw the earth up around the stem. Keep the soil stirred frequently, and as fast as the beans mature pick them off if you want them to stay in bearing for a long time. W HASTINGS' BIG BEAN PACKETS W

Henderson's Bush Lima (See Page 11)

It is the rule in almost all mail order seed houses to put up packets of beans and peas containing 2 ounces to sell at 10 cents. Our packets of beans and peas contain 3 1-2 to 4 ounces each, same selling for 10 cents postpaid. In buying from Kastings you not only get the best but twice as much.

Longfellow

Green Podded

New Bean for the South

When we introduced the Longfellow to the Southern gardeners, we knew it was a first-class green podded bean, but we were not expecting it to attain a front rank in popularity the first season. You will like it no matter where you are, whether growing beans for market or for home use.

Longfellow is extra early, with long straight pods, well rounded out and of pale green color. An extremely heavy bearer, pods being held well up off the ground. In flavor it is most delicious and it holds its delicate green color after cooking. We want every one of our seed buying friends to plant a few Longfellow beans this year. You will be delighted with them. For home use they are fine: for the shipper to distant markets there is none to equal it. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 45 cents: postpaid Peck, \$1.25; bushel, \$4.50.

Hastings Excelsior Refugee grower and a heavy bearer of medium sized round, finely flavored pods. No early variety equals it in ability to withstand either extremely wet or dry weather without injury. Holds pods well up off the ground. We can recommend it to you fully either for early or late plantings if you wish to combine earliness, sureness of crop, quality and quantity: Packet, 10 cents; pint, 25 cents; quart, 40 cents; postpaid. Not prepaid, peck, \$1.50; bushel, \$5.00.

Improved Round Pod Refugee or 1000

Also known as "Brown Valentine." It is almost identical with our Excelsior Refugee exalmost identical with our Excelsior Refugee except that it is 10 days to two weeks later in bearing. An immensely heavy yielder of round green pods of fine quality. Especially resistant to drought, cold and unfavorable growing conditions. Very largely used by market gardeners, both for nearby markets and long distance shipping. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart 40 cents; postpaid. Not prepaid, peck, \$1.10; bushel, \$4.00.

Stringless Green Pod

Our absolutely stringless, green, round-podded bean, stringless in all stages of growth, from the

Hastings' Excelsior Refugee Bush Beans

time the first pods form until they are full grown and ready to dry up. It surpasses all other beans in crisp, tender qualities and fine flavor. It makes a beautiful appearance with its long, smooth, green pods, the natural size of which is shown in our illustration on this page. It is very prolific, a strong, vigorous grower, and comes into bearing before Red Valentine, and continues to produce long after other varieties have gone, the pods retaining their superb eating and stringless qualities to the last. Of greatest value to those with the family garden, who desire to combine quality with the heaviest production. Tests of it all over the South during the past years have shown its great superiority in every respect. We recommend it to everyone who plants beans in the South. It is one of the best green-podded bush beans that you can plant. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 45 cents; postpaid. Peck, \$1.50; bushel, \$5.25.

Hastings' Extra Early Red Valentine (Round Podded) The Valentine is

beans is the true round-podded stock, something that will give you entire satisfaction. Early, a vigorous grower and a heavy bearer of medium sized round, tender, fine flavored pods. For purity and high germinating qualities Hastings' Valentine beans have no equal. Very uniform in ripening and is considered a most profitable bean to grow either for warkets. bean to grow either for market or home use. Look out for the flat podded, tough, shucky Valentine Beans. There are plenty of them on the market and the difference in the appearance of the seed is so slight that it cannot be detected except by expert seedsmen. If you want Valentine beans of the right kind we have them. Packet, 10 cents; ½ pint 15 cents; pint, 25 cents; quart 40 cents; postpaid. Not prepaid, peck, \$1.25; bushel, \$4.50.

Hodson's Wax (NEW) A new wax bean which we think will be a very popular variety. A strong, vigorous grower, with tough healthy foliage. The pods are about 6 inches in length, nearly straight, thick. flat and meatry, very tender and of excellent quality. It is neither extra early or very late in season, but a good medium. The grower says of it, "This has special merit." Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 45 cents, postpaid. Not prepaid, peck, \$1.40; bushel, \$5.00.

MORE COTTON MONEY

If you grow any Cotton you should read very carefully pages 1 to 6

Red Valentine Bean

Stringless Green Pod

Wardwell's Kidney Wax Beans

Valentine Wax An extra early Valentine bean, with purely round stalks and plenty of foliage. Has produced well grown pods in 37 days from planting and is the earliest wax bean grown. Pods meaty and almost stringless; free from rust; holds a long time wi hout becoming tough and is very productive, something unusual for an extra early variety. For those desiring the use of a first-class wax bean for home use we can recommend this variety without reserve. It will give heme and market gardeners entire satisfaction. Crop very short this year. Seed stock limited. Packet, 10 cents; ½ pint, 20 cents; pint, 30 cents; quart, 50 cents.

Currie's Rust-Proof Wax This is a market gardener's favorite, especially adapted to long-distance shipments. It is one of the earliest of the wax varieties. Vinesstrong, robust and growing very upright, holding the pods well up off the ground. Pods long and almost straight, rather flat and of a beautiful golden yellow and of fairly good quality. It is growing in favor with the truckers of Florida for shipment to the growth during the spring months. We recommend it only as a market gardener's variety. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 45 cents; postpaid. Peck, \$1.00; bushel, \$3.50.

Davis' White Wax An immensely productive market gardener's straight pods 5 to 6 inches in length. Pods rather thin; tough and stringy when full grown. Its value in the home garden is only that of a shell bean. The seed being white, makes it a good shell bean for winter use. In shipment it holds up splendidly, and it sells on its handsome appearance. In quality for eating as a snap, it is one of the poorest. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 45 cents; postpaid. Peck, \$1.40; bushel, \$5.00.

Prolific German Black Wax We have secured from one of our bean growers an

old favorite, the German Black Wax; larger, a better grower and a much heavier bearer than the old variety. Crop of German Wax very short. Packet, 10 cents; ½

short. Packet, 10 cents; ½
pint, 15 cents; pint, 25 cents; quart, 45 cents; postpaid. Peck, \$1.40; bushel, \$5.00.

The most popular wax

Valentine Wax Beans

Rust-Proof Golden Wax We have sold this variety for several years, and it always pleased our customers. It's the best form of the Golden Wax Bean in existence, and "RUST-PROOF" to a remarkable degree. Pods are long, almost straight, much fleshier and far superior to the popular Improved Golden Wax, which we have dropped from our list because this "Rust-Proof" strain is so much better. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 45 cents postpaid. Peck, \$1.25; bushel, \$4.50.

White Mexican or Prolific Tree Bean

BEST 4 BEAN COLLECTION The best 4 beans for Stringless Green Pod, Wardwell's Kidney Wax, Old Homestead Pole Bean and Henderson's Bush Lima. One packet each of these 4 splendid varieties for 25 cents, postpaid.

White Mexican or Prolific Tree Bean Why buy White or store when you can have them at home without trouble? Our White Mexican or Prolific Tree Bean resembles the Navy bean very closely in appearance and makes a good crop in the South. Plants are of erect growth, holding the pods well up from the ground as shown in our illustration. Plants about two feet high, branching in all directions. Plant in rows two feet apart and leave plants six inches apart in row. Can be used either as snaps or dry as a shell bean like the Navy bean sold in the stores. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 40 cents, postpaid. Peck, \$1.50.

POLE BEANS

PROFITABLE TO GROW ON EVERY FARM AND IN EVERY GARDEN IN THE SOUTHERN STATES & & &

Texas Prolific, Old Homestead, Kentucky Wonder

Several years' careful tests convince us that these three names all belong to the same bean, and henceforth we shall catalogue them as such. It is undoubtedly the most profitable pole green snap bean that can be grown, when planted from the middle of April to the middle of August. Vines grow

Texas Prolific-Old Homestead-Kentucky Wonder.

pril to the middle of August. Vines grow off rapidly, become very rank, and would reach a height of 20 feet if properly supported. Commences bearing in 60 to 70 days, and if closely picked, will continue to frost. Podsare round, green, and grow 6 to 12 inches long. They are well rounded out, meaty, tender, and stringless. Immensely prolific, a peck measure full often being picked from a single vine, our illustration giving you a good idea of its productiveness. If you have never grown it, try it this year. You will be pleased with it. Here in the South with our long seasons, a pole bean like this is very profitable. Look out in buying seed of this variety, however. Hundreds of bushels of the short, tough, "shucky" Southern Prolific have been sold under this name in recent years, and are being offered this year. The appearance of the seed is almost identical. We have the true and genuine stock which will please you. Packet, 10 cents; '¿ pint, 20 cents; postpaid. Peck, \$2.00; bushel, \$7.50.

LOST \$20.00 Per Acre Planting His Own Seed.

We have no apology to make for talking about cottonseed at any place in this catalogue. It is a matter of vital importance to nine out of ten to whom this catalogue goes. Read what Mr. Chas. F. Green, of Hill County, Texas, says: "I raised 6,730 pounds of Seed cotton from one bushel of Mortgage-Lifter Seed. If any one can beat that without irrigation or fertilizer, with Mexican boll weevils to cut off the top crop, they are welcome to the prize. I will say that it is the best cotton I ever saw. I would have made \$20.00 more on every acre I planted if I had got all my seed from you, as that is the amount I got over and above my own cotton with your Mortgage-Lifter. It would have paid me well to have paid you \$5.00 per bushel to plant my crop, I got nearly double with your seed, just as you said in your catalogue. You can hardly overestimate your seed," We could fill this entire catalogue with statements such as Mr. Green's that have come into us from customers who have planted our seed in the last four years. It shows just what good seed of the best varieties will do as compared with other kinds.

Golden Cluster Wax

In some parts of the South there seems to be a groundless prejudice against wax beans. In the Early Golden Cluster Wax we have a wax bean equal in all respects to the Old Homestead or Texas prolific in vigor of growth, size and quality of pods, earliness and length of bearing; and fine flavor and tenderness. The beans are large and white and make an excellent shellbean for winter use, giving an excellent bean both for snap and shelling. Packet, 10 cents; ½ pint, 15 cents; pint, 30 cents; quart, 50 cents; postpaid.

Lazy Wife's Pole One of the most popular pole varieties. Pods stringless white and make good shell beans for winter use. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 45 cents; postpaid.

Southern Creaseback Also known as "Fat Horse" bean. A splendid grower and heavy bearer. Pods tender when small, but as they get full grown become tough and stringy. Beans are pure white and excellent for shell beans for winter use. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 45 cents.

Small White Lima Small Lima (Sleva)—The climbing form of Henderpint, 25 cents; quart, 45 cents. Packet, 10 cents; ½ pint, 15 cents;

Large White Lima The true large Lima Pole Bean. Packet, 10 cents; 1/2 pint, 15 cents; pint, 25 cents; quart, 45 cents; postpaid

OUR BEST 3 BUSH LIMAS

Burpee's, the Biggest; Thorburn's, the Best Quality; Henderson's, the Most Productive. All of which should be in every home garden in the South. One full-sized packet of each of these best three varieties, postpaid, 25 cents. Don't fail to include them in your order. :-: :-: :-: :-: :-: :-: :-:

Henderson Bush Lima The most popular of all the white seeded bush limas in the South. While the beans are the smallest of any of the three, yet their great prolifeness more than makes up for the small size. It's early, coming in about 60 days from planting. If planted in April, two crops can be made each season. May plantings begin bearing in July, and if well cultivated will continue to bear until frost. See illustration on page 8. Packet, 10 cents, ½ plnt, 15 cents; pint, 25 cents, quart, 45 cents; postpaid. Peck, \$1.60; bushel. \$6.00.

Burpee Bush Lima True bush form of the Large White Lima, beans identical with that in size and flavor. Packet, 10 cents; ½ pint, 20 cents; pint, 30 cents; quart, 50 cents; postpaid. Peck, \$1.75.

Thorburn Bush Lima The best in quality. Grows 14 to 18 inches sweet and succulent. Packet, 10 cents; ½ pint, 20 cents; pint, 30 cents; quart, 50 cents; postpaid. Peck, \$1.75.

DOUBLED HIS CROP

We can't impress upon you too strongly this matter of using the best cottonseed you can buy for your crop. Nine out of ten to whom this catalogue goes are interested in cotton to a greater or less extent. If you have not already done so, we would ask that you reed page 3 of this catalogue, showing how a Georgia man made \$333.50 through an investment of \$17.50 in a few months. If you grow cotton you can't afford to miss reading page 3 and doing likewise.

Hastings' Garden Beet Seed

Our beet seed is the best that is grown. It costs us more to produce this high grade seed, but we have the satisfaction of knowing that our customers get the best and our increased sales more than make up the difference. Every pound of our best seed is grown from carefully selected and transplanted roots. That's why our beet seed produce such smooth, shapely, tender roots.

Culture Sow in rich or well manured ground after same has been deeply in the rows in this latitude from early spring up to August 15th, and later further South. In Florida, sow from September to December. The seed is rough and the soil should be firmed or rolled after planting. When 2 or 3 inches high thin out to 5 or 6 inches apart in the row. The young plants are superior to turnips and spinach for greens. In light, sandy soil cover seed 2 inches; in stiff or clay soil not over 1 inch.

Hastings' Improved Blood Turnip Beet

The most popular variety for home use and nearby markets. There are but few of our many thousands of cu-tomers who do not plant it and find that it gives perfect satisfaction. It is an improvement by our grower over the Larly Blood Turnip Beet. Coloris deep blood red. Of fine, even form, very uniform in growth, medium early and productive. Tender, entirely free from stringiness and very sweet. Good for either home or market use and a most valuable variety for succession sowings. I sack t, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 65 cents; postpaid. 10 pounds, not prepaid, \$4.50.

Extra Early Egyptian An extra early market gardener's beet. A quick grower producing smooth, rather flattened turnip-shaped roots. When young the flesh is tender, but soon becomes stringy when old. Packet, 5 cents; ounce, 10 cents; ½ pound, 20 cents; pound, 60 cents; postpaid. 10 pounds, not prepaid, \$4.25.

Hastings' Crimson King One of our introductions that is a favorite everywhere in the south and is planted by thousands of our customers every year. Our illustration at the bottom of this page shows its shape and uniformity perfectly. It searly, being ready for use in favorable seasons in six weeks from time of planting. Of good size. Sweet, tender and free from stringiness, and good for all seasons. Packet, 5 cents: ounce, 10 cents; 1/4 pound, 20 cents: pound, 60 cents. 10 pounds, not prepaid, \$4.50.

cents; pound, 60 cents.

Lentz' Extra Early Turnip Beet

This variety has become very popular with many of our gardeners, both This variety has become very popular with many of our gardeners, both for shipment and nearby markets, many of them preferring it to Eclipse. It is certainly a splendid variety. Nearly as early as the Egyptian, but larger and of extra fine quality. Color a dark blood red, tender and sweet at all stages of growth. Has small top and with favorite seasons can be used in six weeks from sowing. Very productive, a splendid keeper and shipper. Gardeners, either for home use or market, will make no mistake in planting Lentz, if they want a first quality, extra early beet. Packet, 5 cents; ounce, 10 cents; 4 pound, 20 cents; pound, 60 cents; postpaid. 10 pounds not prepaid, 84.25.

pounds, not prepaid, \$4.25.

Extra Early Bassano

An extra early almost flat variety of beet of the highest table quality when young, but which becomes stringy and tough with age. It is distinct in appearance, having alternate rings of rose and flesh color regularly arranged. A good variety for earliest use in spring. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 20 cents; pound, 55 cents.

Bastian's Extra Early

An early, large size, turnip-shaped beet of the brightest red color, beautifully zoned with rings of lighter color. Profitable for either home or market use, and of the very best quality. An old favorite. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 20 cents; pound, 60 cents.

Lentz' Extra Early Beet

Blood Turnip Feet, except in color, which is a deep yellow. Slices of this alternated with red beets make a pleasing show on the tabl. Packet, 5 cents; ounce, 10 cents; 4 pound, 25 cents; pound, 75 cents.

GET BUSY For spring garden and farmwork. First thing is GRUERING SEEDS FROM HAST NGS :: :: :: :: :: :: ::

enabling it to resist drouth and heat. A few of these ought to be in every garden for late use after others varieties are gone. Flesh very tender and sweet. Packet, 5 cents; ounce, 10 cents; 14 pound, 20 cents; pound. 60 cents.

Swiss Chard or Sea Kale

Hastings' with a song weet

Eclipse Blood Turnip Beet A most popular market gardener's beet for

A most popular market gardener's beet for the South as well a favorite for home gardens. Of remarkably fine form, smooth and free from stringy roots. Small top and a rapid grower. Color a deep blood red which it retains fully after being cooked. Quality extra fine; sweet and tender. A heavy cropper and its handsome appearance makes it an easy seller when placed on the market. Packet, 5 cents; ounce, 10 cents; 4 pound, 20 cents; pound, 55 cents; postpaid. 10 pounds, not prepaid, \$4.00.

Hastings' Eclipse Blood Turnip Beet

Mangel and Sugar Beets for Stock Feed

The culture of root crops for stock food is neglected by most of the Southern farmers, and it is a farm crop that you will find profitable. The Mangel and Sugar Beets and Belgian varrots are enormous yielders under good cultivation and they make an agreeable change of diet for any animal kept on dry forage during the winter months. When planted in the spring and allowed to grow all summer, the yield is enormous and the value of the crop is shown by the increased flow of milk and the improved condition of the animals. Have your ground deeply plowed, then well harrowed. Sow seed in the spring in rows $2\frac{1}{2}$ to 3 feet apart and let grow until late fall. Use a naturally rich soil or else fertilize heavily to get profitable results. Both the Mangel and Sugar Beets are equally profitable for stock feeding. Where their value is known almost every farmer plants from one to ten prounds of seed each year. pounds of seed each year.

Jumbo Long Red Mangel This is the largest and heaviest yielder in the South of all the Mangel varieties. Roots grow one-half to two-thirds above the surface and are usually two feet long and six inches in diameter. Skin is a dark red; flesh white, with veined rings of pink. Ounce, 5 cents; ½ pound, 15 cents; pound, 40 cents postpaid. 10 pounds, not prepaid, \$2.50.

Large White French Sugar
This is the largest and one of the best of the true sugar beets, and the rich content of sugar make them especially valuable in fattening live stock of all kinds. The sugar content, when grown South, is not sufficiently great to make their culture profitable for manufacturing sugar (being less than 12 per cent), but they are a profitable crop for stock feeding. Ounce, 5 cents; 1/4 pound, 15 cents; pound, 40 cents; postpaid. 10 pounds, not prepaid, \$2.50.

Brussels Sprouts

Brussels Sprouts

Highly esteemed plant of the cabbage family. Splendid for the South. "Sprouts" are miniature cabbages growing closely on the stalk of the plant, a small head being formed at each leaf joint. Plants are hardy and live through winter in most parts of the South. Quality and flavor much improved by frost. Sow seed in early July and August, and when plants are six inches high transplant to open ground like cabbage. A most desirable vegetable for the South and should be in every Southern home carden. should be in every Southern home garden.

Improved Dwarf—A variety producing compact sprouts, of excellent quality. Packet, 5 cents; ounce, 15 cents; ½ pound, 50 cents; pound \$1.50.

Broccoli This vegetable is closely allied to the cauliflower from which it is supposed to have come. Its culture is the same as the cauliflower, and in the Southern States is a much surer header. There are many deterred from growing cauliflower from the high price of the seed. To these we recommend a trial of Broccoli. There are two varieties that do well in the South. the only difference being in the color of the heads.

White Cape—Packet, 10 cents; $\frac{1}{2}$ ounce, 15 cents; ounce, 25 cents; $\frac{1}{4}$ pound, 75 cents.

Purple Cape—Packet, 10 cents; $\frac{1}{2}$ ounce, 15 cents; ounce, 25 cents; $\frac{1}{4}$ pound, 75 cents.

Jumbo Mangel Beet

Flower Seed Free One packet given with every order. See list on page 7 of this catalogue.

Cauliflower Our Cauliflower Seed is imported from the most reliable growers in States. We furnish you the highest prade of seed and do not charge you from 50 cents to \$1.00 per ounce extra for Red, Yellow and Blue Seals on the package.

Culture Does best in rich well-tilled soil; will do in a well-manured soil. Sow in seed bed at same time as cabbage. Transplant when 3 to 4 inches high; give plenty of water in dry weather. Keep wet, hoe thoroughly and often. In Florida and along the Gulf sow seed in September, October and November.

Hastings' Gilt Edge Cauliflower

We introduced "Gilt Edge" Cauliflower in the South in 1893. Since that time we have watched all new introductions closely, and we have not found in the last 15 years a variety that comes anywhere near being its equal, for either fall or spring planting in the South.

"Gilt Edge" is rightly named. It is "Gilt Edge" in every respect. It is the largest, most perfect and surest header of all the early varieties, and in quality it is unexcelled. One specimen was sent to our store by a gardener, which, when the leaves were trimmed off, weighed 7 pounds and 8 ounces, the largest perfect head of early cauliflower we have ever seen in the South.

In general appearance, "Gilt Edge" is like the Snowball, but is much larger, a surer header and stands much longer without decay than any other. Cauliflower should be more generally grown in the South than it is, and there is no variety equal to "Gilt Edge" where a sure crop of the finest quality is wanted. Packet, 20 cents; 1/4 ounce, 75 cents; 1/2 ounce, \$1.25; ounce, \$2.00; 1/4 pound, \$7.50; pound, \$28.00.

Extra Early Paris White-Heads medium size. Fine for family garden. Packet, 10 cents; 1/2 ounce, 30 cents; ounce, 50 cents; 1/4 pound, \$2.00; pound, \$7.00

Early Snowball (Henderson's)—A good early variety, second only in value to the Gilt Edge. Packet, 15 cents; 1/4 ounce, 75 cents; ½ ounce; \$1.25; ounce, \$2.00; ½ pound, \$7.50; pound, \$28.00.

Le Normand's (Short Stem)-Packet, 10 cents; 1/4 ounce, 15 cents; ½ ounce, 25 cents; ounce, 50 cents; ¼ pound, \$2.00; pound, \$7.00. Large Late Algiers-Best late variety. Packet, 10 cents;

1/4 ounce, 25 cents; ounce, 75 cents; 1/4 pound, \$2.50. Autumn Giant-Packet, 10 cents; 1/2 ounce, 30 cents; ounce, 50 cents; 1/4 pound, \$1.50.

Hastings' Gilt Edge Cauliflower the Best for the South

Hastings' Cabbage Seed "Making Good" in Texas 6 Heads Grown by New Noakes, Nuecestown, Texas (Near Corpus Christi).

Mr. New Noakes and 6 Heads of Hastings' Centennial Flat Durch Cabbage Grown in Southwest Texas.

Photographs don't lie. They reproduce exactly what is there. That's one reason why we use nearly an entire page in this catalogue to reproduce a photograph of Mr. New Noakes, of Nuecestown, Texas, (near Corpus Christi), and 6 heads of our Centennial Flat Dutch Cabbage grown by him. There are canonage grown by him. In there are two distinct points to keep in mind a bout this photograph. First, these 6 heads were not selected from Mr. Noakes' entire field, but were taken from a load cut just as they came in the rows. Second, the seed Mr. Noakes planted was just the same grade as we sumply all of seed Mr. Noakes planted was just the same grade as we supply all of our customers who buy cabbage seed. We did not supply him with something extra with which to make a special fancy crop. It was just the regular average quality of seed we send out to every customer.

Mr. Noakes is a good truck-grower. He has good land and he handles his crop right. These 6 heads weighed 97½ pounds. The entire load was counted and weighed and the average weight per head was 794-100 pounds, practically 8 pounds per head tically 8 pounds per head.

This illustration shows just what the combination of right seed, what the combination of right seed, right man and good land make, but if the seed is not right, the man and land don't count for much in the result. The seed has got to be right to make a success

50,000 Acres of Cabbage

Were planted with Hastings' Cabbage Seed in the Southern States in 1908. Hastings' Cabbage Seed "makes good." This illustration shows the perfect shape and regularity of our cabbage. This is entirely the result of the careful selection that is always going on in our seed-growing work, not only in cabbage but every other variety of seeds that we carry.

Cabbage is the most important

Cabbage is the most important Cabbage is the most important of the Southern vegetable crops. It's a standard crop on every Southern truck farm; it finds an important place in every family garden. Yet there is no crop grown that depends more for its success on the quality of the seed planted. A packet of Hastings' Cabbage Seed will easily make from 25 fo.50 more packet of Hastings' Cabbage Seed will easily make from 25 to 50 more good solid heads than a packet of seed from the commission boxes at the store. It is not a question of having "good luck" with your cabbage, it's a question of starting cabbage with right seed.

Hastings' Cabbage seed never fails to make a good, solid, salable or eatable head of cabbage to every plant when treated right.

The Right Seed

Without the right seed full sucwithout the right seed full suc-cess is impossible. The right seed is Hastings' strictly first-class American grown. Most of the fail-ures, either total or partial, in the South, come from the use of the European grown cabbage seed, sold through small seed stores and re-tall merchants tail merchants.

If you depend on your local merchant for seed you will probably get this inferior seed. The cabbage growers cannot affect to take changes. All of Hestings Cabbage Steed is best American

HASTINGS' "PREMIER" CABBAGE SEED

It will ALWAYS "Head Up" for You All Right

Every pound of every variety of cabbage seed sold by us is what is known as "Premier Brand" seed. Eight years ago we began special work in cabbage seed with the end in view to get quality in cabbage seed superior to that sold by any one. We succeeded and named our cabbage seed "Premier Brand" Stock. It was first in quality then and it's first it was first in quality then and it's first in quality now. We except no seed house when we say that we have the best and most carefully grown cabbage seed in this country. Every pound of it is strictly pure American grown stock. Every ounce of it is grown from heads that are in-pected and passed on by the greatest cabbage experts in this country. Every head passes under his inspection, and has to be practically perfect before it is replanted to produce the seed for us. In a nutshell that's why Hastings' Cabbage Seed is superior to that of houses that charge often \$3.00 to \$4.00 per pound. It couldn't be better if we charged you \$10.00 per pound. The truckers and home gardeners have found out by actual experience just how much better it is, and that's the reason 50,000 acres of cabbage were planted with Hastings' Cabbage Seed in the South in 1908.

Premier Brand

Remember, every packet, ounce, or pound of Cabbage Seed ent out by us of every variety is "Premier Brand" Seed, the very best that can be grown.

A single head of our famous "ALL-HEAD EARLY," grown rest Atlanta, Ga., by a market-gardener, from Hastings' "PREMIER BRAND" Cabbage Seed.

ALL=HEAD EARLY

Our strain of the "All-Head Early" is the finest in existence for a medium-sized, flat, early cabbage. See the pi ture (on this page), reproduced from a photograph of a single head of "All-Head Ea ly" grown by one of the market-pardeners near Allanta. We think you will agree with us that it sa cabbage that's hard to beat. It's an extra early flat head variety. It's a sure header with half a chance; well named "All Head" as it has few outer leaves. One week earlier than the famous old Early Summer. You will be pleased with it. Premier Brand Seed. Packet, 5 cents; ½ ounce, 15 cents; cunce, 25 cents; ½ pound, 60 cents; pound, \$2.00.

HASTINGS' SURE CROP

This is the earliest of all the large, round, flat varietles. We have sold it for the last seventeen years in every State in the South, and it is planted every rieties. We have sold it for the last seventeen years in every State in the South, and it is planted every year by more people than any other variety, with the bossible exception of Surehead. It is adapted for both spring and fall planting; for shipment, near-by markets and home use. On good soil and with proper cultivation it makes heads weighing from 8 to 12 pounds, very firm and solid, uniform in shape and size, well flattened on top. Quality is excellent, being crisp and tender, and when rightly cared for scarcely a plant will fail to form a good, marketable head. Color a cark green, holding up well after being cut. It is well aday ed. for spring planting in all the South except South Florida, where fall planting only is advisable. It is a first-class variety for July and August planting in the lower half of Georgia, Alabama, Missis-ippi and Louisiana for maturing in late fall and early winter, as well as for August, September and October planting in Florida and Texas.

Premier Brand Seed. Large packet, 10 cents; counce, 15 cents; ounce, 25 cents; pound, 60 cents; pound, \$2.00.

Hastings' Sure Crop. The Largest Early Flat Cabbage

Hastings' Big 4 Cabbage Collection

Hastings' Long Island Wakefield Cabbage

Hastings' Long Island Wakefield Cabbage The largest, surest header of any of the large Wakefield strains. Earlier, larger and finer bred than any of the swains of Charleston Wakefield. One and a half or two pounds heavier, firmer, better shape and more solid than the Early Jersey Wakefield. In good soil and with favorable weather conditions it is often ready for use in 50 days from transplanting. It is a gem for those desiring a first-class pointed cabbage, and makes a splendid first early cabbage for family use. Premier Brand Seed.—Packet, 10 cents; ½ ounced 15 cents; upond, 55 cents; pound, 5

Alpha Farliest of All. A small almost flat variety, maturing 10 days earlier than Early Jersey Wakefield. Of dwarf growth and can be set 12 inches apart in row. A sure, firm header. Best extra early. Packet, 5 cents; ½ ounce, 15 cents; ounce, 25 cents; ½ pound, 75 cents; pound, \$2.50.

Hastings' Centennial Late Flat Dutch Cabbage (See also Illustration on Page 14)

MORE POPULAR EVERY YEAR

We have been tempted to drop this "Big 1 Cabbage Collection" just because we have offered it so many years. Yet, with nearly 20,000 of our customers buying it, as they did in 1908 and as more and more people buy it every year we do not feel that we ought to drop it just because it has been offered for a dozen years. Another thing; there is no collection of cabbage that we could make up that would equal it. No two of these varieties mature at the same time. It gives an all season's succession in every garden in the South.

The 25 cents spent for our Big 4 Collection gives

time. It gives an all season's succession in every garden in the South.

The 25 cents spent for our Big 4 Collection gives the buyer greater returns for the money spent, in the way of a c-bbage crop, than he can get from any other seed house in the country. Every seed that goes into this collection is from our 'Premier Brand' stock, the finest in the world.

Our 'Big 4' Co lection consists of one large packet each of our prize cabrages for the Southsure of the Southsure of the Country of the Southsure of the So

Florida Drumhead Cabbage

Florida Drumhead

Earliest and best of all Drumhead varieties for the South. It has stood the test of 16 years' planting in the South and is always a favorite for either market, shipping or home use. Resists both heat and cold. Short stemmed, medium early. Grows compactly and leaves turn in as shown in the illustration. Large, solid and well flattened on top. Premier Brand Seed. Packet, 10 cents; 1/2 ounce, 15 cents; ounce, 25 cents; 1/4 pound, 60 cents; pound, \$2.00; postpaid.

Hastings' Centennial Flat Dutch Cabbage

This is the variety shown in the illustration on page 14 as grown by Mr. Noakes. Our best variety of large Flat Dutch Cabbage. It is a good reliable header, admirably adapted to all parts of the South. It is large and solid, and a first-ciass shipper. It is a good variety for planting anywhere in the South to mature after early varieties have gone. It is very resistant to cold as well as heat, and will be found especially valuable to those desiring to lantin late summer and fall for maturity in winter and spring. There is no variety equal to it in ability to stand severe frosts and freezes. This does not however detract from its value for spring planting, as it withstands heat well. For an all-round valuable variety for the gardener it can not be excelled. Plautit this spring. Premier Brand 'eed. Large packet. 10 cents; 15 ounce, 15 cents; ounce, 25 cents.

Hastings' Genuine Surehead

We have sold a great many thousand pounds of seed of our Genuine Surehead Cabbage during the past twelve years, and it is today the most popular cabbage for main crop that we have on our list. Our special strain of Surehead (Premier Brand Seed) never fails to make fine, large, solid heads with few outer leaves, as shown in our illustration. Surehead is the result of a cross between the Early Flat Dutch and a hardy Drumhead variety, and has the good points of both combined. It's a strong, vigorous grower, maturing for main crop, and is very uniform in size, shape and color. It's good for spring planting everywhere, and one of the best for summer planting inside Central South and fall planting in the Lower South for maturing in fall and winter. It's hardy, a good keeper at da good shipper. Invaluable for the home garden and one of the best for market. No Southern garden should be without some of our Surehead Cabbage in it. Premier Brand Seed. Packet, 5 cents; ½ ounce, 15 cents; ounce, 25 cents; ½ pound, 60 cents; pound \$2.00.

Early Summer A popular early flat cabbage, coming in Wakefleld. Very uniform in size and shape, round, flattened and solid. Has small outer leaves and stands close planting. Premier Brand Seed. Packet, 5 cents; ounce, 20 cents: 1/4 pound, 50 cents; pound. \$1.60.

Early Dwarf Flat Dutch and standard for planting in the South, especially in family gardens and for nearby markets, Medium size, round and flattened. Heads usually weigh from 4 to 6 pounds. Premier Brand Seed. Packet, 5 cents; ounce, 20 cents; ½ pound, 50 cents; pound, \$1.60.

All Seasons As improved by us during the past few years, are large and solid, flattened on top. It is a good reliable header and resists heat and drouth well. Premier B and Seed. Packet, 5 cents; ounce, 20 cents; 1/2 pound, 50 cents; pound, \$1.60.

Hastings' New Perfection Cabbage

Selected Early Jersey Wakefield

Almost every one knows the popular Early Jersey Wakefield Cabbage Almost every one knows the popular Early Jersey Wakeheld Cabbage. Comparatively few know the superiority of our strain of this variety. It's grown with the greatest care and a well cultivated crop shows the greatest regularity of size, shape and solidity. If you are growing the Early Wakefield, you cannot afford to be without our extra select seed. It pays to use it, Premier Brand Seed. Packet, 5 cents; ½ ounce, 15 cents; ounce, 25 cents; ½ pound, 60 cents; pound, \$2.00.

North Carolina Buncombe A firm, solid header. and favorite winter and spring cabbage in North Carolina. Packet, 5 cents; 20 ounce, 15 cents; ounce, 25 cents; 1/4 pound, 65 cents; pound, \$2.25.

Perfection Drumhead Savoy The tenderest and richest variety of all. It does not head so well in hot weather, hence should be planted in July and August for heading in fall and early winter. Almost as hardy as kale. Premier Brand Seed. Packet, 5 cents; ½ ounce, 15 cents; ounce, 25 cents; ½ pound, 65 cents; pound, \$2.00.

Standard and Well-Known Varieties

Premium Late Flat Dutch, Large Late Drumhead, Green Glazed, Solid South, Charleston Wakefield, Farly Winningstadt, Large Early York, Extra Early Express, Early Etampes, Early Spring and Blood Red Erfurt. Bach, packet 5 cents; ounce, 15 cents; 1/2 pound, 50 cents; pound, \$1.50; pestpaid.

Hastings' Genuine Surehead Cabbage

Hastings' New Perfection Cabbage

Our new Cabbage comes as near perfection for the South as we have ever Our new Cabbage comes as near perfection for the south as we have ever seen. It is an absolutely new variety originating with one of our growers, and for a second early or main crop it has no equal. Heads weigh from 5 to 8 pounds, and are the firmest and most solid ever seen, surpassing Danish B II Head. In maturing it comes in with Surehead. It is a first class variety for either home use, market or shipment, and is entirely adapted to either spring or fall planting. It will stand greater extremes of heat or cold than any other, and its remarkable hardiness and vigor make it the saiest cabbage you can plant. It has all the good qualities and is a perfect cabbage for your use. Try it. Packet, 10 cents; ½ ounce, 20 cents; ounce, 35 cents; ¾ pound. 83 50. \$1.00; pound, \$3.50.

Succession "Succession" is largely a market gardener's variety in many parts of the South, being used almost exclusively for shipping crops. It is of rather large size, well flattened on top. In maturity it is almost 10 days later than Early Summer and Early Flat Dutch, hatting it is kinost to days tarter than Early Summer and Early Flat Dutch, but is nearly double the size of those varieties. Is firm and solid, a very sure header and stands shipment to the North, arriving in good condition and color. Succession is a good variety and a favorite in many parts of of Florida. Georgia, I ouisiana and Texas. We furnish you the highest grade obtainable in seed of this variety. Premier Brand Seed. Packet, 5 cents; ounce, 20 cents; ¼ pound, 50 cents; pound, \$1.60.

Stein's Flat Dutch A splendid strain of Early Flat Dutch cabbage that is a favorite with Texas market gardeners. A heavy yielder. Packet, 5 cents: ½ ounce, 15 cents; ounce, 25 cents; ½ pound, 60 cents; pound, \$2.00.

Danish Ball Head Ahandsome, hardy, late cabbage, thrirsitations. Heads medium sized, very firm and hard. A splendid cabbage for late planting. Facket, 5 cents; ½ ounce, 15 cents; ounce, 25 cents; ½ pound, 60 cents; pound, \$2.00.

Hastings' Emerald King A superb early cabbage. ard variety in many parts of the South. Early, flat, solid and of medium size and a sure header, giving splendid crops even in the hottest weather, as it does not burn or blister easily. Weighs 5 to > pounds. Packet, 5 cents; onnce, 20 cents; 1/4 pound, 50 cents; pound, \$1.60.

Succession Cabbage

Hastings' Selected Carrot Seed OUR PRICES INCLUDE PAYMENT OF FOSTAGE

Culture Carrots deserve a more general cultivation in the South than they now have. The young, tender roots are excellent stewed or boiled, ether alone or with meat, as well as for sea-

soning and flavoring soups.

Sow seed in shallow drills in early spring when trees are starting out. Make several sowings about a month apartso as to give a succession or p. When plants are well started thin out to 4 inches apart in the row. Sow in rich well manured soil worked doop. This is a deep-rooted crop and the soil should be prepared deep enough so that the roots can percerate without difficulty. Cultivate frequently, keeping your ground free from weeds and grass. Best make drills 16 to 28 inches apart to allow easy working. In Florida sow seed in September, October and November.

Chantenay This new stump rooted variety we consider the best of its class. It's a half-long sort, golden orange color. Roots 3 juckes in diameter at top, about 5 inches in length, gradually tapering in a very symmetrical manner to the base. Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 75 cents.

Red St. Valery Roots very smooth and regular in growth, of large size, from 10 to 12 inches throughout. Rich, deep coloring and free from hard core. A favorite with many of our customers, especially in sections subject to drouth. Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 70 cents.

Half Long Scarlet A favorite with market gardeners and for home use. Bright scarlet colo and of fine flavor. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 25 cents; pound, 75 cents.

Danver's Intermediate

Bright orange color, very smooth and finely for ned. Produces mo e weight to the acre than any other half-long variety. Packet, 5 cts.; ounce, 10 cts.; ½ pound, 70 cts.

Proved Long Orange alder property. Roots long and of a deep rich orange color. A very heavy cropper, so heavy in fact that it is profitable to grow for stock feed, although in quality it is a table carrot. Packet, 5 cents; ounce, 10 cents; 4 pound, 25 cents; pound, 70 cents.

Oxheart or Guerende This fine variety is the best of the shortened, thick-formed carrots. Roots are 4 inches wide at top and the fire a 2-inch diameter at bottom. Length from 5 to 6 inches. Roots are very free from hard core and of the firest quality for table u.e. Both skin and flesh are highly colored. Reing very short they are easily pulled from the ground, where the long sorts often have to be aug in heavy soil. Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 75 cents.

Large White Belgian—For Stock Feed Only

The value of root crops for stock is just beginning to be appreciated in the South. One can the most valuable is the Belgian Carrot, an immense cropper, having produced as high as 20 tons of roots per acre. In the Central South they are easily kept for feed all through the winter, while in the Lower South they can be left in the ground all winter and pulled as needed. The use of carrots in connection with dry feed helps keep the animals in good condition, and in milk or dairy cattle the flow of milk is largely increased. One thing must be remembered when large crops are wanted, and that is the crop must be fed by manure or commercial fertilizers in proportion. So with drills 3 feet apart using 4 pounds of seed per acre. When well up thin out the plants to 6 inches apart. They should be grown on land that has previously been cultivated and worked deeply. Give thorough cultivation throughout the season. Facket, 5 cents; ounce, 10 cents; 1/4 pound, 25 cents; pound, 50 cents; postpaid.

Collards

COLLARDS An old-time favorite and stand-by all over the South. It is well adapted to every Southern State, and is a species of cabbage which is not only very hardy, but a vigorous and continuous grower, producing a mass of leaves and, later in the season, a fairly good head. It is not in its best condition until to ched by frost. Seed can be sown in early spring at dup to a slate as August 1:t. When plants are 6 inches high t an plat to open ground setting them two feet spart in row. Cultivate like cabbage.

Hastings' Savannah Market Celery

Southern or Georgia Collards

This variety is the old-time favor e. Stands all sorts of a lyerse conditions without injury. Is very hardy, standing winter a ar North as Atla ta. In many places where the soil is too poor to grow cabbage, the collard grows casily and makes a good substitute for cabbage. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 25 cents: pound, 75 cents.

New White Head Originated from Buncombe cabbage. In cold wet winters it forms firm heads. Superior to the Georgia collard. Packet, 10 cents; ounce, 15 cents; 14 pound, 50 cents; pound, \$1.50.

CELERY Cannot be matured in the South in summer. Sow seed in April, May and June for maturing in cool fall months. months.

Savannah Market Our finest variety for general planting in the South on the lighter classes of both sandy and clay soils. Strong, vigorous grower, and will make a satisfactory crop where other sorts fail altogether. Large, solid and of first—lars flavor. Staks when well blanched are clear white and centers a light golden yellow. When quickly grown it is crisp and tender: making a fine appearance in market. Packet, 10 cents; ½ ounce, 15 cents; ounce, 25 cents; ½ pound, 60 cents; pound, \$2.00.

Mexican Solid Celery Stalks rounded, crisp and solid. Its flavor is full equal to that grown in the famous Kalamazoo (Mich.) celery district, having the rich nutty flavor so desirable in celery. Packet, 10 cents; ½ ounce, 15 cents; ounce, 25 cents; ½ pound, 60 cents; pound, \$2.00.

White Plume—Giant Pascal Old, well known varieties, preferred by many planters, Each: Packet, 5 cents; ounce, 15 cents; 1/4 pound 50 cents; pound, \$1.50.

Celeriac or Turnip Rooted Celery. It is mostly used for flavoring. Cultivate the same as for celery except that it requires no hilling up. Packet, 5 cents; ounce, 15 cents; ¼ pound, 50 cents.

Golden Self-Blanching-French Seed

A variety for market gardeners. Any but French grown seed of this variety is worthless. We import seed direct from criginator—Present 10 cents; 14 nunce, 20 cents; onnce, 35 cents; 14 normal, \$1.00; pound, \$3.50.

Georgia Roasting Ear Corn

SWEET AND ROASTING EAR CORN

Sweet and Sugar Corn can be grown successfully in the South, notwith. standing the general opinion to the contrary. It requires either richer ground or higher fertilizing than the field varieties. These conditions given you will have no trouble in growing it successfully, and the finer quality you get makes it well worth giving it the extra cultivation.

Culture The grains of Sweet Corn are shriveled and can not be planted quite as early as the field varieties. Leaves on the trees should be well out and the ground warm before planting. Make hills 21/2 to 3 feet apart each way. Drop 5 or 6 grains in each hill and thin out afterwards to 2 or 3 stalks to the hill, according to the richness of your soil. A continuous supply should be arranged for either by planting early, medium and late varieties, or else by making several plantings at intervals of 10 days. Any good garden soil will grow sweet corn, and no family that appreciates the best in quality can afford to be without at least a small patch of Sweet Corn.

Yexo Sugar, Earliest Sweet Corn The earliest, true sweet planting. Our own introduction; combines earliness and productiveness with the finest flavor. Produces 2 to 3 medium sized ears to each stalk; the cars being well filled with tender, sweet kernels. We recommend Yexo above all others to those who wish to combine earliness with best possible quality. Packet, 10 cents; pint 20 cents; parts 25 cents, posts. possible quality. Packet, 10 cents; pint, 20 cents; quart, 35 cents; post-paid. Peck, \$1.00; bushel, \$3.75.

The Country Gentleman Leading growers all clare this variety to be the best quality of all varieties of sweet corn. Our clare this variety to be the best quality of all varieties of sweet corn. Our own experience and that of several hundreds of our Atlanta gardeners confirm this opinion. It is one of the finest flavored and makes from 3 to 4good sized ears to the stalk when properly cultivated. Grains are small, much shriveled, but very deep. Cob very small. It matures in mid-season, just after Yexo, and just before Stowell's Evergreen. This, together with these two varieties make a splendid succession for family use, all of them being strong, productive growers, tender and of finest flavor. Packet, 10 cents; pint, 20 cents; quart, 35 cents; peck, \$1.25; bushel, \$4.50.

Stowell's Evergreen The standard main crop variand well filled. Under good cultivation it produces 3 to 4 ears to each stalk. Stalks large and strong. Grains of good size, long and deep; cob small and slender. This variety holds in good eating condition longer than any other and is adapted to all parts of the South for main crop. Packet, 10 cents; pint, 20 cents; quart, 35 cents; peck, \$1.00; bushel, \$8.75.

Adams' Extra Early Not a sweet corn, but usually classed with it. Valuable as coming in before any other variety. It is naturally small and unless planted in very rich soil and given high cultivation it will prove a failure. When properly grown it makes ears of fair size. Its greatest value is to the market gardener to bring in ahead of other sorts. Packet. 10 cents; pint, 20 cents; quart, 25 cents; peck, 85 cents; bushel, \$6.00.

Adams' Large Early Similar to Adams' Extra producing much larger ears. Hardier than any of the sweet cons and can be planted earlier. Has small stalks and can be planted close. More valuable for the market than for home gardens as this, as well as the Extra Early Adams, lacks the fineness of flavor found in the sweet varieties, neither are they sure croppers unless given the highest cultivation. Packet, 10 cents; pint, 20 cents; quart, 35 cents; peck, 85 cents; bushel, \$4.00.

Black Mexican Late, dark grained variety of finest quality for home use. Less subject to attack of bud-worm than other varieties. Packet, 10 cents; pint, 20 cents; quart, 35 cents; peck, \$1.00; bushel, \$3.75.

Georgia Roasting Ear "roasting ear" corn, something that will put corn on your table in about 60 days from planting, put in a few rows of this variety. A fair sized ear, fine in appearance and of good table quality. Stalks grow 5 to 6 feet high, ears set long on the stalk. Can be planted from earliest spring until August 1st. As a field crop it makes a full yield. Suitable for stock feeding. Packet. 10 cents; pint, 25 cents; quart, 45 cents; postpaid. Peck, not prepaid, \$1.00; bushel, \$3.75.

Yexo Sugar Corn

Hastings' Prolific Corn A splendid variety for use as roasting ears. Fully described and cents; pint, 30 cents; quart, 50 cents; postpaid. Peck, \$1.00; bushel, \$3.50.

Field Varieties These will be found fully described and prices given on pages 46, 47 and 48 of this catalogue.

Monarch White Rice Pop Corn Standard white grained variety with slender, finely, Let the children have a patch of it this year, furnishing them corn to pop during the long winter evenings. Packet, 10 cents; pint, 20 cents; quart, 35 cents; postpaid. Peck, \$1.25 by express.

Corn Salad or Fetticus
Large Green Cabbaging—This is used for
salad dressing during winter and spring. We
find it does best sown in drills 9 inches apart.
Packet, 5 cents; ounce, 10 cents; ¼ pound, 25
cents; pound, 75 cents.

Chervil

An aromatic plant, fine for seasoning er to use with lettuce for salad. Sow it broadcast in October and November for winter and spring use, and in February and March for symmer use. Packet, 5 cents; ounce, 15 cents; pound, \$1.00.

Cress

Water-Packet, 10 cents; ounce, 40 cents 1/4 Extra Curled Cressor Improved Pepper Grass

-Tastessame as Water Cress. Extra curled. Packet. 5 cents; ounce, 10 cents: 14 pound, 20 cents.

Hastings' Cucumber Seed

Culture Cucumbers are very tender and should not be planted until danger of frost is past and the ground becomes a little warm. It planted before this they should be protected. Plant in hills four feet spart each way. Where well rotted manure is obtainable work a large shoveful of it in each hill. Plant eight to ten seeds in each hill, and when plants are well up and have the rough leaves formed, thin out to four in each hill. Cover the seeds about 1/2 inch in clay and heavy soils, and one inch in light or sandy soils. The soil which covers the seed should be worked down fine so that there are no clods or lumps in it. When plants are young insects often injure them, and they should be watched closely. If insects appear dust the young plants with "Lice Killer." (See Page 28.) It is the best insecticide we have ever used. Keep the plants well cultivated up to the time they besin to run well, after that confine cultivation to pulling out any large weeds that may appear. Fruit should be picked off as soon as large enough for use, for if it is left to ripen and go to seed the plants case bearing. In this latitude (Atlanta) plantings may be made in June, July and August for late summer and fall crops. In Florida and along the Gulf coast, August and September plantings will be found profitable.

HASTINGS' WHITE SPINE FINEST EXTRAIN

For several years the cucumber growers of the South have been in trouble. The cucumbers wouldn't hold up in color. We at once set to work to obtain a deeper, darker color in the Hastings' White Spine and we now have the finest cucumber on earth for anyone who wants a dark green White Spine Cucumber, a dark green that will hold for days after the cucumber reaches the markets in Northern cities. The color is all right; it is the earliest; cucumbers average large size and under good cultivation produces no small or imperfect fruits. The skin is hard and holds up well in shipping. It is crisp and tender and retains its fresh, plump appearance long after being gathered. It has all the good points that a cucumber should have and none of the bad ones and will be found perfectly satisfactory by both market and have gardeners; a source of profit to the trucker who ships. Packet, 5 cents; ounce, 15 cents; 4 pound, 35 cents; pound \$1.25; postpaid. 10 pounds, not prepaid \$10.00.

Improved Long Green of good size, holding the dark green color till well matured. Crisp, tender and free from bitterness and fine for slicing. When 3 to 4 inches long they are fine for pickling. Good for planting at all times from early spring to late summer. Packet, 5 cents; ounce 15 cents; 1/2 pound 35 cents; pound \$1.25.

Early Fortune Cucumber

This is a recent introduction and is much like if by market gardeners in certain parts of Florida, as a variety for shipment to Northern markets, holding as it does its dark green color for many days after picking. Early Fortune is of a deep green color and don'tsh we up white color before maturing as do most of the old strains of the White Spine. Stays plump and fine looking after reaching markets north. It's a good shape, regular growth and an extra dark green color seldom found. Facket, 10 cents; ounce 15 cents; 1/4 pound, 45 cents; pound \$1.50; postpaid. 10 pounds not prepaid, \$12.50.

Early Frame Popular early variety for home gardens in the South. Medium size, good for slicing and, in its smaller stages, makes an excellent pickling variety. Good for home use and nearby markets only. Packet, 5 cents; ounce, 15 cents; 4 pound 35 cents; pound, \$1.25.

Fruits grow to extra large size, sometimes up to 15 to 20 inches in length. Skin is thin while the flesh is usually thick, the fruits producing but few seeds. Color light green with smooth skin. They are crisp and brittle, and have a very mild flavor. Especially good variety for light, warm soils. Packet, 10 cents; ounce 25 cents; ½ pound, 75 cents; pound \$2.00.

Seed Crop Short

and prices on Cucumbers are higher than in 1908.

Japanese Climbing Cucumber

This variety is a strong, vigorous grower. Vincs attain twice the length of the common varieties. The young plants are bushy, but as soon as they become well established begin to climb and may be grown on fences, poles or trellises, thus saving much valuable space in small gardens. With this cucumber the product of a given area can be increased three-fold. The fruits are 10 to 12 inches in length, of a fine green color; the fiesh is thick an t firm, never bitter, and fine for pickling as well as slicing. It is very prolifie, and the fruits being raised well above the ground, never suffer from wet weather or insects; vines are proof against mildew and continue hearing till late in the fall. (See illustration.) Cacket 10 cents; onnee, 20 cents 17 jound, 60 cents, peund, \$2.00.

Our Everbearing Cucumber This value has proved very useful on account of its ever hearing character-notice habit proved very useful on account of its ever hearing character—notice hadded for growth in illustration. The first cucumbers are ready very early; then the vines continue to flower and produce fruit continually until killed by frost, whether the ripe cucumbers are picked off or not, differing in this respect from all sorts in cultivation. A single vine will exhibit at the same time cucumbers in every stage of growth; the small ones being perfect in shape, of a fine green color, and just the right size for pickling. They are remarkably solid, with few seeds, and of very fine quality both for slicing and pickling. Packet, 10 cents; ounce, 20 cents; ¼ pound, 50 cents; pound, \$1.50.

Chicago Pickle This variety is one to grow for pickling purposes only. While they can be used when full grown for slicing, yet it is pre-eminently a pickling variety over the country. Its small size, dark green color and immense productiveness make it a favorite for that pur, ose. Packet, 5 cents; ounce, 15 cents; 4 pound, 35 cents; pound, \$1.25; postpaid.

Early Green Cluster Packet, 5 cents; ounce, 15 cents; pound \$1.25 cents

Gourds furnish many useful household articles, and are easily grown anywhere in the South. Care should be taken not to grow them near squash and pumpkins, as they cross easily and make the squash intensely bitter. They should be grown where they have a chance to climb on fences or trellises for best results. They are all good climbers and make good shades for porches.

Sugar Trough poses about the farm. With the top or neck sawed off it can be used for buckets, baskets, soap dishes, hens' nests or water dishes for poultry. Packet, 10 cents.

Japanese Nest Egg This small white fruited variety will give you a plentiul supply of durable nest eggs. They are light, and when properly dried resemble eggs very closely and are uninjured by cold or wet. Do not plant in very rich soil or the fruit will be too large. Packet, 10 cents.

The Dipper unexcelled, and there are but few who do not agree that water drank from a gourd *pper on a hot day quenches thirst as no other drink can. Packet, 10 cents.

Kohl Rabi Sugar Trough Gourd

The plants are quite hardy and seed may be sown in drills as early as the ground can be worked in good condition. When well started the plants can be set out like cabbages, 6 to 10 inches apart in the row.

Farly White Vienna-The balbs grow to the size of an apple when ready for use, and are of a pale whitish green, They are of delicate cabbage-like flavor. Per packet 5 cents; ounce, 20 cents; 1/4 pound, 50 cents; pound #1.75

Kohl Rabi

The Dishcloth The growth of this variety is smaller; with rich dark green foliage. The fruits resemble somewhat a very large cucumber and do not have the hard shell of the preceding varieties. They should be allowed to hang on the vines until well ripened, when the skin can be removed and the fibrous or sponge-like interior can be taken out, cleansed and dried. This is porous, tough, elastic and durable, and is highly esteemed for use in sponge baths and for dishcloths; Per packet, 10 cents.

Dandelion in Central South; in Florida in October and November. Does best in partially shaded location. Sow thinly in drills and thin out to 6 inches. Packet 10 cents; ½ ounce, 30 cents; ounce, 50 cents

In Florida and the Lower South

Egoplant seed should be sown in hot beds

in January and February. In this latitude the hot beds should be started between February 15th and March 15th. The seed will not germinate freely in a temperature of less than 65 degrees, hence the necessity of artificial heat early in the season. When plants have made the fourth or fifth pair of leaves they may be set in open ground; if danger of frost is past, 3 feet apart each way. Cultivate often, keeping them free from weeds and grass. In June and July seed can be planted in Florida for a fall and early winter shipping crop

Hastings' Improved Large Purple Thornless Eggplant

This variety is the standard for purity and excellence for Engplant in all the market gardening sections of the South. It is been grown for 15 years by market gardeners with profitable results and in the home gardens with entire satisfaction. Our seed is pure and the plants thornless. There is no crop we exercise to the plants there is no crop we exercise to the plants there is no crop we exercise to the plants there is no crop we exercise to the plants there is no crop we exercise to the plants there is no crop we exercise to the plants there is no crop we exercise the plants there is no crop we exercise the plants there is no crop we exercise the plants the pla t one show better results. In a properly cultivated crop streaked or off-colored fruit is almost unknown. Plants are large, strong and vigorous, each plant producing from 5 to 8 large fruits of dar. I'ch purple color. The earliest of all large fruited varieties and always gives satisfaction with proper cultivation, and the vigo-and strength of this variety makes it less subject to the effect of "Blight" and "dieback," which is so disastrous to this crop in so many sections. Packet, 10 cents; ½ ounce, 20 cents; ounce, 50 cents; ¼ pound, \$1.00; pound, \$3.75.

Early Long Purple Very early variety gardens only. Fruit 6 to 10 inches long and of good quality, agents, 5 cents; ½ cunce, 15 cents; ounce, 25 cents; ¼ pound, 75

Useful Gourds One packet each of four useful varieties on the farm-25 cents, postpaid-Sugar Trough, Japanese Nest Egg, Dipper and Disnoloth Gourds.

A Single Plant of Hastings' Everbearing Cucumber

Hastings' Improved Large Parrie Thornless Eggplant

Hastings' Drumhead White Cabbage Lettuce.

Hastings' Lettuce Seed

Lettuce is one of our great specialties and two varieties that we introduced, FLORIDA HEADER and DRUMHEAD WHITE CABBAGE LETTUCE, are now standard varieties in every Southern State. Our lettuce seed is grown for us in California by the best Lettuce Seed grower in the world and the crop is personally inspected during each growing season by our Mr. Hastings, so as to insure having nothing but the best.

Culture In this latitude (Atlanta) the seed can be sown in earliest spring, and sowings at intervals of two weeks should be made up to May 1st. Sowings can also be made in August, September and October for fall and winter use. In Florida and the Gulf Coast country sowings should begin in September and continue at intervals until Febru ary. The crop for shipment to Northern markets is sown between Novem ary. The crop for shipment to forthern markets is sown between social ber 1st and December 15th. For market use plant the heading varieties exclusively. These will also be found best for home use in m. st parts of the South. Seed can be sown in beds in January and transplanted to open ground by March 1st if desired. For open ground sowing, plant the seed thinly in drills as soon as ground can be worked in the spring. When well up begin thinning out until the plants are 8 to 10 inches apart each way. The soil should be rich and mellow and fairly moist. The size and quality of lettuce depends almost entirely on an unchecked, rapid growth.

Big Boston The standard market garden and shipping variety, grown almost exclusively in some sections. Extra large, round, firm-heading variety, and makes a good appearance in market. Our seed of this variety is grown for us by the best lettuce seed grower in the world and is pure stock. Packet, 5 cents; ounce, 15 cents; 4 pound, 35 cents; pound, \$1.25; 5 pounds, \$5.00.

HASTINGS' SEEDS SUCCEED

Drumhead White Cabbage Lettuce

One of our own introduction and especially valuable for home gardens and nearby markets in all parts of the South. We have known instances where single heads have weighed four pounds each. Heads always large and solid, usually weighing from two to three pounds. Leaves are very crisp, tender and free from bitterness. Outside leaves are light green; inside almost a pure white. It is resistant to hot weather and has but little tendency to run to seed. Fine for spring planting in all parts of the South. Packet, 5 cents; ounce. 15 cents: ¼ pound, 30 cents; pound. \$1.00.

Well-Known Lettuce Grand Rapids, Gate

Denver Market, Improved Hanson Tomhannock, Satisfaction, Prize Hanson, Tomhannock, Satisfaction, Prize Head, All-Year-Round, Salamander, B. S. Simpson, Philadelphia, Butter, White Paris Cos, B. S. Tennis Ball. Each—Packet, 5 cents; ounce, 10 cents; 4 pound, 30 cents; pound, \$1.00.

Hastings' Florida Header Lettuce-Stands Both Heat and Cold.

California Cream Butter Lettuce

Hastings' Florida Header Florida Header is one of our favorites. It stands the test of time. We have sold it for 13 years and it is now recognized as one of the leading varieties for either market or home use. No better variety exists for anyone who wants large, solid heads. It's a large variety, heading quickly, and is slow to run to seed. Very resistant to both heat and cold, rassing through severe freezes practically unharmed. It is crisp and tender and its fine appearance adds greatly to its selling qualities. In field tests it holds up over two weeks over Big Boston before running to seed. You make no mistake in planting Florida Header for either market or home use. Packet, 5 cents; ½ ounce, 10 cents; ounce 15 cents; ½ pound, 35 cents; pound, \$1.25; 5 pounds, \$5.00.

California Cream Butter Also known as "Royal" in open ground planting at all seasons in the South. Fine variety for market gardeners and shippers. Heads large and solid, the inside blanching to a beautiful cream yellow when properly grown. The pure strain of this variety can be distinguished by the small spots on the outer leaves. Our stock is strictly high grade and of the purest strain. Packet, 5 cents; ounce, 15 cents; 1/4 pound, 25 cents; pound, \$1.25.

New Lettuce, Dixie Hard Head In a visit to one of the California seed farms some years ago our Mr. Hastings was most favorably impressed with a new hard heading lettuce he saw there. It was such a hard header that it was very difficult to get it to produce seed. In recent inspection trips he he's been more and more impressed with its great value, both for the home and market gardener as well as the shipper. Tests of it have been made here in Atlanta, and it clearly shows its superiority over any other known variety for hardness of head and slowness to run to seed in the spring. On the California farms every head has to be cut before it will throw seed stalks.

In general character of growth and appearance it is much like the California Cream Butter, but is a much harder header, presents better appearance in market, and is slower than any other variety to run to seed. Heads large and solid. Seed supply very limited. Packet, 10 cents; % onnce, 15 cents; curree, 25 cent 14 pound, 75 cents, pound \$2.50.

KNOXEM --- Our Bug Killer That Kills

In this new insecticide we have what our customers have been calling for, a preparation that will destroy all the forms of insects which are most destructive to vegetable crops. This preparation is called "KNOXEM." and after watching its work on any crop intested with bugs or worms, that eat the leaves or bore into the fruits, you will agree that it is well named, for it certainly knocks them promptly and thoroughly, at the same time not harming tender plant growth. IT IS A BUG KILLER THAT KILLS.

Destroys Leaf-Eating Bugs and Cutworms "KNOXEM" is effective on all insects which cut the leaves, such as the striped potato bug (which is so destructive to potatoes, eggplant, etc.) the cabbage worm, the harlequin bug (found on cabbage and collard), beetles (destructive to beans). grasshoppers, crickets and many other forms of bugs and worms. For cutworms use "KNOXEM" as follows: Before setting plants in field, or after planting seed and before plants are up, take wet cabbage, turnip or collard leaves, dust one side of the leaf with "KNOXEM" and place them about the field or along the rows 15 or 20 feet apart each way. Be careful to place the dusted side down. Do this in the late afternoon, or in cloudy weather, and you will have no trouble from cutworms.

It Sticks to the Plants No insecticide on the market sticks like "KNOXEM" water. Then dust one side of it with "KNOXEM" and the other side with any other form of dry insecticide, kap the shingle on the edge three or four times. Now notice how much "KNOXEM" has stuck to the shingle, and how little of the other insecticide has stayed on. You will find that the "KNOXEM" has formed a coating of powder over the surface, and if there was any bug which had the habit of eating shingles, he would be dead mighty, soon after tackling that particular one. Let the shingle get thoroughly dry, and then rap it again. You will find that "KNOXEM" will stay there, while the other insecticide will come off clean. The same thing happens when "KNOXEM" is dusted on a leaf wet with rain or dew. It is there to stay, and after the leaf is dry it still keeps a coating of "KNOXEM" ready for the first bug that comes along. No other insecticide made will had go ne like "KNOXEM."

Goes Twice as Far and Distributes Better It goes twice as far as pound of "KNOXEM" gives almost twice the bulk of any other standard insecticide. That means that a pound of "KNOXEM" will cover twice as much surface. Every ounce of "KNOXEM" is effective. It is not made up of 99 parts of cheap heavy filler, and one part insecticide. Everything put into its manufacture has a distinct part to play in making it effective, and adds some distinct quality to it. It distributes better than any other insecticide. Most insecticides are so heavy that they are difficult to distribute evenly. "KNOXEM" is both heavy and light. It is heavy enough to get right down into the cracks and crevices of the leaf, and has a peculiar lightness that gives a perfect distribution.

Very Easily Applied It can be dusted over the plants by being shaken over them from any way you find easiest. Apply when there is no wind and plants are wet with dew or rain. Dust the plants thoroughly. Wherever "KNOXEM" strikes a wet leaf it sticks, and whenever a leaf-eating bug strikes "KNOXEM" be dies. The man with the family garden, or the man with 50 acres in truck both need "KNOXEM" to protect themselves against loss from insects. Order it with your seeds, and have it on hand for use when needed. In applying, dust it on very lightly. Don't use too much.

Our Plant Lice Killer

The plant lice or Aphides are not leaf-eating bugs and require a special insecticide which is known as "PLANT LICE KILLER." Knoxem is for leafeating bugs and is not effective on the plant lice or aphides so destructive at times to young vegetable plants, such as cabbage, melons. etc. When the lice appear on the young plants dust thoroughly with "LICE KILLER."

50 pounds, \$3.75.

To any express office reached by the SOUTHERN EXPRESS Co. we will ship a 3-pound box. charges prepaid, for 60 cts., a 5-pound box. charges prepaid, 85 cents: a 121/2 pound box, charges prepaid, \$1.45.

To any express office on the line of the Wells-Fargo. American or Pacific Express Companies, we will send all charges prepaid, as follows: 3-pound box, charges prepaid, 60 cents; 12/2 pound box, charges prepaid, 90 cents; 12/2 pound box, charges prepaid, \$2.00.

Iceberg; Lettuce

Iceberg

One of the most beautiful varieties we have ever grown. Very ornamental as well as being an exceedingly crisp, tender variety, growing a long time before running to seed, being equal to Florida Header in that respect. Known as a "crisp" leaved variety, and is hard header. Splendid for open ground planting or for forcing under glass in winter. Heads of conical hape and medium size. Heads tightly folded and blanch to a beautiful white. Outer

leaves light green, growing closely up around the head. Packet, 5 cents; ounce, 15 cents; 1/4 pound, 35 cents; pound, \$1.25; postpaid.

Hastings' Superba A most beautiful, solid, large heading, heat-resisting variety. It is superb Outside color light green, becoming more yellow toward the center. Heads large and solid, and for crispness and tenderness it is perfect. Its heat-resisting qualities are wonderful, standing for a long time in the hottest summer sun without running to seed. Packet, 5 cents; ½ ounce, 10 cents; ounce. 15 cents; ½ pound, 35 cents; pound, \$1.25.

ENDIVE A hardy salad plant, similar to lettuce. Sow in open be worked, thinning out afterwards to 8 or 10 inches apart. When good size, leaves should be tied up to blanch centers properly. Early Green Curled is the best variety for the South. Packet, 5 cents; ounce, 15 cents: 14 pound, 40 cents; pound. \$1.25.

LEEK The culture of leek is very similar to that of onions and should be planted as early in spring as the ground can be worked.

Large Carenten—The broad, flat leaves grow to large size, and stems are proportionately large and thick. In rich soil, well earthed up, the edible portion is from 6 to 8 inches in length by 2 to 3 inches in diameter. Per packet 5 cents; ounce, 15 cents: ¼ pound, 40 cents; pound, \$1.25; postpaid.

Hastings' Superba-The Great Bio Lettuce

KALE OR BORECOLE

Kale is more hardy than cabbage and will stand through the entire winter in any ordinary season in the central and lower South. It is much improved in quality by being touched with frost. Of all the cabbage tribe this is the most finely flavored, and it would be more generally grown were its good qualities more widely known. The tall varieties should be sown thinly in drills in August and September, the dwarf sorts one month It is a favorite vegetable to furnish "greens" in the South during winter and spring, and for that use there is nothing better.

Farly Green Curled—Also variously known as "Dwarf German," "Dwarf Curled Scotch" and "Siberian." This is the variety usually sown in the fall for spring use. It is rather low growing, with fine, curly leaves of deep green color. The young leaves are tender and delicate in flavor. Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 70 cents.

Tall Green Curled Scotch—Tall growing, very ornamental va. y. Packet, 5 cents; ounce, 10 cents; 1/2 pound, 25 cents; pound, 70 cents.

Muskmelons or Cantaloupes

Hastings' Famous Rocky Ford Cantaloupe

Hastings' Famous Rocky Ford The Very Best Seed Grown!

Rocky Ford is our most popular and profitable early variety of cantaloupe for the entire South, for shipping, for market, and for home use. It's the best all-round good flavored early melon. It's the earliest and just the right size for market use. Regularly ribbed, finely and thickly setted and has very thick, green flesh of the finest flavor, when rightly grown.

There is no seed crop that we sell in which we take more care in the production of first-class seed than with our Rocky Ford Cantaloupe. The yeary closest inspection of the growing crops are made all during the growing season and every melon that does not come up to our standard in size ing season and every melon that does not come up to our standard in size and shape is destroyed so that none but seed from perfect melons is saved. This careful selection has gone on for years and that's why our Rocky Ford Cantaloupe seed give entire satisfaction. The greatest possible care is taken to get seed only from perfect specimens of the right size, and it you plant Hastings' Rocky Ford you will not be disappointed in your crop. This carefully selected Colorado grown Rocky Ford is just what you need. It is grown exclusively for seed rurposes. We handle none of the thousands of pounds of Rocky Ford that is on the market, gathered up from Colorado and Southern shipping crops. Ours is seed grown for seed purposes and not the cheap refuse from culls. Our seed makes your successful crops—crops that put money in the bank for you. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 30 cents; pound, \$1.00; postpaid. 10 pounds or more, not prepaid, 80 cents per pound.

A Word of Advice to Shippers

There is about as much humbug in this Rocky Ford Cantaloupe seed as in anything that has come up in recent years. The worst of-fenders are some Northern commission houses who lead the shipfenders are some Northern commission houses who lead the shippers to believe they have something especially good in cantaloupe seed. They tell you of buying up entire crops at Rocky Ford and "saying seed." This may or may not be true. This seed is sold to growers at prices ranging from 20.00 to \$1.50 per pound. Cu Mr. Hastings has inspected or grown from this \$1.50 commission house seed, in Georgia, Texas and California the last two years. It ranges from 20 to 50 per ceat, mixture and off type. We would be ashamed to sell such seed at any price. Cur Rocky Ford seed is right, our price is right and your crop will be right if you plant it.

How to Grow Them

These melons do best in light, warm soils that are well supplied with decayed vegetable matter or humus. Heavier soils can be put in good contition tor this crop by previously growing crops of cow peas, rye; etc., and turning the crop under. This not only furnishes decaying vegetable mater, but loosens up the stiff soil, giving the roots a chance to penetrate deeper and resist drouthy conditions. The quality and flavor of these melons depends largely on the conditions under ons depe ds largely on the conditions under which they are grown. Wet weather makes an excessive growth or vine and deteriorates the

Plant seed in spring as soon as leaves are well out on the trees. Make hills 5 to 6 feet a art each way. Put in each hill 2 shovelfuls of well retted way. Put in each hill 2 shovelfuls of well retted stable manure or compost, working in well down and covering with 3 or 4 inches of fine top soil. Plant 10 to 12 seeds in each hill to make sure of a stand and to allow for injury by insects. If insects are bad dust the young plants with "Plant Lice Killer." When plants have formed rough leaves and are ready to run, thin out to 2 plants in each hill. Work the soil frequently until the plants begin to run, after that pull up weeds by plants begin to run, after that pull up weeds by hand. In sections where well rotted stable man-ure is not obtainable use from \(^3\)4 to 1 pound of some good commercial fertilizer to each hill well worked in so that the seed when planted does not come in contact with the fertilizer.

Extra Early Hackensack

Crop very short. One of the best varieties for home use and nearby markets, but too large for shipping. Good size, 3 to 5 pounds; extra fine quality. Meat thick and rich, spicy flavor, skin densely netted. Packet, 10 cents; ounce, 15 cents; 4 pound, 35 cents; pound, \$1.25.

Early Jenny Lind

A small sized extra early, most deliciously flavored cantaloupe. Introduced many years ago and has always been a great favorite for family use wherever it has become known. Well adapted to all the Southern States and is one of the most prolific rantaloupes grown. Packet, 5 cents; ounce, 10 cents; 14 pound, 25 cents; pound, 75 cents; postpaid.

VERY SHORT SEED CROPS

We have had another very bad year for seeds of cantaloupes, cucumbers, etc. Some varieties have produced only 10 per cent. of a crop, hence prices are higher than usual.

Improved Citron Nutmeg Another of the best fla slightly flattened, early cantaloupes. It is especially good and is noted for its rich, spicy flavor so desirable in cantaloupes. It is a "quality" melon especially desirable for home use and nearby markets. Will not stand shipment. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 3.) cents; pound, \$1.00.

Montreal Market One of the largest varieties and the finest flavored and spiciest of all canta loupes. Requires better attention than most varieties in the South, but its superior quality makes it well worth the extra trouble. The melons frequently weigh 8 to 10 pounds each. Packet, 10 conts; ounce, 15 cents: 14 pound, 50 cents; pound, \$1.50.

Early Netted Gem

Identical with Rocky Ford in every respect except in shape, which is almost globular. Melons very uniform in size, regularly ribbed and heavily netted; are extra early with thick green flesh of the fine-t flavor. Fine for either home use or ship-ping. Packet, 5 cents: ounce, 10 cents; 1/4 pound, 30 cents; pound, \$1.00;

Early Netted Gem

Texas Cannonball Cantaloupe

A splendid cantaloupe of Texas origin. Comparatively early, of medium size, and flattened rounded shape. In flavor it is first class. Very densely netted, in fact its dense netting makes it almost sun and insect proof, and this is an immense advantage where insects are troublesome and the melons are liable to sunceald. Is almost solid, having a very small seed envity. If you have found it difficult to grow the other varieties, try Cannonball. It succeeds where other sorts fall entirely. Packet, 10 cents; ounce, 20 cents; 1/4 pound, 50 cents; pound, \$1.75, postpaid.

Ponce de Leo n Canta our e

WHAT SOME PLANTERS SAY ABOUT THE SEEDS THEY BOUGHT FROM US. HASTINGS' SEEDS SUCCEED.

Ponce de Leon

A favorite second early large size melon for home gardens. Flesh is very tuick, green and of most delicious flavor. regularly ribbed and densely netted, Skin is green but turns to a beautiful golden yellow when ripe. Packet, 5 cents; ounce, 15 cents; 4 pound, 30 cents; pound, \$1.00.

The Banquet A splendid of the Banquet A splendid the South, of medium size and perfectly round shape. Its skin is densely netted over the entire surface, making it very resistant to the attacks of insects such as the borer; it is prolific and of the best foliage of this variety is

Texas Cannonball Cantaloupe heavy and dense, shading the melons almost entirely and preventing sunscald. It is almost insect and sun proof. It is a most excellent all-purpose variety for the South. Packet, 5 cents; ounce, 15 cents; y pound, 50 cents; pound, 51.50.

FLOWER SEED FREE! Do you want some of them? If so see page 7 of this catalogue.

Clarence O. Kaiser, Fayette Co., Texas, writes: "Thanks for promptness in filling my order. They arrived yesterday and are better than I expected. You give about twice as muc i for the same price as I can get here and from what I have seen of your seeds growing in several of my friends' gardens, I know the quality is O. K."

David A. Hall, DeKalb Co., Alabama, says: "I garden. I don't think your seed can be excelled. "I used your seed last year, both field and

W. A. Harrison, Caddo Parish, Louisiana writes: "Had better luck with seed bought of you than I ever had. I made better cabbage, better turnips, in fact everything did better."

H.O. Rockley, Lee Co., Georgia: "I made a fine crop of onions (Bermuda and Crystal Wax); had one acre of them set and sold a car load at 2 cents per pound on the track. Same land is now making me a bale per acre in cotton. There was not a scallion in my onion crop,'

C. Hickerson, Madison Co., Mississippi: "It may interest you to know that I took First' Prize at the Mississippi State Fair, held at Jackson, on your Redfield Beauty Tomato. They averaged 12 to the basket, which I consider pretty good for a crop in November."

SOUTHERN GROWN WATERMELONS

THE ONLY KIND THAT'S FIT TO PLANT

FACTS ABOUT WATERMELON SEED

Outside of our specially grown watermelon seed there are three general sources of supply of watermelon seed for the seed trade of the United

First is seed from Kansas and Nebraska. This seed is grown on rich prairie soils forcing a rank growth of vines and rapid growing, interior tasteless melous. The growing season is short, a large part of the melons never matric. The seed is saved from everything, big, little, perfect and imperfect, matured melons and half ripe ones with hard centers. Like product the contraction of the contr duces like, and almost in every instance where we have investigated cases of watermelon crops having what we know as hard centers the seed has come from seedsmen who obtain their supply from these Western

A second source of supply is from the Southern States where crops are A second source of supply is from the Southern States where crops are grown for seed purposes, but seed saved from everything, large and small, perfect and imperfect. We have seen crops of this kind where seed were being saved from melons weighing not over two pounds, most of them diseased and rotten ended. Many Northern houses are using the latter seed and have been for years. They can buy and sell it at a cheap price, but you don't and can't expect to get good melons from seed saved like that. Every cent saved by purchaser of the seed costs him dollars in the crop grown from it.

The third source of supply is the worst. In Florida and Georgia there are thousands of acres of watermelons planted every year for shipment to the Northern markets. The shipping season is a short one and usually about half the melons produced are shipped, and this part shipped is always the pick of the patch. The small inferior melons, the 'calls,' are left. After the shipping season is over gangs of men go through the fields and seed is saved from everything that is left. Every melon fit to save seed from the shipping season is over gangs of the patch. has been shipped and seed is saved only from melons that should have been used to feed the hogs.

Hastings' Wa ermelon Seed is from crops grown exclusively for seed

purposes in the South. Every plant is grown from selected stock seed. Crops are given highest culture. Not a melon is sold or shipped. In seed saving none is taken from imperfect melons or from melons weighing less than 15 pounds. Seed is saved only from the best melons and we feed hog-en what most every other grower gets most of his seed from.

HOW TO GROW GOOD MELONS

The South is the home of the waterington, and every one wants to grow it to perfection. There is nothing the limitage the place of a large, sweet, juicy watermelon on a hot summary and our special strains of Southern grown melon seed should be the something especially good is wanted.

Melons do best in a rich sandy loam soil, but where this is not obtain-

Melons do best in a tich. sandy foam soil, but where this is not obtainable they can be grown on clay lands on warm sunny hillsides. The best feetilizer is well rotted stable manure. The hills should be 8 to 10 feet a part each way. Plow deeply and cultivate thoroughly, reducing the soil on fine condition. By deep plowing we mean 10 to 12 inches. Watermelons do not root very deeply, but they do spread. In applying fertilizer spreadit to a considerable distance, say 3 feet out from the center of each hill. It is well to encourage this natural tendency to spread the roots. Where it is necessary to use commercial fertilizer use one as near the following formula as possible: Nitrogen, 3 per cent.; Potash 8 per cent.; Phosphotic Acid (available), 8 per cent. This formula has given best results on melands. Use from 2 to 3 pounds of the above formula to each hill, working it in and mixing it thoroughly with the soil. This should be done 10 days to 2 weeks before the seed is planted. First plantings can be made us soon as soil gets warm in the spring, and succession plantings can be made up to June in this latitude. Thant 8 to 10 seeds in each hill, thinning out after the rough leaves have formed to the 2 strongest plants in each hill. Cultivare June in this latitude. That 8 to 10 seeds in each hill, thinning out after the rough leaves have formed to the 2 strongest plants in each hill. Cultivate lightly until runners come out well into the middles. If large weeds come up, cut them off. Do not pull them up, as it disturbs both the roots and the vines. The vines after they begin to run should never be moved or disturbed. It always injures the crop. When there are plenty of blooms on the plants pinch off the ends of the runners. Where extra large melons are desired larve only 1 plant to each hill and only 1 or 2 melons to each vine. Insects are sometimes troublesome to the young plants before they begin to run. Dust plants with our "Plant Lice Killen." (See page 23).

It is useless to try to grow good melons from any seed except carefully selected Southern grown. If you have Hastings' melon seed you will not disappointed in your melon crop. Our prices on melon seed are higher than most houses. It is strictly a case of difference in quality. Over half the melons grown in any crop are unfit, in our opinion, to save seed from and we throw them away so far as seed saving is concerned. Our seed will make good wat rmelons, melons worth eating.

HASTINGS' WATERMELON SEED

Is Strictly Southern Grown and Saved from Crops Grown Exclusively For Seed. All Seed Taken from Selected Melons Only. No Melons Sold or Shipped from Our Crops

Hastings' Augusta Rattlesnake Watermelon.

Augusta Rattlesnake

This is the variety that made Georgia famous as a melon growing State. No place in the world produces such melons as the Rattlesnake grown in certain sections of Georgia. No one has such pure seed of the famous variety as ourselves. It is simply perfection. Every seed of it is taken from melons weighing 30 pounds or over and 60 to 70-pound melons are nothing unusual in our crops. If you have been buying -eed of "Georgia Rattlesnake" as usually sold you don't know hos good the Rattlesnake melon is. The melons grown from our seed of this are so fine that they can not fail to give you entire satisfaction, We consider 'Augusta Rattlesnake' the best second early melon there is. Plant some of it this year. Packet, 10 cents; ounce, 15 cents; ½ pound, 35 cents; pound, 35.25; postpaid. 10 pound lots or over, not prepaid, \$1.00 per pound.

Florida Favorita

Our special selection and growth of Florida Favorite has given us an unsurpassed extra early, good quality, medium sized melou, just the right kind for home use and near-by merkets. It salarge, smooth, beautifully shaped melon, of dark green color, irregularly striped who lighter green, very early and prolific. Rind of medium thickness, rather tough, making it a good shipper. Flesh red, very erisp, tender and juicy. Seed white. It stands up well in hot weather, and is one of the surest cropers. Its long shape makes it very desirable for all Southern markets. For home use it is excellent. Select seed, none saved from melons weighing less than 20 pounds. Packet, 5 cents; ounce, 10 cents; 1/2 pound, 30 cents; pound, \$1.00; postpaid. In lots of 10 pounds or over, not prepaid, 80 cents per pound.

Seminole

Another extra early, fine quality melon from Florida. Long snape, melons both green and gray in color. Size large to extra large and vines very productive. A favorite where known. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 25 cents; pound, 75 cents.

Hastings' Felected Florida Favorite Watermelon.

A Kleckley Sweet Grown by Mr. Kleckley.

Kleckley Sweet

The Kleckley Sweet is one of the most popular carly melons grown in the South. No melon has ever before attained such popularity in so short a time for home use and near-by markets. It's a perfect melon for that purpose. Its eating qualities leave nothing to be desired. Vines are strong and vigorous, and melons are medium to large in size. Oblong form as shown in our illustration taken from a photograph of a specimen melon grown by Mr. Kleckley, the originator. Melons grow from 8 to 24 inches in length and 10 to 12 inches through. Skin is a very rich dark green, making a most handsome appearance. Flesh is rich bright scarlet, ripening up close to the skin, the rind seldom being over a half inch in thickness. Seeds white and so arranged as to leave a much larger proportion of heart than in other melons. The rich scarlet flesh is crisp, extra sweet and melting, being entirely free from stringiness. It is, beyond question, one of the best early table melons in existence today. Our seed which we offer is grown from selected original stock furnished by Mr. Kleckley, the originator. It is grown here in the South, and seed saved only from selected melons. Packet, 5 cents; ounce, 10 cents; ½ pound, 30 cents; pound, \$1.00; postpaid. In 10 pound lots or over, not prepaid. 86 cents per pound.

Alabama Sweet, the Great Southwestern Melon

The True Texas Strain

We want to assure everyone to whom this cata logue goe- that we have got the genuine Texas-Alalogue goes that we have got the genuine reassonabama Sweet and to the best of our knowledge we are about the only large seed house that has obtained the genuine seed and grown seed crops of it. It took a special trip to Texas to get what we wanted in the way of stock seed, but we got it and we can assure you that no one will make a mistake in planting our Alabama Sweet for citier home use, market or shipping. It's an all right melon for anyone who wants a spendid combination melingo d for any or all purposes. In shape it is almost like the Florida Favorite, but averages larger and in its markings resembles that variety closely but is sligntly darker. Its general appearance is such that it sells on sight either in Northern or southern markets. Its eating qualities are of the best. In ripening it is extra early, one of the earliest medium to large size melons we have ever seen. Flesh scarlet, very fine grained, solid and free trom stringine.—
In most parts of Texas where this melon is well k own it is grown almost exclusively for home and market use as well as for hipping. Packet, 5 cents; ounce, 10 cents; ¼ pound, 30 cents; pound, \$1.00; postpaid, 10 pound lots or over, not prepaid, at 80 cents per pound.

Alabama Sweet, the Great Southwestern meion

Hastings' Watermelon Collections For Southern Home Gardens

HASTINGS' BLACK DIAMOND COLLECTION (7 Packets, 25c)

ONE full sized packet each of Black Diamond, Kleckley Sweet, Augusta Rattlesnake, Duke Jones, Hastings' Tinker, Florida Favorite and Alabama Sweet, all specially good varieties for 25c the home garden, postpaid, for = =

Mammoth Iron clad Of immense size, hardsomely marked, oblong in shape, fiesh bright red and very solid, heart large and very delicious. The rind, while very thin, is remarkably hard. It is a heavy yielder, and one of the very best: Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 85 cents; postpaid.

Big Empire State.

Hastings' Big Empire State, introduced by us in 1902, is the best big watermelon introduced in 20 years. It was first discovered in one of our seed crops of Triumph in 1898 and we were so struck with its great value for the South that we had it carefully grown for several years and selected for size and quality. In 1902 we distributed 25,000 packets to our custon ers in all the Southern States and although it was one of the hottest and drivest years ever seen some of the yields were one of the hottest and dryest years ever seen, some of the yields were remarkable. After growing this melon, Mr. Albert D. Rust, of Colorado county, Texas, wrote us: "The two melons (Empire State) weighing respectively 59½ and 62 pounds were the largest at the meeting of the Farmers' congress. Altogether 25 people ate all they wanted and not more than one-half was eaten."

If you want to grow the biggest melon, plant our Empire State. You won't be disappointed. In size it is equal to the best strains of Trlumph, the original vine grown on rather, poor, dry, sandy soil producing three melons weighing 51, 51½ and 54 pounds respectively. It is the very best large, medium early melon ever placed on the market In shape it is slightly oblong as shown in our illustration and very thick through. Color is a very dark green. Flesh is bright red, It is a strong, vigorous grower; resisting insect attacks and disease and matures in about 100 days in fovorable seasons. Seads white with slight strong, vigorous grower: resisting insect atlacks and disease and matures in about 100 days in favorable seasons. Seeds white with slight dark markings. Melons run from large to very large, weighing from 40 pounds upwards; in fact anything less than 40 pounds is a rarity when properly cultivated. It has very few seeds, less than we have ever seen in any other melon. It's all firm, solid flesh. Plant Emptre State and you will not regret it. Packet, 10 cents; ounce, 15 cents; ¹⁴ pound, 40 cents; pound, \$1.25; 10 pounds or over, not prepaid, \$1.40. per pound.

AN 85 POUNDER IN TEXAS
"I have been planting your seeds for years and find all of them food. Last year was one of the dryest years the West has experienced in a long time, still I raised Empire State watermelons that weighed 85 pounds without irrigation.

W. T. COLWELL, Martin Co., Texas

HASTINGS' 4-OUNCE WATER-MELON COLLECTION (4 Ounces) 25 Cents)

ONE ounce each of Florida Favorite, Augusta Rattlesnake, Hastings' Tirker and Alabama Sweet, each one a 25c splendid home garden variety, postpaid, for

Augusta Round White A very early Southern melon mature ing some three weeks earlier than varieties such as Rattlesnake. Earlies thome use melon. Rind tender, desh bright red, sweet, crist, and of good flavor. Shape round, color of rind almos white. Packet, 5 cents; ounce, 10 cents; 1/2 pound, 25 cents, pound, 80 cents

dastings' Big Empire State Watermelon

Hastings' Tinker, the Sweetest Watermelon

Hastings' Tinker Watermelon

For home Use and Nearby Markets Only—Our Tinker is the sweetest melon grown, without exception, and should be in every garden in the bouth. We first discovered this melon in the hands of a local market gardener near St. Augustine Florida, where it brought double the price of any other variety. We introduced it under the name at Tinker, but several years later we found it in another part of Florida and locally known as "bradford." Since that time other firms have renamed it several times. It is a melon for home use and nearby markets only. It will not stand shipment even for short distances. Color dark green, heavily striped with lighter shades of green. Rind very brittle, breaking easily. Flesh a bright scarlet, crisp, tender and melting. Its sweetness can not be compared with any other variety. It has a decided sweet flavor all its own and it can not be fairly compared with the taste of other sorts. It has more of the delicious, rich flavor of honey than anything else. Melons are extra early but of rather small size, seldom exceeding 30 pounds in weight. Southern grown seed. Packet, 10 cents; ounce, 15 cents; 4 pound, 30 cents; pound, \$1.00, postpaid.

flee Cream or Peerless True White-Seeded, Flavo flesh solid and of rich scarlet color, seeds white. Form is oblong, the rind is quite thin and dark green in color. Packet, 5 cents; ounce, 10 cents; 4 pound 55 cents; pound, 70 cents.

Duke Jones A superb Southern variety originating to north Florida, of good quality and a most popular shipper, far superior to the old Kolb Gem. Has thin, tough, dark green, rind; bright red flesh and light colored seed. Eating quality good. Slightly oblong shape and very thick through; very regular in shape and size. Makes fine appearance, ships well in car lots; is early and makes a desirable variety for all Southern growers, especially shippers. See saved from melons weighing 20 pounds and over. Packet, 5 cents; ounce, 10 cents; 4 pound, 25 cents; pound, 70 cents, postpaid. 10 pounds, not prepaid, \$5.00.

Hastings' Black Diamond

make good.

Black Diamond

Our illustration, taken from a photograph, is a good representation of this splendid variety on a small scale, but it gives but a faint idea of the beauty of this melon. It is very vigorous, and is earlier than any standard variety. It is immensely prolific, one melon grower loading five cars from five acres of it and then had

Eden, the Great New Shipping Watermelon

Georgia Sugar Loaf An old-time, favorite Georgia greenish white melon, with crisp, tender red flesh and a very thin rind Grows to an immense size under proper cultivation, a whole market wazon load often running up to an average of 60 pounds in weight. It's a quick seller in Southern markets wherever it is known. It originated in Southerstern Georgia; is a beauty to look at and a delight to eat. We have a limited amount of seed of special growth which we will supply as long as it lasts. We have selected this variety very carefully for the past four years, and it is now practically the same as the original old-time variety that was such a favorite. Packet, 10 cents; ounce, 15 cents; 4 pound, 30 ceuts; pound, \$1.00; postpaid.

Blue Gem, Gloussier or Iceberg This is really a "Blue Kolb Gem" and is far better than that famous variety for the shipper. There is no strictly pure stock of the old Kolb Gem in existence and this is the only variety along the lines of the old Kolb Gem that we have. We can a sure our customers that the Blue Gem is fully equal to Kolb Gem in every respect and in many respects superior. It is of dark bluish green color, very uniform in size and shape, crimson flesh fair table quality and shows up well in bulk in the cars. Melons average a little larger than Kolb Gem. Packet, 5 cents; ounce. 10 cents; ¼ pound 25 cents; pound, 75 cents. 10 pounds, not prepaid, \$5.00.

EDEN, The Great Shipping Melon

The Eden is comparatively a new melon that is grown by many of the largest Florida and South Carolina growers. In our opinion it is a most valuable and desirable variety for shipment. In appearance it resembles Kolb Gem very closely. Is equal to that famous shipper in standing long distance shipment, but has white seed with crisp flesh, almost equal in quality to the Rattlesnake and is about the only reall: sweet tasting early melon ever put on the markets in New York and other eastern cities from the South. Its fine eating quality, now that it is known, makes it command a much higher price than the others, and the Eden, because of its fine eating quality, will undoubtedly extend the market for melons from Florida. Georgia and the Carolinas. One grower planted 1500 acres of Eden last spring. We consider it one of the best shippers ever introduced. Packet, a cents: ounce. 10 cents: 4 pound, 25 cents; pound, 80 cents purposed.

Arkansas Traveler

A large, long, weighty melon; always solid, the edible portion extending within half an inch of the skin. Seed variable in color and small, ri. ening as an intermediate in color of flesh it is deepest red, in texture crystalline, in flavor sugary. The flesh is solid throughout, without any sign of either core or eavity, and the edible portion extends to within half an inch of the skin. Fine fir late plantings to mature in August and September. Packet, 10 cents; ounce, 15 cents; ½ pound, \$1.25.

The Philip Jones

This big melon originated with the late Philip Jones, of Burke county, Georgia, and is known under both the name of Jones and Philip Jones melon. Color of the skin is a solid, dark green and the flesh is a very bright red, being particularly sweet, juncy and melting and free fron stringiness. In shape it is almost round and has the peculiarity of almost always lying on the blossom end while growing. Melons average large to very large, often weighing 70 to 80 pounds. Its eating quality is superb. For home use it is very good and for nearby markets it is an easy seller at good prices. Packet, 5 cents; ounce. 15 cents; ½ pound, 35 cents; pound, \$1.00, 1

The Arkansas Traveler Watermelon

Triumph One of the largest melons of all. Its size is immense, whole fields often everaging 50 pounds or over. Shape slightly oblong, and skin of a dark glossy green. Flesh red with black seeds. Quality poor, flesh being stringy and of poor flavor. A splendid shipper, its tough, thick rind making it almost impossible to break it. The largest melon grown of this variety weighed 159½ pounds. We can not advise any one to plent it for home use or nearby markets, but for shipping it does well. Southern grown seed. Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 75 cents; postpaid. 19 pounds, not prepaid, \$5.00.

Jordan's Gray Monarch Very large, skin a mot long, flesh bright crimson, sweet and delicious. A fine shipper. Packet, 5 cents; ounce. 10 cents; ¼ pound, 25 cents; pound, 75 cents.

Citron—Green Giant For preserves. Do not plant near watermelons. Packet, 5 cents; ounce, 10 cents; ½ pound, 20 cents; pound, 70 cents.

HASTINGS' GEORGIA GROWN OKRA

Okra or Gumbo is a most healthful vegetable and ought to be in every Southern garden. In our seed growing here in Georgia we have developed two splendid varieties which are the best we have ever seen. Our strains of the Perkins' Mammoth and White Velvet are unequaled.

Perkins' Mammoth Long Podded This distinct green podded okra is by far the best for market and shipping purposes, being used by the Florida shippers almost exclusively to grow for market. We

have greatly improved original strain as introduced by us and now its productiveness is simply wonderful, the pods shooting out from the bottom of the stalk within three inches of the ground, and the whole plant is covered with them to the height of a man's head, five to six feet. The pods are an intense green in color, of unusual length, nine to ten inches; very slim and do not get hard as is the case with other okras. Packet, 5 cents; ounce, 10 cents; ½ pound, 20 cents: pound, 60 cents; postpaid. 10 pounds, not prepaid, \$4.50.

Hastings' White Velvet Okra

A standard variety throughout the South for home use and local markets. We have a specially fine early strain of this variety, with

medium size round, smooth pods, free from ridges, and not prickly to the touch. This strain of White Velvet we find to be the best of all the white varieties. Packet, 5 cents; ounce, 10 cents; y pound, 20 cents: pound, 60 cents: postpaid.

Make
3 Bales
of
Cotton
Per Acre

Perkins' Mammoth Long Podded Okra

MUSTARD (For Salad)

CULTURE—Sow in any good garden soil thickly in drills 16 inches apart. Give clean culture, keeping free from grass and weeds. Leaves are large enough to use as a salad in from four to six weeks from sowing, and can be cut all through the winter. Sow from August to April. Very hardy in the South.

Finese Mustard—(True Stock)—We have sold this variety from China for a number of years. It is much superior to the Southern Curled in size, quality and flavor. Immensely productive, the leaves boing twice the size of ordinary mustard and remain tender and fit for use much longer. See the engraving, which is a good representation of it. Packet, 5 cents; onnce, 10 cents; ½ pound, 25 cents; pound, 75 cents; postpaid.

Giant Southern Curled—An old and well-known variety used in all parts of the South for salads like lettuce, and for boiling. Our strain of this variety is what is sold by many as the "Ostrich Plume," much superior to the old variety in appearance and quality. Packet, 5 cents; ounce, 10 cents: 14 pound, 25 cents; pound, 75 cents; postpaid.

White Mustard—Packet, 5 cents; ounce, 10 cents; 1/2 pround, 20 cents; pound, 50 cents.

Growing Onions Direct from Seed

The Difference Between Onions Grown from Good Seed

And those grown from the cheap grades is well brought out by the illustration above. Ittells the whole story better than words can. The good onions were grown from good seed on which was bestowed every care which the best seed growers can and do give. The others were grown from seed from those whose inducement to buy is the lowe t price or from commission box seed. Is the other seed the cheapest, even if the grower paid ten times as much for the good seed as he he did for the other? The picture tells the whole story. The difference between the two is the difference between a first-class, profitable crop and a failure.

Good onions can be grown to full maturity in the South direct from the Good onions can be grown to full maturity in the South direct from the black seed and without the use of sets. The first requisite in such a crop is good seed. No crop, with the possible exception of cabbage, isso dependent on the quality of the seet. If your seed is not right, you can't make good onions, no matter how good thesoil and cultivation. Hastings' onion seed, like everything else from Hastings, is all right. You get a crop of onions and not a crop of disappointment from Hastings' onion seed. You can buy lower priced onion seed than ours and when the crop comes you will find that the few cents you saved in seed cost was the most expensive money you ever made. We can buy this "cheap" seed by the ton and sell it to you at a lower price and bigger profit than we do our high grade seed but that in't our way of doing business. We do not and will not sell this low, priced and worthless seed. We want customers who are entirely is itsied with results in their crops, and high grade seed is the only way that satisfaction can be given. that satisfaction can be given.

Our sales of onion seed have increased enormously during the last five Our sales of orion seed have increased enormously during the last five years. We sell thousands of pounds of seeds where we formerly sold hundreds, and this enormous increase has been built entirely on the high quality of our seed, and our onion seed is now generally acknowledged to be the best sold in this country. It took us several years to convince our customers that the best in onion seed is always the cheapest. Through years of sad experience, during which time they bought "cheap" onion seed and made crop failures, they have been convinced fully of the truth of our streament that of our statement that

"Poor Onion Seed is Dear at Any Price."

This poor quality. "cheap" onion seed and the stuff from the commission boxes not only gives a poor germination, but worthless "scallions" when the crop is grown, instead of good, sound, salable bulbs. We have the right seed, of the right verieties, at right prices—the kind that you can make right crops with. If you have used our onion seed in the past you know this to be true. If you have never used Hastings' onion seed, begin this year and get seed that you will be pleased with. Our seed will give you entire satisfaction.

Australian Brown Onion

This is becoming one of our most popular onions in the South, and seems well adapted to the whole South either for spring or fall plantings, This new onion is of neat, medium round shape, size, with skin of a deep amber brown, distinct from all other onions, extrome at other onions, ex-tremely hard and firm, of fine flavor and will keep almost indefinitely. Aus-tralian Brown is the only onion Australian growers will plant. We offer choice American grown seed from the original importation, Pkt., 5e; oz., 15c

HOW TO GROW ONIONS

It is not the difficult matter that most people in the South consider it. In the lower part of the South (Florida and the Gulf Coast) all varieties of onions should be sown during October and November. It is useless to plant onion seed in the spring in that section except to grow sets. In the Central South, including all the States from the Atlantic Coast to Arizona, seed can be sown in October in the open ground, and by giving slight protection during the coldest winter months they can be carried over safely, maturing in May or June. A second method is by planting the seeds in hot beds or frames in December or January, growing to the size of a goose quill in the beds, afterwards transplanting

to the open ground in March, and maturing them about the same time as to the open ground in March, and maturing them about the same time as from fall sown seed. The third and most general method to be followed is to plant the seed thinly in drills made 16 or 18 inches apart in the open ground as early as the soil can be worked—usually in February. Onions can be grown better planted on the same ground every year. It is of the greatest importance to have the soil worked down fine before planting. Remove all grass, roots, trash and stones from it, and while the crop is growing givefrequent but shallow cultivation with either hand or wheel hoes. The crop, for suppressful res. Its must be kept felean of weeds and grass, Opions require quent but shallow cultivation with either hand or wheel hoes. The crop, for successful res. Its, must be kept clean of weeds and grass. Onions require arich soil to attain good size. If your soil is not rich make it so with well rotted manure or fertilizer containing 6 per cent. Available Phosphoric Acid, 8 to 9 per cent. Potash, 5 to 6 per cent. Nitrogen. If your soil is a stiff red clay land, change your fertilizer to 8 per cent. Phosphoric Acid, 5 per cent. Potash and 5 per cent. Nitrogen. In sowing seed cover 1 inch in sandy soils and ½ inch in stiff or heavy soils. Firm the soil after planting. When plants are well upand growing, thin out to 6 inches apart in the drills. The young plants pulled up in thinning may be transplanted to other ground. Push the growth by frequent cultivation. If cultivation ceases, orgras and weeds check them, the onion stops growth and makes sets, instead of going on to make the fully develope 1 bulb. That's why onion seed so frequently makes only sets—planted in the spring. As soon as the bulb begins to form begin drawing away the earth. leaving about ½ the bulb exposed. This quickens growth of the bulb and gives a chance for better development. Wi h good soil, proper cultivation and favorable seasons most varieties of onion will mature early in July from February sownseed. A packet cononion will mature early in July from Pebruary sown seed. A packet contains about 1,000 seeds, an ounce about 7,000 seeds. Four pounds per acre are necessary to seed an acre when sown in open ground. With good serd rich soil, and thorough and frequent cultivation, success is almost certain.

Not a Scallion in My Crop

H. O. Rockley, Leesburg, Ga., writes: "I planted one acre of Crystal Wax and Bermuda White from 2 pounds seed. Sold a carload at 2 cents per pound on track. There was not a scallion in my entire crop."

Hastings' Crystal Wax Bermuda

Earliest, best flavored of all mild white onions. Hastings' Crystal Wax Bermuda is one of the varieties that has made southwest Texas famous wax Bermuda is one of the varieties that has made southwest lexastamous as an onion growing section, more than 1.000 car loads being shipped from there every spring to Northern markets. In the Central South where onions do not stand the winter well it is a splendid onion for earliestspring planting, either for a mild onion to pull green or to go to full maturity in June. The Crystal Wax is well adapted to the Central South for early spring plantings. Try it this spring. Genuine Seed Supply Limited, Packet, 10 cents; ½ ounce. 20 cents; ounce, 35 cents; ½ pound, \$1.00; pound, \$3.75.

Australian Brown Onion

Hastings' Three Big Globe Onions

White, Yellow and Dark Red 3 LARGE PACKETS, 25 CENTS

There are thousands of gardeners all through the South that have wanted a thoroughly satisfactory, large, quick-growing and long-keeping globe-shape onion; a variety that could be grown from seed the first year without the use of sets. In our Three Globe Onions we have something that is just what is wanted for spring planting in all the Southern States except Florida. Our Globe onions are perfection in looks and long-keeping qualities, and are thor oughly adapted to the South. They are in a class by themselves, something entirely distinct from any other variety listed by us. We recommend them to every gardener for spring planting. They will give you entire satisfaction both in quality and quantity of the crop, and their beautiful waxy appearance brings the top price in the market if you sell them. One large packet each of our three big Globe varieties, Snow White, Yellow and Dark Red, for 25 cents, postpaid.

Hastings' Snow White Globe Union

Our illustration shows the shape of these onions. It is a handsome snow-white bulb, with a waxy appearance. It is large, firm, rather mild and a first-class keeper. It is remarkably even and uniform in growth and will always prove a favorite wherever it once appears on the market. It will bring a top price every time. A more beautiful onion than this can not be grown. Large packet, 10 cents; ½ ounce, 15 cents; ounce, 25 cents; ¼ pound, 85 cents; pound, 83.00.

Hastings' Dark Red Globe Onion

This variety has a richness in coloring of the skin that is found in no other red variety of onion. The onions are large, perfectly globe-shaped as shown in our illustration, and of a rich, deep dark red color. Exact shape and size of the White and Yellow Globe, the only difference in them being in the color. The Red Globe is another one that will always bring top prices on the market. Large packet, 1 cents; ½ ounce, 15 cents; ounce, 25 cents; ½ pound, 75 cents; pound, \$2.50.

Hastings' Yellow Globe Onion

Like the Snow white and Dark Red, it has the distinct globular shape like the illustration, being entirely distinct in shape from varieties like the Globe Danvers and much larger. All our Globe onlons are extra large in size and large croppers as well as first-class keepers from the firmness and solidity of the flesh. Color a very light shade of straw, almost the same color as the Bermuda White. Large packet, 10 cents; ½ ounce, 15 cents; ounce, 25 cents; ¼ pound, 75 cents; pound, \$2.50.

Giant White Tripoli El Paso or Large Mexican—Large cents; ½ ounce, 15 cents; ½ pound, 50 cents; pound, \$2.50.

Extra Early Red Earlier than the Wethersfield and somewhat smaller, close grained and a good keeper. Packet, 5 cents; ounce, 15 cents; 1/4 pound, 50 cents; pound, \$2.50.

Yellow Globe Danvers A standard sort and one of the most desirable, Packet. 5 cents; ounce, 15 cents; ¼ pound, 50 cents; pound, \$1.50.

Large Red Wethersfield Aleading variety. Grows to full size the first season from seed, almost round, large size. deep red color and keeps well. Packet, 5 cts.; ounce, 15 cts.; 4 pound, 50 cts.; pound, \$1.50,

Extra Early Barletta Small, pure white pickling, growing small round bulbs about 1 inch in diameter. Just the right size for pickling. Packet. 5 cts.; ½ ounce, 15 cts.; ounce, 25 cts.; ½ pound, 75 cts.; pound, \$2.75.

White Multiplier Onion Sets

ONION SETS White Multipliers

Finest sets for earliest crop. Pure white color, very productive, one set frequently making 20 bulbs in one season. Right size for bunching or pickling. Their greatest value is for an early onion for bunching green, coming in three to four weeks ahead of any other onion. Pint. 20 cents; quart, 35 cents; postpaid. Peck, \$1.00; bushel, \$3.50.

Silver Skin Sets

Sets of White Portugal or Silver Skin Onion. Large white onion. Pint, 15 cents; quart, 30 cents. Peck. \$1.00; bushel (32 pounds), \$3.00.

Yellow Danvers Sets

Forms globe-shaped yellow onions. Pint, 15 cents; quart, 30 cents; peck, 85 cents; bushel (32 pounds), \$2.75. **GARLIC**—Pure Italian garlic. Pound, 35 cents, postpaid.

Hastings' Globe Onions

Hastings' Prize-Taker We have a Puze-Taker onto the best an erican growth, far superior to all imported seed of this variety. It has been successfully grown in all parts of the Central South with both spring and fall sowings. The illu tration shows the shape of this variety perfectly. It is an immense onion, measuring from 12 to 18 inches in circumference. Fine bulbs have been raised weighing from 4 to 5½ pounds each. It ripens up hard and firm and presents a handsome appearance. Flesh is white and fine grained, with mild flavor. Packet 5 cents; ounce, 20 cents; ½ pound, 60 cents; pound, \$2.00.

Mammoth Silver King An immense white Italian variety. Single bulbs weigh from 2 to 4 pounds, with good cultivation. Is admirably adapted to the Gulf States. Skin is silvery white, fiesh is pure white, and so mild that they can be eaten raw like an appie. Packet, 5 cents; ½ ounce, 15 cents; ounce, 20 cents; ½ pound, 75 cents; pound, 25 cents; po

HASTINGS' GARDEN OR ENGLISH PEAS FOR SPRING PLANTING

Hastings' John L. Extra Early Peas

Philadelphia Extra Early Standard and well known First and Best First of All

varieties of extra early peas. Packet.

"10 cen ts; ½ pint, 15 cents; pint, 25 cents; quart, 40 cents; postpaid. Peck, \$1.25; bushel, \$4.50.

Hastings' Extra Early Surprise Pea

Our prices include postage on Packets, Pints and Quarts. Pecks and Bushels by express or freight at purchaser's expense.

Culture The small, extra early, round-seeded varieties can be planted very early, ing early in January and sow-at-intervals of 10 days or 2 weeks until March 15th. After that date it is advisable to sow only the taller growing varieties with wrinkled seed. The wrinkled varieties must not be planted in this section until the ground begins to get warm. The wrinkled seed rots without germinating in cold ground. In the lower South and along the Gulf all varieties can be planted all through the winter wonths. The extra earlies should be cown in stills this thirt is part of see that the other way and covered about 2 is the school of the course Gulf all varieties can be planted all through the winter n onths. The extra earlies should be sown in drills thickly, I quart of see I to each 1.00 feet, and covered about 2 inche. As soon as the weather warms up they will make rapid growth. They should be kept cultivated clean, and as they begin to bloom the earth should be worked up to them. Be sure and make succession sowings every 2 weeks to keep up your supply until the longer bearing sort come in. None of the heavy bearers should be planted until the soil warms, usually in March Varieties like Bliss' Everbearing and Home Delight can be planted in double rows 6 inches apart and run together, leaving 2 feet between the double rows. Being rather stiff they will support each other, doing away with the necessity of "brushing" or "staking." Varieties like Telephone, the Marrowfats and Champion of England must be 'brushd.

While it is customary to only cover peas 2 to 3 inches deep, yet if extra long bearing is wanted it will be well to open up drills 6 inches deep, lant seed at bottom of frill, cover inches, and as the plants grow keep filling in until the ground is level. It will take them a little longer to come into bearing this way, but you get nearly double the crop when planted deep.

deep.

In manuring for peas fresh manure should be applied the previous fall, as fresh manure put on at planting time makes a rank growth of vine and few peas. In spring use nothing but well rotted manure, and if this is not obtainable then use commercial fertilizers. In using commercial fertilizers or cottonseed meal never let the seed come in direct contact with it if you want your seed to germinate.

Hastings' John L.--The Best Extra Early

Finest and earliest of all extra early peas, either for market or home use. For fourteen years it has held the record against the best strains of early peassold by prominent Northern houses, and durir g that time no pea has been introduced that equals it for earliness and productiveness, in its class. The John L. is the standard for excellence with Southern gardeners, both for shipping and home markets, and every year we sell hundreds of bushels of it. The earliest time on record was made by John L. by Mr. C. J. Montgomery, St. Augustine Fla., who planted one peck of John L. and on the thirtieth day from planting gathered one bushels of reast herefrom. This is the record for early beas in the United States, and of course was grown under favorable conditions, still it shows what John L. can do with the right chance. Herearound Atlanta it is always into market seven to nine days ahead of landreth's Extra Early, First and Best, First of All, First in the Market and others. For the quickest and best early crop John L. has yet to be beaten. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 40 cents; postpaid. Peck, \$1.25; bushel, \$4.75.

Alaska Extra Early

Next to John L. this is the best round extra early pea. It follows John L. in earliness and is the best in quality and heaviest bearer of all the round extra earlies. Seeds are of bluish shade and well rounded out and the fresh peas are almost equal to the wrinkled sorts in quality. A splendid shipper and one of the best for home use. Packet. 10 cents: ½ pint, 15 cents; pint, 25 cents; quart, 40 cents; postpaid. Peck, \$1.35; bushel, \$5.00.

Extra Early Surprise

Our new extra early wrinkled pea. It ranks with the earliest; vines grow 20 to 24 inches high and require no 'brushing.' Its extreme earliness, its sweetness, tenderness and flavor and its heavy bearing qualities make it a leader. 'ee natural size of the pods in our engraving. While the pods are a little smaller than American Wonder, yet the Surprise outbears that famous variety two to one. Don't fall to try a few in your garden this year. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 45 cents; postpaid. Peck, \$1.25; bushel, \$4.75.

Gradus or Prosperity Pea

A new extra early wrinkled pea, with immense pods, as large as the Telephone. This pea combines earliness, productiveness and finest quality. It is ha: dy and can be planted as early as any of the smooth sorts, growth from 2 to 2½ feet high, strong and vigorous, very prolific with pods as large as Telephone and containing 8 to 10 large peas of the finest flavor. Color of the shelled peas is a beautiful light green, which they retain after being cooked. Quality and flavor is delicious and the peas remain tender and sweet for a long time. Our seed supply of this variety is again very short and we can only offer it in limited amounts this season. Packet, 10 cents; ½ pint 15 cents; pint, 25 cents; quart, 45 cents; postpaid. Peck, \$1.50; bushel, \$5.50.

Nott's Excelsior (See illustration on page 33). An extra early, dwarf growing wrinkled pea, similar to American Wonder, but one-third larger with the same earliness and delicious flavor. The peas are more closely packed in the pods than any other variety. This new introduction is bound to supersede American Wonder, as it is a much surer bearer. Packet, 10 cents: ½ pint, 15 cents; pint, 25 cents; quart, 45 cents; peck, \$1.40; bushel \$5.25.

Premium Gem Adwarf, wrinkled, extra early, growing about 15 inches high, and is one of the earliest for home gardens. While not as heavy a bearer as some others, its quality is unsurpassed. Packet. 10 cents: 16 cents: pint, 25 cents: quark. 40 cents: prostopid. Peck. \$1.40; bushed; \$5.25.

Nott's Excelsion

Second Early Heavy Bearers

Bliss' Everbearing Height of vine, 18 inches to: feet. Pods to 8 wrinkled peas. Size of peas very large, frequently half an inch in dameter; quality very fine. Its habit of growth is of peculiar branching character, forming as many as ten stalks from a single root stalk. The individual branches are of extraordinary strength and substance, so that when hilled up prop rly they stand up well without brushing. For continuance of bearing this variety is notable—a cheracteristic which gives it especial value for late spring and summer use. After repeated pickings the vines continue to be covered with blossoms and buds developing to maturity in turn. The quality is the best of any peak known. A variety that should be in every garden. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 45 cents; peck, \$1.25; bushel, \$1.75.

Hastings' Improved Telephone Peas
The original strain of the Telephone was one of the finest tall growing wrinkled
peas ever introduced. One of the largest seed pea growers of the world has been
working on this variety for several years, and has succeeded in greatly improving it until it is now the most profitable tall growing pea in existence. We are
again fortunate in being able to secure a limited number of bushels of this new
strain to offer this year. It grows from 5 to 6 feet tall and must be bushed or
staked. Immensely productive, having from 25 to 30 extra large pods, tightly
packed with large size delicious peas of the best quality and that excellent
sugary flavor so desirable in peas. The Telephone has always been a favorite
among both market and private gardeners. All who grow it are pleased with its
fine quality and productiveness. We can not praise this variety too much, and it
seems thoroughly adapted to almost all parts of the South. Packet, 10 cents; ½
pint, 15 cents; pint, 25 cents; quart, 45 cents; postpaid. Peck, \$1.75; bushel, \$6.00.

Hastings' Mammoth Podded Pea the mammoth of the pea family in size of pod in addition to being a heavy bearer of peas of the most delicious flavor. It grows when staked or bushed from 3 to 4 feet high, but can be grown in double rows like Bliss' Everbearing if desired, although the yield will not be as heavy as when "brushed" up. Foliage, pod and vine are of rich dark green color, showing vigor and rapid healthy growth. Our illustration shows the exact size of the average pods, both in length and breadth. The pods are closely crowded with large peas of very fine flavor. In maturity this comes in just about the same time as Telephone, making it a splendid variety to follow such varieties as Everbearing and Home Delight. Its heavy cropping qualifies and delicious flavor will make it a favorite wherever planted. Packet, 10 cts.; ½ pint, 15 cts.; pint, 25 cts.; quart, 45 cts.; postpaid. Per peck, not prepaid, \$1.50; bushel, \$5.50.

large White strong-growing varieties for the Black Eye South. Must be brushed or given support. Each, pkt., 10 cents; ½ pint, 15 cents; pint, 23 cts.; qt., 35 cts.; postpaid. Pk., \$1.00; bu., \$3.75.

Hastings' Home Delight Peas
This splendid variety has been planted by many thousands of our

This splendid variety has been planted by many thousands of our customers in 1 ast years with the most satisfactory results. It is by far the best and earliest bearer of all the heavy croppers. It is a strong, vigorous grower, coming in right after the extra early varieties, and while it is enormously productive, still it is of such stiff, stalky growth that it can be easily and satisfactorily grown without brushing when planted in double rows 6 to 8 inches apart and the rows run together as soon as they are high enough. In sweetness and tenderness it is unsurpassed by any other variety. Packet, 10 cents; ½ pint, 15 cents; pint, 25 cents; quart, 45 cents; postpaid. Peck, \$1.25; bushel, \$4.75.

Champion of England
heavy bearer of finest quality. Wrinkled seed.
pint, 15 cents; pint, 25 cents; quart, 40 cents; peck, \$1.25; bushel, \$4.50.

Sugar or Salad Peas (Edible Podded)

Peas eaten in the pod the same as snap beans. We can furnish either tall or dwarf varieties. Packet, 10 cents; pint, 30 cents; quart, 50 cents; postpaid.

Hastings' Improved Telephone Fea

HASTINGS' MAINE GROWN SEED POTATOES

HARDIEST, MOST VIGOROUS AND PRODUCTIVE OF ALL SLED POTATOES

Bliss' Red Triumph

We are the largest dealers in first-class quality Maine Grown Seed Potatoes in the South, and occupying such a position we want to say a few words about the seed potato supply of the South. Practically all seed potatoes sold South are branded as Maine or Eastern grown, although three-fourths of it is Western grown stock shipped to New York, Philadelphia, Boston and other Eastern cities in bulk, then sacked or barreled, branded as Maine or Eastern stock, reshipped to Southern points and sold by dealers as pure Maine grown potatoes. It is profitable to do this on account of the low prices of the Western stock.

It is now a well-established fact that Western grown potatoes planted in the South in the spring yield less than one-half what first-cless Mainegrown stock does

South in the spring yield less than one-half what first-class Mainegrown stock does. The Western grown seed potatots make a splend of growth of top, but very few potatoes. Why this is so we are unable to explain, but the truth of it has been fully demonstrated and is now geterally accepted by planters in the South who have had experience. Remember, however, that almost every barrel of Western grown potatoes brought South is sold as Eastern grown, so that one is never sure of what he is getting unless buying from an entirely relable source. There are also many cars of potatoes of actual Maine growth shipped here that are actually more worthless for planting than the Western seed stock. This is principally composed of the small potatoes and culls of the Maine crop, much of it diseased and scabby stock. This, together with the Western stock, is sold almost wholly to produce dealers and wholesale grocers throughout the South, and sold by them in turn to the retail dealers and merchants. This stock is not fit to plant, but in turn to the retail dealers and merchants. This stock is not fit to plant, but it can be sold at a low price and catches the ones who look only to the 15 to 25 cents per bushel saved in purchase price, regardless of the loss in the crop which results from planting such stock.

All of our seed potatoes are grown for us under contract in extreme Northern Maine by the best potato grower in Maine. These seed potatoes are all s lected and grown very carefully and are of a higher grade than any others. They are and grown very carefully and are of a higher grade than any others. They are the best seed potatoes in the country. Any one who has planted Hastings' Seed Potatoes will confirm that statement. Like everything else we sell, it is the very best that can be had. Our prices per barrel are for full quantity (11 pecks), giving a net weight of 165 pounds of potatoes. In figuring on potato prices look out for the 10 peck barrels or sacks usually sold. They are made to cut prices with.

BLISS' RED TRIUMPH===OUR MOST PROFITABLE POTATO

The most valuable potato for the South. We sell five times as many Triumphs as all the others combined. It's adapted to all parts of the South, from Kentucky to Florida, from the Carolinas to Arizona. It's an extra early and with our pure Main grown seed stock it's the surest producer of any, while its handsome appearance when first dug makes it a ready seller at top prices on any market. It withstands heat and drouth to a wonderful degree and makes a good crop when other varieties burn up and make nothing. Vines are smaller than other varieties, the strength of the plant going into making potatoes rather than into the vine. This is the right potato for you to plant if you want an extra early and sure cropping potato of the very best quality. It will give you entire satisfaction. Peck, 60 cents; bushel, \$2.00. Barrel prices of potatoes change, usually advancing later in the season. Present price (January and February), per barrel, about \$4.00. Write for market prices.

Hastings' Improved Early Rose

An improvement on the old-time Early Rose that is earlier, larger, more regular in shape and by far the most productive and satisfactory of any strain of Early Rose on the market. Peck, 60 cents; bushel, \$2.00; per barrel, January and February, about \$4,00.

Beauty of Hebron, Burbank, Peerless,

and White Triumph These varieties carried in stock during planting season. Strictly Maine grown selected seed stock. Each: Peck, 60 cents; bushel, \$2.00. Per barrel, January and February shipment, about \$4.00. Write for prices when you are ready to buy.

Moss Curled Parsley

PARSLEY

CULTURE—Sow in spring and fall in drills 15 inches apart. Keep well stirred and free from weeds. When plants have become strong thin out to 6 inches apart. Parsley requires from 3 to 5 weeks to germinate. Soak seed in water 12 hours before

Extra Moss Curled—Our fine strain of Extra Moss Curled is the most ornamental of all varieties. It is handsome enough to have a place in your flower garden. It is the favorite sort ior garnishing and to supply hotels and markets. It is planted almost exclusively by Atlanta market gardeners for that purpose. Packet, 5 cents; ounce, 10 cents; ½ pound, 20 cents; pound, 65 cents.

Double Curled—Plants of dwarf, compact growth, and the young leaves have the edges heavily crimped, giving it a general appearance of coarse moss. Often used by market gardeners. Packet, 5 cents; ounce, 10 cents; ½ pound. 20 cents; pound, 60 cents.

cents

Plain Leaved—Is very hardy, a strong grower, and excellent for seasoning, for which purpose it is grown almost exclusively. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 20 cents; pound, 50 cents.

Parsnips | CULTURE—Sow thickly in drills from January to April for spring and summer crop in this latitude. In Florida and along the Gulf Coast sow from September to December for winter and

mproved Hollow Crown—The best all-round variety of parsnips for the South. The leaves start from a small depression in the crown, giving it the name. Rich, sweet flavor and very productive. Packet, 5 cents; ounce. 10 cents; pound, 20 cents; pound, 50 cents.

Has been made by planters who have used our special high ly bred varieties under h gh cultivation. These varieties will almost always make double the yield per acre that common cotton seed will with the same cultivation and fertilizer. It always pays to plant the best. R ad carefully pages 1, 2, 3, 4, 5 and 6 of this catalogue.

PEPPERS CULTURE—Pepper seed will not germinate neetly in a temperature of less than 65 degrees. This necessitates sowing seed in hot beds or boxes placed in warm, sunny structure from Japuary 1st to Aprill 1st in most parts of the South. When plants have six leaves CULTURE-Pepper seed will not germinate freely in a

situations from January 1st to April 1st in most parts of the South. When plants have six leaves transplant to other beds or boxes till all danger of frost is past and the soil is warm when they may be set in the open in rows 8 feet apart and 14 to 16 inches apart in a row. As they begin bear draw the earth up around the stems. Sow also in June and July in Florida for a fall. ping ero p.

Large Bell or Bull Nose The standard large size, sweet flavored variety both for homeuse, market and shi ping to Northern markets from Florida, Louisiana and Texas, it is sweet and has a Very mild flavor is comparatively early and very prolific. Fruits 3 to 3% inches long and 2 to 3 inches across the shoulder. Packet, 5 cents; % ounce, 15 cents; ounce, 25 cents; % pound, 65 cents; pound 2.00.

riastings' Golden Prize Peppers

Red Cluster Pepper

Ruby King One of the leading varieties of sweet peppers for home use, and very largely grown by market gardeners for shipping. A very vigorous ket gardeners for shipping. A very vigorous grower with large, sweet mild fruits. A cl se favorite with the Bell or Bull Nose, slightly larger and consults with larger and equally mild. Packet, 5 cents: 3 ounce, 15 cents: ounce; 25 cents; 4 pound, 65 cents; pound, \$2.00.

Hastings' Golden Prize

Large, bright, golden yellow variety, Sweet and mild flavor. In some pi-ces eaten like an apple for warding of maiarial influences. It is said to cure chills and tever.

Chinese Giant The monster of the pepper family. Single specimens of Chinese Gianthave been grown weighing 18 ounce. The plants are of strong, stocky, bushy and erect growth; growing 18 inches to 2 feet high, and are very prolific, setting 3 to 4 extra large fruits at the base which ripen white a second crop is setting on the branches.

Fruit is much larger than Ruby King, almost square in shape, while the fiesh is very thick. In flavor it is very mild and entirely free from any fiery taste. Our illustration shows about half the natural size of average fruits. Packet, 10 cents; 1/2 ounce, 30 cents; ounce. 50 cents; 1/4 pound, \$1.50; pound, \$5.00.

This is one of the most met and beautiful varieties we have ever seen-in fact the plants are so ornamental as to deserve a prominent position in the flower garden. The small, thin peppers of a most conspicuous coral red color. are curiously crowded together at the top of each branch. A single plant will bear hundreds of handsome little neppers, which are very hot and pungent in flavor. One plant has been known to bear 1.255 Pkt. 5 ets: oz., 25 peppers. cts.; 1/4 lb. . 90 cts.

Long Cavenne and Red Chili

Very hot, pungent varieties Each variety. pkt., 5 cts: ½ oz., 15 cts.; oz., 25 cts.; ¼ lb., 65 cts.; lb., \$2.25.

Procopp's Giant

This is a giant of the pepper

Sweet Peppers-Bell, Ruby King

Hastings' Mixed Peopers. Packet, 10 Cents; 3 for 25 Cents

family in the size of the fruits. Hastings' Mixed Peopers. Packet, 10 Cents; 3 for 25 Cents In height of vine it is similar to 3 oby King. The fruit isostra large—being 5 to 6 inches in length and 3 inches across at the shoulder. Colorof fruit is glossy scarlet and the flavor is mild and sweet Packet, 5 cents; ½ ounce, 15 cents; ounce, 25 cents; ¼ pound, 75 cents; pound, \$2.75.

HASTINGS' MIXED PEPPERS Almost all home gar leners want both sweet and hot peppers in their gardens. With this in view we have made up a mixture of all varieties catalogued by us, hot and sweet, large and small. This mixture gives you some of every kind in your garden, just what you need for all purposes. In no other way can you get so large and useful an assortment of peppers as in our packets of Mixed Peppers. Packet, 10 cents; 3 packets. 25 cents.

LESS ACRES—MORE COTTON

We have no apologies to make for talking about cotton as much as we do in this catalogue. Nine out of ten to whom this catalogue goes are not only interested in cotton but are dependent on it as a money crop. tire cotton product of the Cotton States could be made on one-half the present acreage if good improved seed was used to plant the entire crop. The cost and labor of cultivating fifteen million acres of cotton ground is the price the cotton farmer pays for using poor or common seed—fifteen mi'lon acres that ought to be put in bread or forage crops and make the owners or renters independent of the merchant and the north and west for supplies. You can cut your acreage in two and make just as much cotton if you use improved seed.

Hastings' Jumbo Pumpkin-220 Pounds

Pumpkins for the South

They ought to be grown largely on every farm in the South. Many sorts are splendid for pies and baking; others make a splendid feed for stock during the winter months. This is a neglected crop in the South now, but should be more largely grown. They are easily sold in the towns and cities when not wanted for use on the farm. Plant pumpkins on the farm in 1909-it will pay you.

CULTURE—Usually grown in corn-fields, but if grown as a separate crop, seed should be planted in hills eight to ten feet apart each way after weather and soil get warm. Hoe often till vines begin to run. When leaves die cut the pumpkins from vine, leaving three to four inches of stem attached and store in a dry place. Handlecarefully and avoid bruising.

Hastings' Big Jumbo Pumpkin Do you want to grow the blgget pumpkin in your county? If so, our Jumbo is the variety to do it with. The pumpkin from which our engraving was made weighed 220 pounds. It is nothing to grow them weighing from 100 to 125 pounds on unfertilized ground Under good cultivation it's a monster. In quality it is good, considering the size. Flesh is a bright golden yellow and fine grained. A good yielder and keeps well if handled carefully in gathering. Packet, 10 cents; ounce, 15 cents; ½ pound, 40 cents; pound \$125.

Seeds Successful Make Big Crops

Japanese Pie Pumpkin A distinct Japanese variety, adapted to all parts of this variety. It is very meaty and solid and in general appearance greatly resembles the Cashaw, but is earlier and usually larger. Skin is a deep green striped with darker green, which turns to a deep golden yellow as the fruits ripen. Average weight 12 to 15 pounds; flesh salmon colored and very fine grained. Its quality is unexcelled. Meat is rather free from water and is easily cut and dried if desired. Packet, 5 cents; ounce, 15 cents; 4 pound, 40 cents; pound, \$1.25.

Tennessee Sweet Potato Pear shaped and a little ribbed; color creamy white, and keeps till late spring. Becomes a favorite wherever planted and has no equal for making pies and custards. Looks like sweet potato when cooked but has a much more delicious taste. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 30 cents; pound, \$1.00.

Sweet or Sugar Pumpkin

Sugar or Sweet This is the pumpation which the celebrated pumpkin pie is made; also first class for baking. It is small, being from 10 to 12 inches in diameter, but its quality is of the finest. It has deep, orange yellow skin and a very fine grained flesh, handsome appearance and a splendid keeper-It is most prolific and can not be excelled as a table variety. A sure cropper and excellent for marketing as it is of a convenient size. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 25 cents; pound, 75 cents.

Large Cheese An old time favorite Bright orange, fine grain. A good keeper. Packet, 5 cents; ounce, 10 cents; ¼ pound, 25 cents; pound, 75 cents.

Southern Field The old time variety of pumpkin. While grown largely for stock feed, it is not too coarse to use for table purposes. A strong, vigorous grover and very prolific. Packet, 5 cents; ounce, 10 cents; \(\frac{1}{4}\) pound, 20 cents; pound, 60 cents; postpaid.

NATURALS

Improved Green Striped Cashaw A great improvement on the old kins are much finer in appearance, being a distinct mottled green striped with white. Flesh is a rich, yellow color; solid, fine grained, very thick. Sweet and most excellent for both ries and baking. They are very hardy, bugs seldom bothering them. Can be grown among the corn and makes heavier yield than the old yellow Cashaw and is better for stock feeding. Packet, 5 cents; ounce, 15 cents; ½ pound. 40 cents; pound. \$1.25.

TWO DOLLARS FOR ONE

By buying seeds from us to the amount of one dollar or more from this catalogue you will get, without a cent's additional cost, a year's subscription to that best of all Southern agricultural papers, the Southern Ruralist. We are able to do this by a special agency arrangement with its publishers. We want you to have THE BEST, both in seeds and paper. That's why we make th's offer to you. Th. Ruralist is the only thoroughly practical up-to-date farm paper published in the South. Its editors are real Georgia farmers. They know what they are talking or writing about and every number is full of thoroughly practical Southern farm and garden information. It contains from 24 to 40 pages each issue and will come to you twice every month for one year if you buy seeds from us to the amount of \$1.00 or over. There is not one to whom this Catalogue goes that does not need at least a dollar's worth of seeds this spring. By sending to us you not only get full value in the seeds but you also get another dollar's worth of paper without its costing you a cent extra. Full particulars as to the Ruralist on the order sheet. Send now and get two dollars' worth for one. It's the best seed-buying bargain ever offered. You can't afford to be without Hastings' Seeds and the Southern Ruralist on your farm in 1969.

HASTINGS' SELECT RADISH SEED

THESE PRICES INCLUDE POSTAGE PAID BY US

Culture For best results radishes require a rich, loose, moist soil, so that they can be grown quickly. The crisp, tender flesh of early radishes depends almost entirely on rapid growth. Successive plantings should be made every ten days or two weeks to keep up a continuous supply of crisp and tender radishes. For early use plant the round or button radishes and olive shaped as early a ground can be worked in spring. Planti, gs of these extra early orts may be continued for six weeks. After that use the long and half-long varieties, as they root much deeper and resist heat and drouth better. What are known as winter radishes should be sown in August and September. All radishes should be sown thinly in drills one foot apart, covered % inch and kept clear of grass and weeds. Our radish seed is of the best, all being grown from carefully selected and transplanted roots.

fully selected and transplanted roots.

Hastings' Early Long Scarlet

This is the most popular of all radishes in the South for the general garden use and market. Our illustration shows the remarkable regularity and fine shape of our strain of this variety. It's a favorite everywhere, no vegetable garden being complete without it. Tops rather small, roots long and tapering to a decided point; color an intense bright scarlet. F esh is very crisp and tender and when grown rapidly, as tall radishes should be, it is free from all pungent taste. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 20 cents; pound, 55 cents; postpaid.

Long White Vienna or Lady Finger

One of the finest long white radishes in cultivation It is almost identical with Long Scarlet, except in color. Beautiful shape; skin and flesh pure white, crisp, tender and of a quick growth. Packet, 5 cents; ounce 10 cents; 1/4 pound, 20 cents; pound, 60 certs.

Long White Icicle Radish

Excellent and profitable; a new and distinct sort. Ready for use as soon as Hastings' Early Long Scarlet, but has fewer leaves. Admirable alike for open air and under glass.

The Icicle radish is perfectly white in color, and long, slender and tapering in shape. It quickly grows to market size, is crisp and brittle and of mild, sweet flavor. It remains tender during the entire growing period, and is quite as good when an luch in diameter as when only half

A fine variety for both market and home gardeners who want an early long, white radish. Packet, 5 cents; ounce, 10 cents; ¼ pound, 20 cents; pound, 60 cents.

Chartier or Improved Sheppard

Grows to a large size, but not very uniform in shape. Red at the top pink in the middle, white at the tips; handsome appearance when pulled at the right time. It is especially fine flavored when grown quickly in the South. Packet, 5 cts.; ounce, 10 cts; ¼ pound, 20 cts.; pound, 55 cts.

Wood's Early Frame Similar to the Long Scarlet, but earlier, shorter and broader, more brilliant color and better for forcing and market, Packet. 5 cents; ounce, 10 cents; 1/4 pound, 20 cents; pound, 55 cents.

White Strasburg Oblong, tapering shape; skin and flesh are pure white, firm, brittle and tender, retaining its crispness even when the roots are old and large. The best for summer use. An excellent family or market variety. Packet, 5 cents; ounce, 10 cents; 4 pound, 20 cents; pound, 55 cents.

Hustings' Glass Radish

Hastings' Glass Radish After we introduced this radish several years ago it was renamed "Cincinnati Market Radish" by a Northern seed house and is generally catalogued by Northern houses under that name. We consider it one of the finest of the long radion with radishes. It is of bright consider it one of the linest of the long red or pink radishes. It is of bright pink color with white tips; very regular and uniform in size and shape. Flesh transparent, always crisp and brittle, with mild flavor even when grown to large size. Desirable for both market or house use. Packet, 5 cents; ounce, 10 cents; lowed 60 cents; lowed cents; ¼ pound, 20 cents; pound, 60 cents, postpaid.

A MISSISSIPPI PAPER

"Mr. John Whitake: and son, John, of Whitaker Station, were in Woodville 12" Saturday. The young man, who is about twelve years of age, brought with him a stalk of corn with nine ears on it, which will be sent to the State Fair and entered in the boys' corn growing contest. The corn is of the Hastings' I rollife variety and thirty-five barrels were grown on one acre despite the fact of a poor stand."—Woodottle (Miss.) Republican

Rosy Gem Radish as Waite Tipped Scarlet Ball. This is the favorite among our market gardeners for torcing as well as fropen ground growth. We have seen it ready for market here near Atlanta in eighteen days from the time seed was sown. It is also very desirable for home gardens, being almost identical with our Scarlet Batton avent in the white sheding at base Scarlet Button except in the white shading at base of the root: It is one of our earliest varieties. Globe-shaped, with rich, deep searlet top, shading to pure white at the bottom. Very tender and oid. Parket, 5 cents; ounce, 10 cents; ½ pound, 20 cents; pound 60 cents.

Scarlet Button Radish

favorite extra early variety of round form and deep scarlet skin. Very mild in flavor, crisp and tender. Short, narrow leaves, making a very small top. Packet. 5 cents; ounce, 10 cents; ¼ pound, 20 cents; pound, 60 cents, postpaid.

Scarlet Button Radish

Crimson Giant A splendid variety of early turnip longer in shape than the Scarlet Button, a brighter color and twice the size. It will take the lead in turnip radishes. It grows quickly and even when it attains large size it remains crisp, render and of fine flavor to the last. It will prove a money-maker for the market gardener, as its bright crimson color makes it a seller on sight. Equally valuable for the home garden. Packet, 5 cents; ounce, 10 cents; 4 pound, 25 cents; pound, 75 cents.

Half Long Deep Scarlet

Rosy Gem Radish A new radish sure to please you. As shown by our illustration it is between Scarlet Button and Early Long Scarlet in shape. In appearance it is most beautiful, in market it brings the highest prices. In color the skin is a brilliant scarlet throughout. Flesh is a clear white, crisp, tender and free from the pungency so common in many radishes. It is an extra early and is thoroughly satisfactory to Atlanta gardeners who have planted it. Packet, 5 cents; ounce, 10 cents; 1/2 pound, 20 cents; pound, 60 cents.

Earliest Carmine, French Breakfast, Phila. White Box Well known varieties. Each—Packet, 5 cents; ounce, 10 cents; 1/2 pound, 20 cents; pound, 55 cents; postpaid.

California Mammoth White—It is 8 to 12 inches long and from 2 to 3 inches in diameter. Packet, 5 cents; ounce, 10 cents; 14 pound, 25 cents; pound, 75 cents.

White Spanish Winter—Mild in flavor. Packet, 5 cents; ounce, 10 cents; 14 pound, 25 cents; pound 75 cents.

cents.

Black Spanish Winter-Black skin, but white flesh. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 20 cents; pound,

65 cents.

China Pose Winter—Bright Rose Color. Excellent quality and best winter variety. Packet 5 cents: ounce, 10 cents; 1/4 pound, 25 cents; pound, 90 cents.

Half Long Deep Scarlet

Hastings' Mixed Radishes-One Planting for the Entire Season. Pkt. 5 cerits; oz., 10 cents; 1/4 ib., 25 Cents.

Hastings Mixed Radishes
Our splendid mixture of radishes has become deservedly popular fin the past few years, giving, as it does, a succession of radishes all through the season. This mixture contains some of all varieties listed—early, medium and late; round, haiflong and long. In one sowing you get a continuous all seasons supply in family gardens. Packet, 5 cents; ounce, to cents; 4 pound, 25 cents; pound, 75 cents.

Mammoth White Sandwich Island Salsify or Vegetable Oyster

SALSIFY

CULTURE-Sow seed in early spring in shallow drills 18 inches apart. Prepare good soil deeply, as Salsify is a deep rooter. Cultivate frequently and let grow all summer. Plants are hardy, so let them stay in the ground and use through the winter as deired. Sow one ounce of seed to 100 feet of

Mammoth Sandwich Island—The best white variety. Attains large size, being twice the size of the Long White. In quality it is much superior to the other sorts. Packet, 10 cents; ounce, 15 cents; ½ pound, 30 cents; pound, \$1.00.

3 0 50 0 ם ם Q UE ы R

Summer or Bush Squashes

CULTURE—As squashes will not stand frost and cold nights, plantings should not be made

until all danger of frost and cold nights are over. Ground should have been worked deeply before

planting. For the bush varieties the hills should be three to four feet apart each way. One or two

leading of well-refred manure to each hill, thoroughly worked into the soil. Plant 6 to 10 seeds planting. For the bush varieties the fills should be three to four feet apart each way. One or two shovelfuls of well-rotted manure to each hill, thoroughly worked into the soil. Plant 6 to 10 seeds in each hill, thinning out to one or two plants when the rough leaves have formed. Cover seed about one luch. If plants are attacked by insects, dust them with "Plant Lice Killer." Hoe frequently, keeping down weeds and grass, but do not disturb the plants. As the squashes form keep them picked off as soon as they are ready for use. This keeps the plant in bearing longer. Running squashes for fall and winter use should not be planted until June or July in this latitude. The hills tor these should be made eight to ten feet apart. Hoe frequently, but do not disturb the run ers. After the squashes are fully grown they should be gathered and put away in a cool dry place to keep for late fall and winter use.

Hastings' Mammoth White Bush Squash
As shown by the illustration this is a decided improvement over the Early White Bush, being double the size and more regular in shape. It is very early, uniform in growth and prolific. Has a beautiful clear white skin and flesh, and grows 10 to 12 inches across. Fine for family gardens and beautiful clear white skin and fiesh, and grows 19 to 12 inches across. Fine for family gardens and nearby markets, but too large to grow for shipment. Packet, 5 cents; ounce, 10 cents; 1/4 pound, 20 cents; pound, 60 cents; postpaid. 10 pounds, not prepaid. \$4.00.

Early White Bush Squash
This is the well-known White Scalloped or Patty Pan squash. It is one of the earliest to mature, very productive and of light cream color. Very popular variety for shipment to Northern markets from Florida, as well as being a general tayorite for home gardeners every-

general tavorite for home gardeners every-

Approved the same of the first

Hastings' Mammoth White Bush Squash

where. Facket, 5 cents; ounce. 10 cents; 4 pound, 20 cents; pound, 60 cts.; 10 pounds, not prepaid. \$4.50. Early Yellow Bush Squash Identical with Early White Bush except Packet, 5 cents; ounce, 10 cents; ¼ pound, 20 cents; pound, 60 cents.

Yellow Summer Crookneck Squash Old well-known variety favorite for home and market gardens. Fruits small, of bright orange yellow color and covered with warty excrescences. Flavor, very rich and buttery. Packet, 5 cents; ounce, 10 cents; 4 pound, 20 cents; pound, 60 cents; postpaid. 10 pounds, not prepaid, \$4.00.

Giant Summer Crookneck Squash

In our Giant Crookneck we have a variety containing all of the good qualities of the Crookneck class and at the same time giving double the size of the Old Yel-

Hastings' Golden Custard Squash low 8 immer Crookneck. For market gardeners growing for nearby markets and home gardens it's especially desirable. Like the Mammoth White Bush it is too large to ship. With thi variety you get double the yield from the same area that you do with the other sorts. We recommend it without reserve to our customers. Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound

Golden Custard Squash which exceeds i size all of the other scalloned sorts, it being nothing unusual to have them attain a size of two feet in diameter when planted on rich, moist soil. In color it is a rich, dark golden yellow. Squashes have smooth skin and are evenly scalloped and uniform in growth. It grows in the regular bush form and isimmensely productive. Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 75 cents.

RUNNING OR MARROW SQUASHES

These are distinct from the Bush or Summer Squashes. The vines run 10 to 12 feet long, the squashes are 6 to 12 pounds in weight and keep for weeks after cutting. In flavor they are much richer than the summer squash. For fall and winter use they should be planted in June and July. After cutting, store in a cool dry place.

coo, dry place.

Boston Marrow Squash This is one of the running varieties in the South, Skin of yellowish shade with thin rind. A good keeper and shipper. Packet, 5 cents; ounce, 10 cents; 4 pound, 25 cents; pound, 75 cents; postpaid.

Early Prolific Marrow Squash

Very similar to Boston Marrow, slightly more prolific and one week earlier. Packet, 5 cents; ounce, 10 cents; ¼ pound, 25 cents; pound, 75 cents.

Improved Hubbard Squash Not a success for gen. cess for general planting South, but does well in some localities. Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 85 cents.

SWEET, POT AND MEDICINAL HERB SEED

Anise-Aromatic seeds are used as a condiment. Leaves finely fringed

Anise—Aromatic seeds are used as a condiment. Leaves finely fringed and are used in garnishing summer dishes. Packet. 5 cents.

Basil. Sweet—Aromatic leaves used for seasoning soups, stews and sauces. Packet. 5 cents.

Borage—Excellent bee food and honey plant; leaves used for flavoring and making cordials. Grows freely on all soils and the sky blue flowers are an addition to any flower garden. Packet, 5 cents.

Caraway—Produces aromatic seeds used for flavoring bread. cakes. etc. Packet, 5 cents; ounce, 10 cents.

Catino or Catmint—Leaves used both dry and green for seasoning. Packet, 10 cents.

Corjander—Seeds used for flavoring cakes, candy and liquors. Packet.

Coriander-Seeds used for flavoring cakes, candy and liquors. Packet,

Dill—Seeds strongly aromatic and have a pungent flavor. Used for flavoring pickles and as a condiment. Packet, 5 cents; ounce, 10 cents; ½ pound, 20 cents; pound, 60 cents

Horehound—Leaves are used for seasoning; also in making candy and cough medicine. Packet, 5 cents.

Lavender—The common lavender; leaves are used for seasoning. The clied flowers are highly extended for their refume. Packet, 5 cents.

dried flowers are highly esteemed for their rerfume. Packet, 5 cents. Marjoram, Sweet—Tender shoots and leaves used for seasoning during the summer months and can be dried for winter use. Packet, 5 cents.

Balm-Leaves are fragrant like the Lemon Verbeng. flavor to summer drinks. Useful for tea in fevers. Packet, 5 cents

Pennyroyal—Low, creeping plants, ornamental for covering ground in damp shady places. Has the flavor of pennyroyal to a marked degree. Furnishes the medicinal properties for menthol pencils and headache cures. Packet, 10 cents.

Peppermint-Well known in the South. Extensively used for flavoring. Packet, 10 cents.

Rosemary—Leaves used gr en for seasoning in summer; dried in winter. An old-time favorite aromatic plant. Packet, 5 cents.

Sage-Most popular of garden herbs, extensively used in flavoring, the dried leaves being a staple market product. Packet, 5 cents: ounce, 15 cents; ¼ pound, 40 cents; pound \$1.35.

Summer Savory—Leaves and tender flower stalks used for flavoring during summer. Much like Thyme, but milder. Packet, 5 cents.

Thyme-Leaves and tender shoots used for seasoning during summer and dried for winter. Delicious flavoring for sausage and meats. Hamedicinal properties. Packet, 10 cents; ounce, 20 cents.

Wormwood—The dried leaves are used medicinally, also externish by

keepers as a tonic for poultry Packet

600.00 REWARD

Will be paid to every cotton grower in 1909, who is now making a half bale or less of cotton per acre, on 20 acres, if he will actually live up to his chances to make money in 1909. It's a difference between making "just a living" out of the years' farm work and a better living and money in your pocket, or in bank, to spend for things you want and need for your own pleasure and satisfaction. Every year there are more thousands joining the bale per acre class. Are you in it now? If not, why not come in during 1909?

This is a very serious business question to every cotton growing farmer, a great deal more serious than you perhaps realize. We have talked along this line in the past, we are going to keep talking about it until every farmer in the South is growing the amount he ought to per acre. If you are a grower of 2) acres of cotton and will use right seed, that \$600.00, or thereabouts will be paid you by the cotton buyer next fall or winter. It's mighty poor policy for a farmer to complain about not making money when he won't do the first vital thing toward making himself a profit by using best seed. It's just like the drowning man who won't try to swim towards shore.

What is Your Yield Per Acre?

We don't know what yours is but we do know that the average yield per acre of the cotton growing States for the last 6 or 7 years has been 191 pounds of lint. Remember that this average includes the big crop year of 1904. With improved or selected seed, a bale (500 pounds) per acre is nothing un usual, while many of our customers in recent years have made 2 to 21/2, yes 3 bales per acre with heavy fertilizing and the best of cultivation. Leaving out the heavy fertilizing growers, we will dr p back to the fairly good pianter, who is making a bale per acre, which is nothing unusual; 500 pounds of lint, in round numbers. We will use a bale per acre for a basis in our figuring, for tens of thousands of our customers have been making such yields with Mortgage Lifter, Sure Crop, Rosser's No. 1, and Bank Account.

A Farming Business Matter

If you are only making the average yield, 191 pounds, this brings you on a 10 cent basis, \$19.10 per acre, or \$382 from 20 acres. That is the biggest kind of losing propositi n, only 7 3-5 ba es from 20 acres. Now see the difference when we take a bale per acre yield to figure on. One bale 500 pounds at 10 cents \$50.00; 20 bales from 20 acres is \$1.000.00. The difference between 1 bale to the acre and 1:1 pounds per acre on a 20-acre cotton patch is \$618.00.

That's why we asked the question—"Did you lose \$600.00 last year?" in our 1908 catalogue. You may be making now a little more than the average possibly you may average 300 pounds per acee. Even this would show a difference in favor of our selected seed of \$400.00 on 20 acres.

It's a plain business question. It don't cost a cent more to prepare land to grow a crop of cotton from improved seed than any other. It don't cost a cent more in fertilizer nor cultivation all through the summer to tend a crop that will make 500 pounds of lint than it does one from common seed that don't usually make over 190 to 200 pounds per acre. The picking and ginning cost more, simply because there is more to pick and gin. An increase in yield of not over 15 pounds of lint per acre, pays for the actual cost of seed, even if you use one bushel of seed per acre, which is usually twice as much as is necessary for a stand if carefully planted.

Get That \$600.00 Reward

It's open to every cotton grower who is not in the bale per acre class. If you are making a half bale per acre now, you won't make quite that much, but \$400.00 or \$300.00 or even \$100.00 extra comes in mighty handy most any time. The finest part about it is that it don't cost you a dollar more for fertilizer, it don't cost you an extra days' work in plowing or cultivation to increase your yield 50 to 100 per cent. over that you get from common cottonseed, and what is true of cotton, is just as true of corn or any other crop.

We gave you a heart to heart talk about "Keeping The Boys on the We gave you a heart to heart talk about "Keeping The Boys on the Farm" on page 7. All that we said on that page about using better varieties is in line with what we are saying here. This is another heart to heart talk about a plain business matter that ought to come home to every farmer or cotton grower in the South. It costs too much to grow now. We believe that nearly half of the cotton grown in the South is sold for lesthant to costs to grow it. This is wrong. Yet, we ought not to "cus" the wrong thing. It's not so much that the market is too low, but that cost of producing is too high. We will "cuss" the New York Cotton Exchange but the Cotton Exchange is not responsible for a half or a quarter the lesthat the average farmer is responsible for himself. We groan when fertilize the price of mules and all supplies go up, and go deliberately ahead paying the increased cost of our cotton without doing the simplest thing towards increasing our yield and that yield can be increased 50 to 100 per cent, just by planting our selected seed. by planting our selected seed.

We believe in all organizations for the help, uplift and prosperity of ail. We also believe, just as strongly, in the old saying, "The Lord helps them that help themselves" and on this marter of increased production, without extra cost, it's a matter where it's decidedly up to you to belp yourself and the time to begin is right now.

Hastings' Aragon Spinach

Best Spinach Seed

Our American grown Spinach is much superior to the imported seed in every particular. The germination is stronger and better, the growth larger and more vigorous and hardier. We have nothing but American grown see i of Spinach. There is no better vegetable to furnish an early supply of "greens" than Spinach. It requires rich soil, the richer the better, and can be sown during January, February and March, any time when the ground is not frozen. It germinates freely in cold weather and is a rapid grower. As "greens" it's quality is unsurpassed.

Hastings' Aragon Spinach Our best variety for the South-large, thick, green leaf, well crumpled or savoyed, and stands a long time before run-ning to seed. The hardiest of all varieties, standing an ordinary cold winter without damage in this latitude. At the same time it is one of the best heat-resisting sorts for late spring use. This variety has been thoroughly tested and pleases all market gardeners who use it. Ounce, 5 cents; 1/4 pound, 15 cents; pound, 45 cents; postpaid. 10 pounds, not prepald, \$2.75.

Curled Norfolk Savoy Sow for fall and winter use, as it runs to seed if sown in the spring. With the exception of Aragon it is the heaviest cropper. Ounce, 5 cents; 1/4 pound, 15 cents; pound, 40 cents. 10 pounds, not prepaid, \$2.25.

Broad Leaved Flanders Good standard variety for home use and marketo Ounce, 5 cents; 1/4 pound, 15 cents; pound, 4 cents. 10 pounds, not prepaid, \$2.25,

Long Standing Sow for all seasons. A heavy cropper that does not run to seed readily. Ounce, 5 cents; 14 pound, 15 cents; pound, 40 cents. 10 ; dunds, not pre paid. \$2.25.

Bloomsdale A valuable variety which is extensively grown, producing large crops of thick-leaved spinach. Ounce, 5 cents; 1/4 pound, 15 cents; pound, 40 cents. 10 pounds, not prepaid, 82.25,

New Zealand In this new variety we have a spinach that can be grown through the entire summer in the South. Should be sown in March and April, where the plants are to stand, and plants will yield a supply of good leaves of fine quality all through the summer with scarcely any attention. A fine variety to furnish "greens" all through the summer. Packet, 5 cents; ounce, 10 cents; 4 pound, 30 cents; pound \$1.00.

HASTINGS' EXTRA SELECT TOMATO SEED

The temate is probably the most popular vegetable planted in the South and it's one that is most healthful. With the use of proper varieties it is a vegetable to stay by you all through the summer and fall,

We make a specialty of tomato seed, our stocks of this being just as good as the most careful clection and cultivation can make them. We wish it distinctly understood that we do not and will not attempt to compete in prices with the so-called cheap tomato seed, usually the refuse seed from tomato canning factories. Our seed is saved from strictly first-class fruits grown from the most highly selected seed. It gives entire satisfaction to every one that plants it.

ver 25,000 Acres of Tomatoes

From Hastings' Tomato Seed are grown in the Southern States every year. That speaks higher praise for the quality of our seed than a catalogue full of testimonials Our tomato seed leads all others in the big shipping sections of Florida, Mississippi and Texas. In Cuba and Mexico the planters want none but our Redfield Beauty for shipment. Our tomato seed stands the test of time. It's not a case of good one year and poor the next, but it's good all the time. It makes paying crops for the men in the tomato growing business in the South. It makes paying crops for the local market gardeners. It gives every home garden a bountiful supply of the most delicious, large size, smooth bonatoes all through summer and up to frost. It's exactly the seed that you want for your use every year, no matter whether you garden for market or home use.

Hastings' Dwarf Champion We think a great deal of Dwarf Champion our special strain of Dwarf Champion, for we believe it to be the only first-class tomate of sufficiently stiff growth

The growth is very stiff, upright and compact. Fruits are large, of bright red color, very regular in size and shape and very smooth skin. It is une of the most popular and desirable varieties planted by tens of thousands of our customers every year. Packet, 10 cents; 1/2 ounce, 15 cents; onuce, 25 cents; 1/4 pound, 70 cents; pound, \$2.25.

New Stone A first class main crop size, very smooth and of bright red color. Largely used in some parts of South Florida for winter shipment, and a standard sort for those who grow tomatoes for canning. It's a large, good, smooth, solld, meaty tomato for all purposes and a splendid vriety to furnish late longators in gardens everywhere. Packet, 5 cents; \$6 ounce, 15 cents; ounce. 25 cents; \$4 pound, 65 cents; pound, \$2.00.

Spark's Earliana Said to be the earliest bright red tomato of good size and flavor. Originated in Southern New Jersey and i, the first in the market from that section. Plants are quite bardy with rather slender open branches and moderate growth well set with fruits, all of which tipen very early in the season. Fru tsaroof deep searlet color, growing closely together in clusters of five to eight, all of medium size, averaging 2% inches in diameter—Smooth and solid, quite thick through and very free from ribs and cracks for an early variety. Flesh deep red with solid center and small—eed ceils; slightly acid favor. A very shy seeder. Genuine seed of this variety is very searce, but we have succeeded in obtaining a limited amount of seed from Southern New Jersey where it originated. Packet, 10 cents, 2 cents; 15 cents; conne, 25 cents; 2 pound, 75 cents; pound, 25.50.

3 Varieties --- A Real Home Garden Collection of Berries. Page 60

Dwarf Champion Tematé

HASTINGS' REDFIELD BEAUTY TOMATO The Most Thoroughly Satisfactory Tomato Grown

Our Redfield Beauty is of the right size, the right earliness, the right shape, the right color, the right bearing qualities, the right shipping and eating qualities; in fact it's an all right tomato in every respect, it has been planted for the last 17 years in Florida, Georgia, Alabama, Mississippi, Louisiana and Texas, and in all tests it has proven its superiority over all the other famous varieties. Its vigorous growth, heavy and long bearing qualities and its comparative freedom from rotting under the most trying conditions of growth make it a favorite everywhere. Of glossy crimson color with a slight tinge of purple. Grows in clusters of three to five fruits and is the most regular in size and shape of fruit of any variety known. Retains its large size until all is picked. Of perfect shape and is unexcelled for toughness of skin and solidity. Especially valuable for market gardeners who have to ship long distances or carry in wagons over rough roads. The skin does not break. In competitive tests it has excelled all the rotted varieties put out by Northern houses in recent years; not one of them was equal to it. For the shipper and market gardener it is the beat; for the home garden it is none the less valuable, cambridge, a Redfield Beauty does, every desirable quality. Large packet, 10 cents; founce, 15 cents; ownee, 25 cents; pound, 82.00; 10 pounds, \$17.50.

Hastings' Matchless Tomato

HASTINGS' MATCHLESS TOMATO

Our Matchless is well named; for it has no equal as a large second early tomato for home use, nearby markets or canning. A vigorous grower and very productive; and continues to produce large size fruits until frost, if kept cultivated. Fruit is large to extra large, very meaty and solid, with few seeds. It's color is a brilliant shade of red, one of the most beautiful tomatoes we have ever seen. Foliage is heavy, protecting the fruits from sunscald during late summer. Packet, 10 cents; ounce, 25 cents; 4 pound, 75 cents; pound, \$2.50.

Hastings' Long Keeper Tomato

No variety of tomato equals Long Keeper in heat and drought resisting qualities, making pre-eminently a tomato to furnish a continuous supply all through our long summers when other sorts die from heat and drought. all through our long summers when other sorts die from heat and drought. Its resistance to unfavorable conditions of growth is remarkable and it is adapted to all parts of the South. Fruits average 3 inches in diameter and are of a bright red color. Is early, very productive and the longest keeper of any. Equally valuable for both home and market garden. It has the right shape and color and every Southern gardener who plants it will find it a most profitable variety. Packet, 10 cents; ½ ounce, 15 cents: ounce, 25 cents; ½ pound, 65 cents; pound, \$2.00.

Extra Early Wealthy

Our new tomato is a source of wealth to the gardener who plants for early markets, hence its suggestive name. It is a remarkably smooth. large size, extra early tomato. It is an enor-mous yielder for n

extra early, each plant being a mass of beautiful red fruit. Fruits "set" in close on the ster, and as it has comparatively few leaves and is open in growth, the sun colors the fruit much more quickly tlan others. It blooms early and sets the first bloom. It is a compact grower and can be grown close. We consider it the best of all xtra early tomatoes. Many of the Florida truckers have grown our Extra Early Wealthy with most rofitable results. Packet, 10 cents; ½ ounce, 15 cents; ounce, 25 cents; ¼ pound, 65 cents; pound, \$2.00.

ONE PACKET EACH OF BEST 4 TOMATOES, 25 CENTS

Duke of York, Our Great Blight-Proof Tomato of the South

HASTINGS' SPECIAL TOMATO COLLECTION

Our Redfield Beauty, Long Keeper, Matchless and Dwarf Champion are grown for us by tomato specialists who grow tomato seed exclusively for us, and who we consider the best and most careful tomato seed growers in the country. Without any exception, they produce the finest grade of tomato seed grown. These four varieties should be in every garden in the South. They are the best varieties in existence. One large packet of each variety postpaid, 25 cents.

Duke of York, the Blight-Proof Tomato

In some parts especially in Florida and along the At-lantic Coast, there is a dis

Hastings' Extra Early Wealthy

ease of the tomato known as the Southern tomato blight. About the time the fruit begins to set the plant begins to die. There is no known remedy for this disease. It does not appear on new land, or land that has not been planted in tomatoes, but when it does appear the only way to succeed with tomatoes is to plant a variety that is blight-proof," and the Duke of York is the only sure blight-proof variety. While not of as fine eating qualities as the others, it is a splendid shipper and makes fine market appearance. others, it is a splendid shipper and makes one market appea ance. Fruits form in clusters of 5 to 10 and are larger than average size. It's a strong, healthy prower, a big cropper and stays in bearing a long time. Planted exclusively in many parts of the South. If you have ground that tomato blight is present in, this variety is the one for you to plant, Genuine Duke of York. Packet, 10 cents; ½ ounce, 15 cents; ounce, 25 cents; ¼ pound, 75 cents; pound, \$2.50; postpaid. Five pounds, not prepaid, \$10.00.

Ponderosa, the Giant Tomato

The largest of all tomatoes. Fruit is extra large and of the best flavor. However, this variety must have the very highest possible culture to succeed, as under ordinary cultivation and treatment we know of n variety that will give such a large percentage of badly formed cracked and split fruit. Unless you are prepared to give Ponderosa extra rich soil and special cultivation, we would advise the use of some other variety. Packet, 10 cents, 10 cents.

One of the largest early sorts. Color, blood

Perfection One of the largest early sorts. Color. blood first to mature. Solid and of good quality. Ripens evenly and is very productive. Packet, 5 cents; ounce, 20 cents; 4 pound, 50 cents; pound, \$1.75.

Royal Red One of the Livingston Tomatoes and a good need one for main crop. A vigorous grower and heavy bearer of large, beautifully colored red fruits. Fine for home use, nearby markets and canning. Packet, 5 cents; 1/2 pound, 65 cents; pound, 82.00.

Hastings' Long Keeper Tomato

Our Great Summer Tomato-See Page 42

Buckeye State The best and smoothest in general cultivation of the so-called large varieties. We prefer it to Ponderosa, as it is much easier grown and produces a much larger number of smooth perfect fruits. Fruit is corne in immense clusters. Fruits large, solid and of fine flavor. Packet, 5 cents; ½ ounce, 15 cents; ounce, 25 cents; ½ pound, 70 cents; pound, \$2.25.

Mansfield Tree Tomato So far as the "tree" part is concerned, it is a fraud. It is a very strong grower, but has to be well titled to stakes to keep from sprawling on the ground. The fruit is large and of good quality, and average one pound in weight. Packet, 10 cents; 3 packets, 25 cents.

Red and Yellow Fear Shaped Excellent small va-

riety of tomatoes. strong. vigorous growth and very productive. Suitable for preserves, pickles and pies. Each variety, 5 cents per packet.

Red Peach

Early and productive. Very distinct and at a short distance it can not be distinguished from a peach. Packet, 5 cents; ½ ounce, 15 cents; ounce, 25 cents.

Hastings' Improved Purple Acme

Our improved Purple Acme is one of the finest varieties on our list, a big improvement over the old Acme which was so popular everywhere. It is one of the very earliest, is almost round and has a thin, but very tough skin. Our Improved Acme is a very heavy bearer and ripens evenly all over. It has a lovely purplish shade of color which makes it especially desirable as a market and shipping variety. Has few seeds, is thick, meaty and solid. You will find it a most desirable sort for either market or home use, with its fine color and flavor. Packet, 5 cents; ounce, 20 cents; 1/4 pound, 50 cents; pound, \$1.60.

GARDEN VALUE

Few that live on the farms ever stop to think of the value of a good garden. The dweller in a city realizes it when he stops on h s way home and pays 10 to 15 cents per quart for tomatoes, 10 cents or a head of lettuce, or a quart of snap beans or peas, a quarter for a good sized melon. What it costs the city man from \$100.00 t \$200.00 per year is yours for the use of a small piece of ground, a little labor and a dollar or so spent for seed.

Chalk's Early Jewel Tomato

CHALK'S EARLY JEWEL

We find this splendid variety to be the best of all extra early sorts. It is within one week of being as early as the famous Earliana and is far superior, within one week of being as early as the amous Lariana and is far superior, the fruits being uniformly larger, thicker through, more solid and of much finer quality than any of the extra early tomatoes. The fruits are very deep throu h from stem to blossom end, being almost round or ball shaped and from 3 to 3½ inches in diameter. The interior portion is very solid and fleshy, with very few seeds, the seed cells being very small and the fruits nearly all solid flesh; quality is exceptionally sweet and free from acidity. Our seed is grown from original stock, none better to be had. Packet, 10 cents; ½ ounce, 20 cents; ounce, 30 cents; ½ pound, 90 cents; pound, \$3.00.

Livingston's Favorite Tomato

A standard variety for home or market. Large and perfect shape. Ripens evenly; does not crack easily. A glossy crimson tinged with purple. Few seeds, skin thick and tough. A good variety. Packet, 5 cents; ounce, 20 cents; 1/4 pound, 60 cents; pound, \$1.75.

The Golden Queen (Yellow)

The best large yellow variety on the market. Very large, smooth, meaty and of fine flavor. Bright golden yellow color. Packet, 5 cents; 2 ounce, 15 cents; ounce, 25 cents.

Hastings' Improved Purple Acme

HASTINGS' AMERICAN-GROWN TURNIP SEED

Early White Flat Dutch Early Red or Purple Top

American-grown turnip seed is away ahead of the European-grown, and there is mighty little American-grown turnip seed sold by most seedsmen in this country. Your local merchant may have seed from Philadelphia, New York, Detroit or other cities, but that don't mean that it's American-grown turnip our seed is right, just what you need for successful crops. You don't take chances when you plant Hastings' seeds in the garden or on the farm of the

CULTURE—Spring plantings of turnips are important, although the main or general crop for winter use is sown in late summer and fall. The seed sown in early spring germinate rapidly and are ready for use very early. Spring grown turnips, being grown under more favorable conditions of temperature than the fall crop, are more tender, sweet and juicy than those grown in summer and fall. Sow thinly in drills in January, February and March, according to latitude, and cover the seed tightly. They make best on either new ground or ground that has not been cultivated for several years. If stable manure is used, it should be applied several months before the crop is planted. Fresh manure always makes potted turnips, inferior in quality and with a rank flavor. For fall and winter use sow Rutabaga from July 15th to September 1st; turnips from August 1st to October 15th in this latitude; further South they can be planted later, and in Florida sowings can be continued all through the winter.

Early White Flat Dutch An old standby, and one of the most popular early varieties in and a quick grower. Is flat, as shown in the illustration, with very small, fine taproot. Flesh and skin pure white; fine grained and sweet. Ounce, 5 cts.; 4 pound, 15 cts.; pound, 45 cts.; postpaid. 10 lbs., not prepaid. \$3.00.

Early Red or Purple Top This is another popular variety of early flat turnip, being almost identical with the Flat Dutch except for the deep red, or purple color of the skin at the top of the bulb. Known in many sections as the Purple Top Flat Dutch. It's a quick, grower with very fine-grained, sweet flavored flesh. The red top of the bulb extending down to where it rests in the soil, adds very much to the attractive appearance of this popular variety. Ounce, 5 cents; 4 pound, 15 cents; pound, 45 cts. 10 pounds, not prepaid, \$8.00.

Extra Early White Egg The finest flavored of all early turnips and with favorable seaslesh are a pure snow white; solid, fine grained, sweet and a good keeper. Looks very attractive bunched for
"afternit gardeners with this variety have no difficulty in selling at top prices. Ounce, 5 cents; 1/2 pound, 15 cents
pound, 50 cents. 10 pounds, not prepaid, \$3.00.

Extra Early Milan The earliest of all turnips. A flat, purple top variety, resembling the in shape and color, sweet and fine grained. Seed supply of this very short. Packet, 5 cents; ounce, 10 cents; pound, 25 cents; pound, 70 cents.

Purple or Red Top Globe

OUR PRICES INCLUDE POSTAGE

Purple or Red Top Globe

The most popular variety in the South for general planting. It is medium early, globe-shaped, very handsome in appearance and an extra heavy cropper in all parts of the South. You can not plant too many of them either for home use or markets. It's always of good quality, a good keeper and a good seller in the market. Ounce, 5 cents; 1/4 pound, 15 cents; pound; 15 cents; postpaid. 10 pounds, not prepaid, \$3.00.

Early Snowball Extra early. A variety of sterling merit, perfectly round. 14 pound, 15 cents; pound, 45 cents.

Golden Ball A splendid and distinct yellow variety. Finegrain, ed. medium sized variety, as round as a ball with a clear deep orange color. Bulbs of medium size, a rapil-grower, maturing early. Has small tap roots. This is the finest flavored of all the yellow varieties for table use. Packet, 5 cents; ounce, 10 cents; 4 pound, 15 cents; pound, 45 cents.

Yellow Aberdeen (Purple Top)—
A fav rite, resisting both heat and cold well. Good size and a splendid keeper. Ounce, 5 cents; 1/2 pound, 15 cents; pound, 45 cents.

Snow White Globe Color pure round, size large, solid, quick in growth for a large turnip, producing great weight to the acre. Rapidly growing in popular favor, more especially as a late winter and spring variety. In the autumn and early winter it is apt to be hard, but mellows like an apple by keeping. It is productive, hardy, and closely resembles in size and shape the popular Porpula Tog Globe. Ounce 5 cents; y pound, 50 cents,

Yellow Aberdeen

HASTINGS' BIG 7 TURNIP COLLECTION

The most popular of all turnip collections. This gives every family in the South a full supply of early, medium and late turnips. No other house offers you such a bargain in turnip seed as this. For 25 cents we will send you postpaid one ounce each of Extra Early White Egg, Purple or Red Top Strap Leaf, Early White Flat Dutch, Purple or Red Top Globe, Yellow or Amber Globe, Improved American Rutabaga and Seven Top-7 Ounces of Turnips, all different, for 25 cents, delivered at your postoffice. No other varieties will be sold at this price and no changes will be allowed in this collection. If you do not want to plant all this seed this spring, what you hold over is perfectly good for summer and fall sowings.

OUNCES, 7 VARIETIES, 25 CENTS POSTPAID

Hastings' Improved American Rutabaga Our spe lat strain of Improved American and heaviest cropper of all rutabagas for the South. This variety has been grown and improved for years to meet the wants and trade of the most critical gardeners. It is of fine form, with a rich purple colored top and yellow fiesh of very pleasing appearance. Flesh is tender and sweet and exceptionally free from stringy, hard fiesh. It has a comparatively small top, small and fine roots, and is a sure and heavy cropper. If you grow rutabagas you need our "Improved American." Ounce 5 cents; 12 pound, 15 cents; pound 50 cents, postpaid. It pounds, not prepaid \$3.50. heavy cropper. If you grow rutabagas you need our ''Improved 15 cents; pound 50 cents, postpaid. 10 pounds, not prepaid \$3.50.

Seven Top "Salad Turnip"

The most popular variety for winter and early spring een." in the South. Very hardy growing all through the winter: Can be ent at all times, giving a supply of fresh vegetable matter et times when nothing else is available. Can be sown from August till December and in early spring. Ounce, 5 cents; 1/4 pound, 20 cents; pound, 50 cents.

Yellow or Amber Globe

Sometimes called Yellow Stone. Undoubtedly the most handsome of the vellow sorts. Grows to a large size, flesh very firm, fine grained and keeps splendidly well into spring. Ounce. 5 cents; ½ pound, 15 cents; pound, 45 cents.

Long White or Cowhorn

Roots long and carrot-shaped, one-third to one half of which is formed above ground. It roots deeply, resisting drought well. Flesh pure white, fine grained, sweet and of excellent table quality. It is very hardy and resistant to cold. Ounce, 5 cents; ½ pound, 15 cents; pound, 45 cents.

Pomeranian White Globe

An extra heavy cropper, desirable where large size and quantity rather than quality is wanted. Very large white globe-haped variety. Ounce 5 cents; ¼ pound, 15 cents;

Hastings' Mixed Turnips

A splendid mixture of our own containing some of each variety of turnips and rutabagas catalogued by us. mixture is made to supply the demand of the thousands of planters who wish to make only one sowing and at the same time have a succession of turnips to supply them all through the season. This mixture contains all the early, medium and late varieties and 'salad' varieties for 'greens.' Ounce, 5 cents; ¼ pound, 15 cents; pound, 50 cents.

Breadstone This variety was introduced as a turnip and was listed as such for several years. We are convinced by several years' test that it is really a rutabaga, aithough it is as fine grained and sweet flavored as the best varieties of turnips. Of medium size and quick growth, with perfectly smooth roots; white with light green top. Flesh white, fine grained and cooks in 15 minutes. For a white quick growing rutabaga It it unexcelled. Packet, 5 cents; ounce, 10 cents; ½ pound, 20 cents; pound, 50 cents.

Fulton Mammoth Southern Prize Salad varieties for greens. Ounce, 5 cents; ½ pound, 15 cents, postpaid.

II. G. Hastings & Co., Seedsmen, Atlanta, Georgia.

HASTINGS' SELECT SEED CORN

A FEW WORDS ABOUT OUR SEED CORN

If you have read carefully what we say about the use of improved cotionseed on pages 1 to 7 of this cased one (and if you grow any cotton you ought to read it carefully), you can see how greatly the man who plants good cotton-seed from this section of Georgia increases his yield. What is true of cotton is true of corn to almost as great an extent. It always pays to plant the best seed whether it be corn, cotton or anything else if you want to make big crops.

It don't pay to plant poor Southern seed corn, neither does it pay to plant Northern or Western grown corn in the Middle or Lower South. Let a spring or early summer drouth come along and corn from Western or Northern grown seed begins to tassel when knee high and makes a failure.

Hastings' seed corn is grown up here in the hill country of Georgia on stiff red clay soils, soils that are noted for producing grain crops of the greatest perfection. Seed grains from this section of Georgia possess a vigor of growth and sureness of cropping qualities that we have never seen equaled by seed corn and grains from any other section. We have never been able as yet to supply the demand for seed corn, always selling out our crops long before the end of the season. If you want to grow the best corn, plant Hastings' Seed Corn; if you want to be sure of getting Hastings' Seed corn, order early.

GRAIN RECLEANED OF SEED

During 1907 we put in, at a very heavy expence, the most perfect seed-cleaning machinery we could buy. Every bushel of corn or grain seed of any kind goes through this machinery before it is shipped to customers. Dust, trash, sand, dirt, broken or light grains are removed in this recleaning process. In our recleaned seed or grain of any kind you get the best that can be had.

HASTINGS' PROLIFIC CORN

Greatest producer of grain and forage known. For full description and prices see last page of cover. Packet, 10 cents; 1-2 pint, 20 cents; pint, 30 cents; quart, 50 cents; postpaid. Not prepaid, peck, \$1.00; bushel, \$3.50; 10 bushels, \$30.00.

HASTINGS' ROCKDALE CORN

The best of all Southern field corns for main crop—our thoroughbred native Georgia variety which has given the very best crops in all the Southern States. Originating with one of our seed growers of North Georgia, it has proved to be superior to all others during the past 10 years. Our illustration, a little over half its natural size, shows the general appearance of the ears. It's very flinty for a dent corn; medium early for main crop; cob small and white, with long, slightly dented, deep white grains. Occasionally a light red cob is found in it, but this is seldom. Ears average very large, being from 10 to 13 inches long and weigh from 1 to 1½ pounds each. It's a first-class variety for meal and for an all-around general purpose corn it can not be excelled for planting anywhere in the South. We have never sold anything that has given such general satisfaction as our Rockdale Corn has. It's a heavy cropper of the finest quality and makes a heavy growth of leaf for forage. As a drouth resister it is unequaled. In the fearful drought in Texas five years ago it excelled all others. Mr. George D. Gray, of Kendall County, Texas, wrote us after the crop was made, as follows; "I planted some of your Rockdale Corn last spring, during the months' drought. Ground was so dry that only 10 per cent, of the seed could come up. What did come up grew like a thoroughbred, and I have got more actual feed on one acre than my neighbors have on ten acres." the seed could come up. What did come up grew like feed on one acre than my neighbors have on ten acres.

That's the kind of a record our Rockdale always makes and that's why we recommend itso highly. It never disappoints the planter. It' the best Southern variety of corn for main crop and should be grown by every Southern farmer. Packet, 10 cents; pint, 20 cents; quart, 35 cents; postpaid. Peck, not prepaid, 65 cents; bushel, \$2.25.

OTTON IS KING

BUT CORN SUPPORTS KING COTTON'S THRONE

and very little cob It matures fully in from 115 to 125 days. Packet, 10 cents; pint, 20 cents; quart, 35 cents; postpaid. Peck, 60 cents; bushel, \$2.00.

Early White Dent

Favorite white variety for early crops in the South. First ready of those producing large ears. Two to three ears per stalk; fine for roasting ears. Packet, 10 cents; pint, 20 cents; quart, 30 cents; postpaid. Not prepaid, peck, 60 rents; bushel; \$2:00.

SOUTHERN

THE

ALL

FOR

Cocke's Prolific A splendid variety of Virginia origin, grown very extensively in Georgia by farmers for main crop and by market gardeners for roasting ears. On good soil in this part of Georgia this variety averages three to four ears to each stalk, although a single stalk has produced eleven well formed ears. It is one of the surest croppers we have ever seen, being especially valuable for uplands, for no matter how unfavorable the season may be on the production of ears, every ear of Cocke's Prolific, no matter how small, is completely filled out to the end with good, well formed grains. You will always make corn with Cocke's Prolific. One farmer in Fluvanna County, Virginia produced, with this variety, an average of 105 bushels per acre on 15 acres, the yield on the best acre being 160 bushels. Ears are of good average size for a prollific corn, grain and cob white, the hard, filnty grains making excellent meal. This is also a splendid corn for roasting ears, almost all market gardeners in this section growing it for that purpose. Every one who has grown it has been pleased with it, preferring it to Blount's Prolific, heretofore the standard prollific variety. Packet, 10 cents; pint, 20 cents; quart, 35 cents; postpaid. Peck, 60 cents; bushel, \$2.00.

Improved Golden Dent Best and most popular early, quick growing with small cob and deep grains of an attractive bright golden yellow color. It's a strong grower and with stands in jury by hot weather better than any other yellow corn we know of, the grains maturing remarkably well and always being harvested in bright condition. It can't be beat for a first-class, quick growing, large yielding, yellow corn. This is THE variety to plant to furnish corn for feeding before the main crop comes in. Packet, 10 cents; pint, 20 cents: quart, 30 cents; postpaid. Peck, 60 cents; bushel, \$2.00, not prepaid.

Improved Golden Dent

Mexican June Corn

For planting late after wheat oats, rye, etc., are cut off. Practically a drought-proof corn, if you can get enough moisture to give germination. For corn, plant in June. For heavy yield of forage, plantin May. Stalksiuto 15 feet high, leaves 4 to 6 feet long. Seed supply from Mexico very lin ited. Packet, 10 cents; pint, 20 cents; quart. 35 cents; postpaid. Peck, not prepaid, 75 cents.

Cocke's Prolific Corn

Southern Snowflake This is a most valuable white field variety, one that makes a large yield and, when ground, makes meal of the finest quality. It also makes a splendid roasting ear corn, being deep-grained, producing large sized ears, of a shape that is most salable for green corn in our markets. It is an early and quick growing variety, maturing its crop in about 100 days. It grows about 8 feet in height; ears set about 4 to 5 feet from the ground. Nearly always produces two ears to the stalk. Does not blow down easily and is valuable for replanting. Packet, 10 cents; pint, 20 cents; quart, 35 cents; postpaid. Peck, 65 cents; bushel, \$2.25.

Broom Corn Much interest is now being taken in this crop in the South and there is no reason why it should not be more generally known as a Southern crop. It is easily grown and is a paying crop when rightly handled and is worthy of trial by all who have land rich enough to grow good crops of grain. The Department of Agrical ture, Washington, D. C., has issued a bulletin on Broom forn which will be sent free to any one who asks for it. Prices—Packet. 10 cents; pint, 20 cents quart, 35 cents; postpaid. Peck, 60 cents; bushel, \$2.00; not prepaid.

POP CORN For description and prices, see page 19 of this catalogue

Field, Forage and Miscellaneous Seeds

BUSHEL PRICES OF SORGHUM, MILLET, Etc., CHANGE FREQUENTLY. WRITE FOR CLOSE MARKET PRICES

White and Red Kaffir Corn This type of the Sorghum family is becoming more and drouth-resisting qualities. Grows 4 to 5 feet high and very stocky. Valuable for forage or grain. Plant from March to July in rows 3 feet apart, drilling the seed thinly in the row like sorghum—If wanted for grain principally let the heads mature on the stalk and then the whole stalk may be cut for fodder after the seed heads have been cut. If wanted mindy for fodder, cut down the stalks when the first seed heads begin to bloom, leaving 4 or 5 inches of stubble. From this will spring a second growth, making an excellent crop of forage and a full crop of grain. Stalks keep green and juicy to the lat. For poultry food and small grain it is unexcelled. There are two varieties, the Red and White, the only difference being in the color of the grains. We can supply either at 10 cents per packet; 25 cents per pound, or 4 pounds for 90 cents; postpaid. In quantity not prepaid, 5 cents per pound.

Jerusalem Corn Very similar to Kaffir Corn, but even more resistan to extreme drought, having been brought to this country from the arid plains of Palestine. Sow in drills like Kaffir Corn or Sorghum, and no matter how hot and dry it gets, you will have grain and forage. Grains pure white and nearly Eat. Four to 5 pounds will plant an acre. The yield of grain from the large seed heads largely exceeds that of corn on the same land. Packet, 10 cents; pound, 25 cents; postpaid. It quantity not prepaid, 8 cents per pound

Sorghum or Cane Seeds for Forage Crops (Recleaned)

The sorghums are becoming more popular every year in the South for forage crops, either sown alone or mixed with cow peas and broadcasted. They should all be planted at race of 6 pounds per acre in drills for syrus, or 1/2 bushel (24 pounds) broadcasted for forage. If sown broadcast with peas use 1/2 pounds) with one bushel of peas. It pays to fertilize sorghum heavily, the increased yield more than paying for the fertilizer.

Early Amber The earliest and favorite Southern variety, grown almost exclusively for foliage, cents; postpaid. Peck, 60 cents; bushel (48 pounds), about \$2.00. Bushel price subject to market changes.

Early Orang

Larger than the Amber, maturing 10 days later and more largely grown for the syrup, which is of extra fine quality and of clear, golden yellow color. A very desirable variety for either syrup or forage. Pound, 20 cents; 40 pounds, 75 cents; postpaid. Peck, 60 cents; bushel (48 pounds), about \$2.00. Bushel price subject to market changes.

Branching Sorghum Or Yellow Milo-Maize. An immense producer of fodder of the best times during the season. Cut at any stage of growth. Seed heads are immense, and furnish a grain crop almost equal in feeding value to corn. Plant 6 pounds per aere. The immense yield will surprise you. Found, 25 cents; 4 pounds, 90 cents; postpaid. 10 pounds or more by freight or express, not prepaid, 8 cents per pound.

True Kaffir Corn

Pearl or Cat=Tail Millet ("Pencillaria")

there is nothing that equals it. As an egg-producing food, nothing can be better. When we say that a sundower crop is profitable, we mean crops of the Mammoth Russian, which produces three to four times as much seed as the common varieties. Seed heads I foot across are nothing uncommon. If you keep poultry on the farm, plant Mammoth Russian Sundower in 1009. It will you would be a farm, plant Mammoth Russian Sundower in 1009. It will you would be a farm, plant Mammoth Russian Sundower in 1009. It will you would be a farm, plant Mammoth Russian Sundower in 1009. It will you would be a farm, plant Mammoth Russian Sundower in 1009. It will you would be a farm, plant Mammoth Russian Sundower in 1009. It will you would be a farm of the farm of t common. If you keep poultry on the farm, plant Mammoth Russiau Sun-dower in 1909. It will pay you big. Four quarts plant one acre. 10 cents a packet; 30 cents a quart, postpaid. Peck, not prepaid, 75 cents.

PEARL OR CAT-TAIL MILLET (Pencillaria)

The best known and most valuable of all green forage plants in the South. For the past four years sensational seedsmen have sold this as a new thing under the name of "Pencilla"

Mand's Wonder Forage Plant.

Pearl Millet needs no introduction to the older residents of the South. They all know its Pearl Millet needs no introduction to the older residents of the South. They all know its great value. It's the greatest and best yielder of green forage and continues to grow and produce through the entire season if cut frequently and prevented from going to seed. Our illustration shows 2½ months growth of Pearl Millet on good soil. In an actual field test made several years ago, on heavily manured ground, it made green forage at the rate of 95 tons per acre in 135 days' growth. No other forage plant has ever come up to that record. It is a tropical plant and makes an enormous growth all through our long Southern summer. It is relished by all kinds of stock, who eat it greedily. No plant will do more towards solving the hay and forage problem of the South than Pearl Millet, and it ought to be grown on every Southern farm. Sow thinly in rows 3 feet apart at the rate of 8 to 10 pounds per acre Pound, 25 cents; 4 pounds, 90 cents; postpaid. By express or freight, not prepaid, about 10 cents per pound. Write for large quantity prices.

German Millet (Tennessee Grown)

An important and nutritions hay crop, largely grown throughout the South, relished by horses and cattle. There are two necessities for a successful crop of German Millet—first, rich norses and cattle. There are two necessities for a successful crop of German Millet—first, fich or highly manufed ground; second, southern grown seed, that from Tennessee being the best. Avoid the Western grown, which is usually sold for 15 to 25 cents per bushel less than the Southern. While in a very wet season it makes a fair crop, yet in ordinary seasons it begins to head when 6 to 8 inches high, making it worthless. The Southern grown seed makes a crop in almost any kind of a season, and always makes a larger growth, and is the only kind that's fit to plant. We handle the Tennessee grown seed only. If you have not had satisfactory results, try some of our seed. Sow ½ bushel per acre. Pound, postpaid, 20 cents; peck, not prepaid, 60 cents; bushel, about \$2.00. Price "ubject to market changes.

CHUFAS OR EARTH ALMONDS

A species of ground nut that ought to be on every Southern farm for fattening hogs and every Southern farm for fattening hogs and poultry. The nuts grow underground, but near the surface, as shown in our illustration, and are easily harvested by hogs and chickens. Plant'n April and May in three-foot rows, dropping 3 (hufas every 10 or 12 inches. Give level culture and they mature in September and will lie in the ground until wanted. One need them agent. The seed wanted. One peck plants an acre. The seed supply is limited and we advise early orders. If you once get to using Chufas as a fattening crop you will always grow them. They are the best fattening crop we know of. Packet, 10 cents; pound. 30 cents; postpaid. Peck, \$1.25, bushel \$4.50.

Every farm in the South ought to grow Mammoth Russian Sunflowers for the seed. No farm where poultry is raised can afford to be without them. The yield on fairly good land is immense, 125 bushels per acre being nothing unusual, and as a poultry feed to give rapid growth and fine glossy plumage

Chufas or Ground Almonds

Teosinte A mammoth forage plant from Central America. undoubtedly one of the most valuable forage plants for the South to be used in a green state. The yield is simply en rmous and cau be cut all through the summer and until frost. We were assured by the late C. A. Bacon, of Ormond, Florida, several years ago, that this remarkable plant grew at the rate of five inches per day on his piace. Plant in hills, like corn, after danger from frost is past. Seed is hard and germinates slowly, but grows rapidly after starting. Ounce, 10 cents; 1/4 pound, 30 cents; pound, \$1.00; postpaid.

JAPANESE BUCKWHEAT

Buckwheat should be more generally grown in the South for a poultry feed, and in the Japanesse we have a variety well adapted to this section. It can be sown in either early spring or late summer and matures in about two months. Does well in almost any soil and resists both heat and droughts well. The bloom furnishes excellent bee food. The kernels of the Japanese are nearly twice the size of the old varieties. Found, postpaid; 25 cents; peck, not prepaid, 60 cents; bushel \$2.00. Buckwheat should be more generally grown in the South for a

CLEANED BEGGARWEED

The standard hay crop in Florida and sandy soils of lower South. Where grown thickly it makes finest quality of nutritious hay, sweet and tender, stock leaving corn and oats for it. It is an annual plant, coming from seed each year. For hay, cut when it comes into bloom. A second growth then springs up which produces seed, thus seeding the ground for the next year. For successful germination soil and air should be warm and moist, hence early sowing is not advisable. Wait until the ground gets warm, Grows well on sandy soil. Every one in the South with sandy soil should give beggarweed a trial. It is one of the most valuable plants the South has for sandy soils. CLEANED SEED-HULL RE-MOVED-Packet, 10 cents; pound, 45 cents; pounds, \$1.25; postpaid. By express or freight, not prepaid, 30 pounds, \$3.25; 100 pounds. \$30,00.

HASTINGS' SURE CROP PEANUTS

For many years the South has wanted a better peanut. The Spanish has been our best up to last year, when we introduced our "Sure Crop" or "Big Spanish", but it lacked size. Our new Sure Crop Peanut, introduced by us in 1908, is a perfect peanut for all purposes. It is a cross be sure Crop Peanut, introduced by us in 1908, is a perfect peanut for all purposes. It is a cross be tween the popular Spanish and one of the large varieties, giving us all the desirable qualities of the Spanish in the way of earliness, bushy growth, sureness of crop, high feeding value, and sweet ness of flavor; yet with double the size of the nuts. It requires the same culture as the Spanish and planting it means doubling your yield. In our opinion it is only a few years until our "Sure Crop" will take the place of the Spanish entirely in the South.

We purchased from the originator his entire stock of this variety and it can be obtained of no one else. Plant a few of them this year and you will have no trouble in selling all you grow to your neighbors another year, as it sells on sight. It's a "sure cropper," has good size and is just as free from "pops" as the Spanish. It originated in Middle Georgia and can be grown anywhere that other varieties are. Seed supply very limited. Packet (4 onnces), 20 cents; pound, 40 cents; pounds, \$1.00; postpaid. Peck of 6 pounds, not prepaid, \$1.00; bushel \$3.50. our ofour Sure Crop this is the best variety for the Central

other varieties are. Seed supply very limited. Packet spanish Peanuts With the exception of our Sure Crop this is the best variety for the Central and Lower South, where a forage and fattening crop is wanted. The April, two crops a year can be made. In that section the second crop can be planted as late as July 15th and they will mature before flost. The tops given any and the nuts grain. In harvesting, the nuts clir g fast to the vines and the tops and in the tops and the stock together as a hay and grain ration. The tops make good forage either green or cure 1. Both the Spanish and our Sure Crop peanuts grow in close bush form, making it possible to plant them close and cultivate easier than the old "vine" sorts. Nuts are produced closely in all the large ones, except Sure (rop, and are very free from the "pops" that are so common in the large varieties. Peanuts and chufas are the best Southern crops for fattening hogs, and no Southern farm where stock is raised should be without them. Pound, 25 cents; 3½ pounds, 75 cents; postpaid. Peck, not prepaid, 50 cents; bushel, about \$1.75. Subject to market changes.

TOBACCO

Southern farmers and their tenants and employes spend millions of dollars every year for tobacco-millions that go to the Tobacco trust, Why not grow the supply on your own farm? You pay no one profits on what you grow your-self and you are sure of pure unadulterated tobacco-something that you can not buy now except at prchibitory prices.

Hyco---For Smoking The most desirable to grow for smoking purposes. Ours is Virginia grown seed from selected plants only; grown for us by a tobacco specialist; seed that will give you a splendid crop. Packet, 5 cents; ½ ounce, 15 cents; ounce, 25 cents; ½ pound, 75 cents; pound, \$2.50 postpaid.

Sweet Oronoke---For Chewing The finest variety to grow in the ing purposes. Makes, when sun cured, the best natural chewing leaf. Packet, 5 cents; ½ pound; 75 cents; pound, \$2.50.

Upland Rice
A valuable crop. Will make from 40 to 60 bushels per acre. More easily grown than corn, and is relished by all kinds of stock. The scre. Plant the seed in drills 24 inches apart. Pound, 25 cents; 5 pounds, \$1.00; postpaid. Peck, 75 cents; bushel, \$2.75; not prepaid.

Also known in many sections as the Japanese or "Soy Bean." Has also been sold as "Coffee Berry." to be used as a substitute for coffee. It is another of the valuable Southern forage and hay crops that is growing in favor. Its growth is upright—from 2½ to 3 feet. It makes less growth of leaf and vine than the eow pea, but more grain and stands higher in feeding value. Packet, 10 cents; quart, 40 cents; postpaid. Peck, \$1.50. Write for bushel prices when you are ready to buy.

THE SOUTH'S GREATEST FORAGE

VELVET BEANS

PLANT AND ENRICHER OF SOILS Makes Poor Land Rich, Rich Land Better. Makes Biggest Forage Crops.

WORTH A TON OF GUANO PER ACRE

A good crop of Velvet Beans turned under is worth as much as applying a ton of the average fertilizer. One crop of Velvet Beans is worth more for soll improvement than 3 Crops of Cow more for soil improvement than 3 Crops of Cow Peas. For stock feed itisrich in both fat and muscle forming qualities. It's an immense yielder, a crop producing 18,000 pounds of dried forage from one acre being reported from the Florida Experiment Station. Seed should be sown in April and May in rows 6 feet apart, dropping one or two beans every foot. One peck plants an acre. Cultivate until vines begin to run, then let alone until frost. Packet, 10 cents; pint, 25 cents; quart, 40 cents; postpaid. Peck, not prepaid, \$1.00; bushel, about \$3.00. Write for market prices when ready to buy.

Spring Oats

Burt or 90 Day Oats and Texas Rust Proof. Write for Prices.

Field of Velvet Beans with the Crop Half Grown

One of the most valuable and important forage and soil-enriching crops. The seed supply on this important item is very short this year, at least east of the Mississippi River, and it is impossible to make prices at the time this Catalogue goes into the hands of the printer on bushel lots or over. If you are in the market for Com Page during the write us, stating quantity and variety and we will quote you close market prices.

Prices on Cow Peas Change Often. Write When Ready to Buy.

The Quick Pea This is strictly a new one found by us in the call it fhe Quick Pea, because it's the quickest in market, of rather low bushy growth, but every pod is ripened up above the foliage, long stems being thrown up. Every pod grows entirely in the sun. It makes, quick, plenty of long stems that the property for the ground pods for use a synaps, quing in her ang intown up. Every pou grows entirely in the sun. It makes, quick, plenty of long, slender, meaty. fine flavored pods for use as snaps, coming in before anything else. Three crops a year can be grown. Get a start now and every one of your neighbors will want seed next year. Packet (3½ ounces), 15 cents; pint, 30 cents; quart, 50 cents, postpaid. Not prepaid, peck, \$1.25; bushel, \$4.50.

Whippoorwill Favorite early variety growing in bush form.
Brown speckled seed. Largery planted for early
crop. Packet, 10 cents; pint, 20 cents; quart, 35 cents; postpaid. Peck, about
55 cents, not prepaid. Write for bushel prices when ready to buy.

Large Black Eye The standard large black-eyed, white or shelled. Packet, 10 cents; pint, 25 cents; quart, 40 cents, postpaid. Not prepaid, peck, about \$1.00; bushel, about \$3.75.

Lady Peas Very small seeded but strong growing and prolific peafor table use. Peas are creamy white and of the finest quality. Packet, 10 cents; pint, 25 cents; quart, 40 cents; postpaid.

WONDERFUL, UNKNOWN, RED RIPPERS, EARLY BLACK, CLAYS, IRON, NEW ERA, MIXED PEAS. All Standard Varieties.

So far as possible we keep in stock during the spring months stocks of the above varieties. When ready to buy in bushel lots or over write for prices, stating variety and quantity wanted. Each—Packet, 10 cents; pint, 20 cent.; quart, 35 cents; postpaid.

GRASSES AND CLOVERS FOR THE SOUTH

And Why Most Grass and Clover Seed Sells Cheap

No. 1 == Sample of Our Best Grade Clover Seed

No. 3 -- Stand from Seed Shown in No. 1

Ever since we began to issue a seed catalogue and sell grass and clover seed we have talked the importance of quality in these seeds particularly. We have urged constantly the importance of buying nothing but the best in quality in seeds, for we knew positively that the best was always the cheapest in the end. In nothing in the way of seeds is there such carelessness and adulteration as in clover and grass seed. In recent tests by the United States Department of Agriculture, samples of clover seed of various kinds were beneath in onen merket and adulterations and weed seed up bought in open market and adulterations and weed seed up

of Agriculture, samples of clover seed of various kinds were bought in open market and adulterations and weed seed up to 64% were found in some of this seed, being sold at low prices. On this page we show you the difference between the best grade, such as we sell, and the lower grades that are sold by the seed houses a: d dealers whose inducement to buy is a much lower price than ours. We are using clover seed to illustrate this, but what we show is equally true of every variety of grass and clover on the market. These illustrations taken from pho'ographs are of clover seed magnified many times by powerful microscopes. The condition can not be seen by the naked eve, many of the noxious weed seed being almost invisible without the use of microscope. Illustration Fo. 1 shows you a sample of our bestrecleaned clover seed, absolutely free from all'adulteration and weed seed, the only kind that is fit to plant. This is what we term 'Best Grade' Seed.

Illustration No. 2 shows a sample of low grade clover seed just as purchased in the general markets. It's full of seed of noxious weeds, many of which may be pests that you can never get rid of. Hardly half of the weight of this is good cloverseed that will germinate, while every weed seed in it is a source of danger, a detriment to any piece of ground it may be sown on. Yet the difference in the retail price of these two samples was only 2% cents per pound, \$1.50 per bushel, and a bushel of clover seed will sow 3 acres. Let no man fool himse finto believing that all clover seed offered is good clover seed. Not 25% of the clover and grass seed sold is best grade stock. These two illustrations show just why there is a difference in price between our clover seed and some others, and that difference is not only in clover seed and some others, and that difference is not only in clover seed but goes all through the grasses. This is only one illustration, but it tells the whole story for all the grasses.

Illustration No. 3 shows what a clean stand may be obtained from the u

ing some of the seed shown in illustration No. 1. This would be a true representation of the young clover plants from your own sowing, supposing that your own ground is reasonably free from weed seeds. This illustration shows perfection in a stand of young clover. Now take a glance at No. 4, showing the planting of the sample of seed shown in No. 2. The clover seed has germinated, but so have the weed seeds, coming along as fast or faster than the clover. You can see that already the weeds are twining around the young clover choking it out. If this is the start you can easily see the finish. With these illustrations before you, we ask again if it is not economy to always buy the best?

No. 2 --- Sample of Clover Seed Bought at Low Prices

No. 4 == Stand from Seed Shown in No. 2

Permanent Grass Mixture A perfect mixture for all the Permanent Grass Mixture Aperfect mixture for all the ture on the clay soils of the South; contains 9 different grasses and 2 clovers. No Bermuda grass in it. Summer and winter grasses blended in right proportion to keep your pasture green the year round. With an occasional fertilizing will last for years. Sow in either fall or as early in spring as soil can be worked at rate of 35 pounds per acre. Price for 35 pounds of this mixture, \$5.50, F. O. B. Atlanta. All grass and clover seed in this mixture is of highest possible grade. highest possible grade.

Hastings' Evergreen Lawn Grass Ourspecialmix-been so successfully used in the lawns of Atlanta for the last five years. It's the only mixture of lawn grass that has been made up that has stood the the only mixture of lawn grass that has been made up that has swed test of time under Southern conditions of soil and climate. It makes a quick show and soon becomes a beautiful velvety lawn on well prepared soil. It stands summer heat and drought without serious injury. Pound, postpaid, 40 cents; 3 pounds, \$1.00; postpaid. Bushel (14 lbs.), not prepaid, \$2.75. Sow at rate of 3 bushels per agre.

Orchard Grass

Bermuda Grass While looked upon as a pest by many on account of its persistent efforts to spread through its underground and surface runners, we believe it to be the best summer pasture grass for the Central and Lower South. It grows on all kinds of soil from the heaviest clay to the lightest sand, and furnishes an abundant and nutritious pasture. No pasture grass will give you so great returns when given as little fertilizer as will Bermuda. Seed should be sown at rate of 4 to 6 pounds per acre between April 1st and June 15th. Seed will not germinate when ground is cold and under favorable conditions requires 20 to 30 days to germinate. New crop seed arrives during the month of January and no orders will be filled before that time. Packet (2 ounces), 15 cents; ½ pound, 25 cents; pound, 75 cents; postpaid. Special prices on lots of 5 pounds or over.

Orchard Grass One of the most reliable grasses for pa-ture. While succeeding well on almost all soils, it does best on loamy and moderately stiff uplands. It starts growth early in spring and continues to grow well into winter. A quick grower, highly relished by stock, especially when young, and bears close grazing. Makes good hay. Cut for hay when in bloom. Sow 3 bushels per acre. Pound, 35 cents. postpaid; bushel (14 pounds), highest grade seed, about \$2.75. Write us for prices on bushel lots or over.

Kentucky Blue Grass Our "Elmwood Fancy" grass that can be bought. Pound, postpaid, 35 cents; 3 pounds, 90 cents. Bushel (14 pounds), not prepaid, about \$2.50.

Red Top or Herd's Grass An excellent hay Succeeds on a great variety of soils, but does best on heavy or low, moist stiff soils. We handle none but fancy cleaned seed of best grade. Per pound, postpaid, 3° cents; 3 pounds, 80 cents. Not prepaid, bushel (14 pounds), about \$2.00. Write for close prices.

Johnson Grass While considered a pestin many parts of the South, it is coming to be recognized as one of our most valuable hay and forage plants in places where its growth can be controlled and kept from spreading into cultivated fields. No other plant makes such enormous yields of hay. It should be cut or mowed just as the seed heads begin to form. Sow 1 bushed per acre. either in fall or spring. Pound, postpaid, 30 cents. Price per bushel of 24 pounds, about \$2.50. Close price on application.

Tall Meadow Oat Grass A valuable grass for both hay and pasture in the South. Starts early in spring and lasts till late fall. Stands than Timothy. Sow 2 to 3 bushels per acre in either spring or fall. Bushel price on application. Pound, postpaid, 35 cents.

price on application.

Meadow Fescue Succeeds well in all parts of the Central South. Furnishes green pasturage through the entire winter. Pound, postpaid, 35 cents. Bushel

Timothy An old, well-known grass for hay crops, not so well adapted to this latitude and further South as to the hilly, mountainous sections North of us. Seed weigh 45 pounds per bushel. Sow 12 pounds per acre. Price very variable. Pound by mail, postpaid, 20 cents. Write for

Alfalfa or Lucerne Clover

The most valuable permanent clover that can be grown. Adapted to from ellimatic conditions. Once well established it is perpetual, furnishing from 3 to 5 cuttings a year. Its nutritive value is of the rest. The growth is remarkably strong, and the roots often penetrate 20 to 30 feet into the subsoil, if ying up valuable plant for the data would never be available otherwise. This deep roting puts the plant forever beyond the reach of drouth after the first season. No farmer in the South, with stock, can afford to let Alfalfa go without trial. Sow in thoroughly prepared soil at rate of 15 pounds per acre, broadcast. Although fall sowing is preferable, yet good results can be obtained from early spring sowing. It is well worthy a faithful trial and careful attention the first year until it becomes thoroughly established. But one cutting should be made the first year. Cut when coming into bloom, as the hay is better at that period. Do not sow on wet land. High and rather dry is preferable to any other. Highest urade Seed. Pound, 35 cents; 5 pounds, \$1.00; postpaid. Peck and bushel prices subject to market fluctuations. Write for close market prices.

Red Clover A valuable farm crop, largely used for pasturage and soil improvement. Yields that, Clover draws nitrogen from the air largely, and is one of the best soil renovating crops. Clover intelligently used is the farmer's best friend. Should be used as a rotation crop. Sow either in fall orspring. September and March are the best months. Found, by mail, postpaid, 35 cents; 3 pounds, postpaid, \$1.00 subject to fluctuations in market prices.

White Clover Does well in almost all lands of the Central South, but prefers moist land, or spring, 5 to 6 pounds per acre. 40 cents per pound, postpaid.

Japan Clover or Lespedeza A valuable Southern clover. Grows well on sumes a creeping habit; on rich land a bush form, making a vigorous plant, growing 12 to 18 inches, according to character of soil, then roll or firm the soil in most convenient way. Makes better grazing than any other except Bermuda. Well a lapted to fertilizing and soil enrichment. Its abundant long tap roots and laterals decaying, render the soil porous and leave in it much valuable matter. The roots penetrate several feet deen, enabling the plants to bear severe dry spells, also bring up from the subsoil valuable plant food. Sow in fall in Florida. In Georgia, Texas, Alabama and Mississippi sow in March. 4-ounce packet, 15 cents; pound 45 cents; postpaid. 10 pounds, by freight or express, \$3.00; 100 pounds, \$25.00.

Burr Clover, Crimson Clover, Hairy, Winter or Sand Vetch, Rescue and other Grass and Dwarf Essex Rape are for summer and fall plantings only. For description and prices see Hastings' Summer and Fall Catalogue, issued in July

HASTINGS' FLOWER SEEDS

Have no superiors and few equals. We use just as much care in the production of the finest strains of flower seeds as we do in vegetable seeds. We do this because it pays us to. Our business experience is that our best advertisement is a satisfied customer, and our special high grade strains of seed are bound to make every one who plants satisfied. The increase of our sales of flower seed for the past four years has been enormous. Our customers have found that the quality of the seed and the size and brilliancy of the bloom from our special strains of flower seeds surpass anything they have ever had. Very little flower seed is grown in the United States, and we import ours direct from the largest and best flower seed growers of Germany and France, where the greatest attention is paid to the production of the finest strains of flowers. We spare no trouble nor expense to get the very best for our customers—the finest varieties of all flowers adapted to planting In the South. Our list of flower seeds is small compared with that of many Northern seedsmen. The reason for this is that there are comparatively few flowers grown from seed that do well in the South, and our list contains nothing but what is adapted to the South. You may depend upon the fact that you can plant any variety in this list with the assurance that with proper treatment and favorable seasons you will succeed.

proper treatment and tavorable seasons you will succeed.

Our packets of flower seeds are larger than those of other seedsmen.

There are enough seeds in Hastings' packets to give plenty of plants of each kind. We have no 1,-2-or 3-cent packets, such as are offered occasionally. Our packets contain good seed and plenty of it. We do not put in 6 or 7. Sweet Peas, or 12 or 15 Poppy Seed, as fine as dust and call it a packet. Our business is not conducted on that basis. We charge a reasonable price, fust what the goods are worth, and give you value received for every cent you send us, and then add to your order a liberal number of extra seeds.

Flower seed is now one of the strong features of our business, and we tead in that just as we do in vegetable seed. Hastings' seeds of all varieties are Successful Seeds.

are Successful Seeds.

Ageratum

AGERATUM BLUE and WHITE

A favorite garden flower for bedding and borders in the South. Native of Mexicoand easily withstands heat of our long summers. They bloom all summer, and if seed is sown in the fall they make splendid box or pot plants for winter. Sow seed in openground in April or earlier in boxes for transplanting. Plants grow 11/2 to 2 feet high, with light green foliage, surmounted with clusters of small, tassel-like flowers. Of quick growth, and profuse bloomers. Blue, 5 cents, bloomers. Blue, 5 cen white, 5 cents, per packet.

12 GLADIOLI 25c

HOW TO SOW FLOWER SEEDS

With few exceptions flower seeds are very small, and sowing them by the inexperienced often results in failure, either partial or complete, because a few simple rules are not followed out. There is nothing myste ious about success with flowers. It requires care and a little coumon sense. With see failure is almost impossible. It is work that can not be left to a negro farm hand or laborer. It must receive careful attention. By observing closely the following rules for sowing flower seed you will have little cause for complaint of failure.

The Soil A mellow loam, which is a medium earth between the extremes leaf mold, is adapted to the generality of flowering plants. Previous to planting flower beds or borders, care must be taken that they are so arranged that the ground may be a little elevated in the middle; that the water may run off, and that the plants may show off to better advantage.

Planting the Seed Make the surface as fine and smooth as possible. Cover each sort of seed to a depth proportionate to its size; the finest, like Portulaca, Petunias, etc., should be merely sprinkled on the surface of the ground, and barely covered with finely sifted, light mellow soil; press the soil down firmly over the seed with a brick or a short piece of board. For larger seed the depth should be regulated according to the size of the seed, those the size of a pinhead ½ Inch deep, and those the size of a pea ¾ of an inch or more. Procure a bit of lath (it would be better if planed smooth) about 2 feet long, press the edge down into the soil evenly, so as to make a groove as deep as the seed is to be planted, scatter the seed along this, allowing 4 or 5 of the larger to 15 or 20 of the smaller seeds to the space one plant is to occupy when grown. Cover of the smaller seeds to the space one plant is to occupy when grown. Cover the seed by pressing the earth over it, then turn your lath flatwise and press the soil down firmly. On light, sandy soils flower seeds should be covered twice the depth that they should be in stiff or heavy clay soils.

Sowing in Boxes Almost all flowers will stand transplanting. Many of them grow better for having been transplanted. In sections liable to late spring frosts, or where drouth comes in spring, it is advisable to sow seed in shallow boxes which can be placed in a warm, sunny window or on a porch. This is always advisable with the expensive seed, and those of a tropical nature, such as Coleus, Salvia, etc. These need a warm soil to start the seed. Sow the same as in open rround, and keep the soil moist, but not soaking wet. If surface of soil shows tendency to cake or crust, scratch it lightly to break the crust. Small seeds can not force their way through a crusted surface. As soon as the plants reach a height of 2 or 3 inches they may be transplanted to open ground, taking as much earth from the box as possible with each plant, so as not to disturb the roots more than is necessary.

SWEET ALYSSUM

Free flowering annual, of quick growth, Free nowering annual, of quick growth, beginning to bloom in early spring and continuing for a long time. Excellent for borders for flower beds, as it is of close, compact growth and even in height. Sow seed thinly, in shallow drills where plants are to stand. Grows 3 to 10 inches high. Packet, 5 cents; ounce, 25 cents.

Alyssum---Little Gem

Plants very dwarf, spreading and uniform in growth, 3 or 4 inches high. Plants begin blooming when 2 inches high and continue long through the season. Plants are literally covered with the small spikes of fragrant bloom, as many as 400 clusters having been produced on a single plant. Fine for borders. Packet, 5 cents; ½ ounce, 20 cents; ounce, 35

Packet, 10 Cents; Three Packets, 25

Hastings' Unrivaled Mixed Asters

ABRONIA Commonly called "California" or "Sand Verbena." Especially adapted to the light, sandy and clay lands of the Lower South. A trailing plant that grows luxuriantly in dry, open soils. Sow seeds in April where plants are to stand. Seeds are enclosed in a husky covering, which should be removed before sowing.

ABRONIA—Mixed—Best shades of yellow and rosy pink, from best varieties, including large flowered varieties. Packet, 5 cents.

Abobra Viridiflora

A splendid summer climber, from Brazil. Fine for porch shade, trellises or fences. Fruits are a rich, brilliant scarlet, resem-Fruits are a rich, brilliant scarlet, resembling small, brilliantly colored gourds. Sow seed after danger of frost is past, where plants are to stand. Packet, 5 cents.

Balsam Apple

Quick growing climbers with ornamental foliage and interesting and valuable fruits which are much esteemed for their medicinal purposes. The fruit bursting and throwing the seed a considerable distance is a source of amusement for the children, Pack-

Balloon Vine

Interesting climbing plant from the East Indies. It is a general favorite. A rapid growing annual climber delighting in warm situation. Small white flower, followed by inflated seed vessel resembling miniature bal-loons. Sow seeds where plants are to stand in April and May. Packets, 5 cents.

Abronia or Sand Verbena

Our Mixed Asters are well worthy of the name of unrivaled. Our mix ture has no rival. It is made up by ourselves of 26 varieties of the finest Asters grown for us by one of the greatest Aster specialists of Germany.

No such superb collection has ever been offered by any seedsman before It contains the German, Boltze's Dwarf Bouquet. Mignon, Queen, Pyramidal Bouquet, Chrysauthemum, Victoria, Cown, Perfection, German Quilled Comet, Glant Comet, Lady, Queen of the Market, Victoria Needle. Washing ton, Imbricated Pompon, Jewel, Betteridge's Quilled. Cocardeau, Tali Chrysanthemum and Vick's White Branching, each of them except the last being in assorted colors. Our Universal Mixture will make a magnificent display, one that should be in every flower garden in the South. Packet, It cents; 3 packets, 25 cents.

Culture. No one flower has had more attention paid to it by seed growers.

No one flower has had more attention paid to it by seed growers Culture No one flower has had more attention paid to it by seed prowers than the Aster and none show greater improvements than it does Here in the South it gives marked success and by a little disbudding, letting only a few blossoms come on each plant, flowers as large as ordinary chrystic above the above and here a the above atthemum comes in The anthemums can be had, and before the chrysanthemum comes in. Aster is constantly growing in popular favor and is worthy of more extended culture in the South. For early flowering, seed may be sown in January and February in boxes in the house and transplanted to the open after danger of hard frost is past. Sow seed in open ground in shallow drills when trees start to leaf out, and when 2 to 3 inches high transplant to beds where they are to bloom. For late fall flowering, seed may be sown in May or June They grow luxuriantly in any good garden soil and the mass of bloom from a small bed will repay you for the slight trouble necessary to grow them to perfection. Keep the beds weeded and free from grass so that the plants have full chance for development.

SEPARATE VARIETIES of ASTERS

We find that a number of seed buyers prefer some of the separate sorts in their gardens rather than a mixture of so many varieties. For these we list separately a number of the more largely known sorts so that they may

DWARF CHRYSANTHEMUM FLOWERED—Splendid dwarf variety h large flowers. Fine mixed colors. Packets, 10 cents.

with large flowers. Fine mixed colors. Packets, 10 cents.

TRUFFAUT'S PEONY FLOWERED PERFECTION—One of the best Flowers large and very double. Finest mixed colors. Packet, 10 cents.

VICTORIA—Flowers large and showy and perfectly double. Growth about 20 inches in height. Mixed colors. Packet, 10 cents.

COMET—Very beautiful and distinct class. Long, curled and twisted petals formed into a loose half globe resembling Japanese Chrysanthe mums. All colors mixed. Packet, 10 cents.

WHITE BRANCHING—Pure white. Resembles a large white chrysan themum; nearly 4 inches in diameter. Flowers borne on long, stiff stems which branch freely. Packet 10, cents.

BRANCHING AST RS MIXED—This type forms broad, handsome bushes covered with large, long stemmed and long-petaled flowers that are graceful and feathery in effect. Mixed colors. Packet, 10 cents.

QUEEN OF THE MARKET—Graceful, spreading habit. Flowers early nearly two weeks ahead of other varieties. Mixed colors. Packet, 10 cents.

TRIUMPH—Flowers of peony form; petals beautifully incurved. Qolor scarlet, very rich and brilliant. Packet, 10 cents.

12 ROSES 3 Red, 3 Yellow, 3 Pink, 3 White, all different varieties of everbloomers, postpaid. See page 60.

AMARANTHUS

Annual plants, grown both for foliage and the showy flower clusters. There are two types, one valued for the brilliant coloring of the leaves, the other for large, feathery plumes or sprays of rich, crimson flowers. They grow quickly and may be sown in the open ground in March and April, or may be started earlier in boxes and transplanted.

Amaranthus Caudatus (Love Lies Bleeding)—Plants of stiff, erect growth, 3 feet bigh, with numerous sprays of rich crimson flowers. Packet 5 cents.

Amaranthus Tricolor (Joseph's Coat)—Has a single, erect stalk and brilliantly colored leaves when full grown. The rich yellow and red markings are very distinct, contrasted with the deep, green foliage. Packet, 5 cts.

Amaranthus Cruentus
(Prince's Feather)—From Asia. Tall
growing, with leaves purpleor purplish
green. Heavy feathery heads, drooping with beautiful effect. Packet, 5 cts.
Amaranthus Salicfolius
(Fountain Plant)—Grows 2 to 3 feet
bigh, branching freely and of pyramidall form. Stems and parrow leaves are

Amaranthus Tricolor

al form. Stems and narrow leaves are of a deep purple coloring, with sien der, feathery spikes. The slender branches grow with a drooping effect producing a graceful effect similar to the spray of a fountain. Packet, 5 cents.

Royal Prize Camellia Flowered Balsams

Abutilon Commonly called "Flowering Maple." Splendid bedding plant for partly shaded locations or for pot culture, for porches or indoors. Our Royal Prize strain is of the Anest mixed colors. Varied in form and color of flower, leaf and growth. Easily grown from seed, which should be sown in boxes in March and April. Packet, 10 cents.

Antirrhinum (Snap Dragon)—The old-fashioned Snap Dragon, largely improved by cultivation and selection. Sow in open ground in March and April, or earlier in boxes. Of easiest culture and well adapted to the Central South. If seed is not sown in early spring they will not bloom until the second season. They are hardy and will stand the winter here if slightly protected. Our seed is from one of the most careful seed growers of Europe. Finest Mixed. Packet, 5 cents.

Aristolochia (Dutchman's Pipe)—A splendid climber of tropical origin, well adapted for porches, trellises or arbors in the Central and Lower South. Leaves dark green and plants of rapid growth when planted in good loamy soil or one that has been well manured. They need plenty of sunshine. The variety we offer (Elegans) is odorless. Flowers 3 inches across, purple and white blotched. Plant seed where plants are to stand, about May 1st.

Bryanopsis Avery attractive climbing vine of quick growth with ornamental, deep cut foliage. Flowers small but are quickly succeeded by small, round dark green seed pods, striped with lines of pure white. The plants are quickly covered with these brightly marked fruits, making a very showy and pleasing effect. Very pleasing to the children. Packet, 5 cents.

Bellis Perennis (Double English Daisy)—The true English Daisy, perfectly hardy and suited to cool, rather moist locations. Bloom in earliest spring and late fall. Sow seed early in boxes or shallow drills, then transplant to permanent location. Treat the same as violets. They can be lowered through the winter if placed in boxes in pits or planted out in cold frames. Flowers very double. Plants spread rapidly in rich soil. Finest Mixed. Packet, 10 cents.

Cacalia (Tassel Flower)—Plants 18 inches high, branching freely and producing clusters of red and yellow tassel-like flowers. Packet, 5 cents.

Canterbury Bells (Campanula)—Sown early in the South these will bloom the first season. Sow in a rather shaded location, as soon as the ground can be worked, and they will give an abundance of bloom through the fall. Sow seeds thinly in beds and cover not more than a quarter inch. Our strain of this is of medium size, growing about 18 inches high.

Finest Double and Single Mixed-Beautiful bell-shaped flowers, all colors mixed. Packet, 5 cents.

TUBEROSES, 6 for 20 Cents

THE OLD FASHIONED FLOWER BALSAM TOUCH-ME-NOT OF LADY-SLIPPER

The old and familiar Touch-Me-Not or Lady-Slipper improved until those familiar with the old forms would hardly recognize the large waxy flowers with their elegant shades of solor and variegations as belonging to the same class. They grow luxuriantly all through the South with little attention in any good garden soil, and well repay one for the little trouble. Sow in open ground after danger of frost is past, or earlier in protected boxes. For best effect plants should be set about one foot apart.

BALSAM—Royal Prize Camellia Flowered Mixed—One of our special strains, surpassing all others in brilliancy of colors, size of flowers and freedom of bloom. These should be planted from 1½ to 2 feet apart to allow space for full development of the strong and vigorous plants. They will surprise you. Packet, 10 cents.

A Single Plant of German Carnation

BALSAM—Double Rose Flowered Mixed—Very double and large flowers of finest shades and colors. This is identical with what is sold by many seedsmen as the French Camellia Flowered. Packet, 10 cents.

BALSAM—Double Spotted—A splendid strain for those preferring variegated bloom rather than solid colors. They are all beautifully spotted, striped and marbled; very large and double.

BALSAM-Double Extra Fine Mixed-Very fine double from best German growers. Packet, 5

Packet, 10 cents.

Hastings' Hybrid Coleus

There are no finer decorative foliage plants for the South than our fine Hybrid Coleus, easily raised from seed sown in boxes in February and March and placed in a warm, sunny window. The seed is small and should not be covered more than 's of an inch. Keep moist but not wet. When young plants are 3 or 4 inches high, or when danger of frost is past. set in the open ground. Our mixture of seed of Coleus is saved from some of the finest exhibition plants and contains all the best fancy striped and blotched sorts. Packet, 15c; 2 nackets 25c packets, 25c.

Hastings Hybrid Coleus

Bright, showy plants, growing with greatest profusion in any good garden soil. Plants I and 2 feet high, covered with brilliant and showy flowers, both double and single. Sow in early spring, in open, where plants are to stand.

Tall Varieties, Mixed—Grow 1½ to 2 feet in height. Pkt., 5c.

Dwarf Varieties, Mixed-Grow about 1 foot high. Pkt., 5c.

BEAUTIFY YOUR HOME WITH FLOWERS

Carnations
Carnations grown from seed. The Double German and Grenadin are not in their full development until the second year; the Chaubauds and Marguerites come to full bloom in about 4 to 6 months from the time seed is sown.

+ inest Double German Mixed—This is the true double carnation. Our strain of this is rather early, and from seed sown in early spring some bloom will be had the following fall. The seed is saved from the choicest double colors. Packet, 15 cents; 2 packets, 25 cents.

Grenadin—Not quite so double as the Double German. In color it is the brightest shade of brilliant scarlet. It's certainly a beauty. Packet, 15 cents.

Chaubaud—A new strain. Strong, healthy, vigorous plants, bearing large, very double, deliciously fragrant flowers of the finest colors. Blooms in five months from seed. Packet, 15 cents; 2 packets, 25 cents. Carnations are now one of our most popular flowers and are easily grown from seed. The Double German and Grenadin are not in their

denotously ragrant nowers of the mest colors. Blooms in five months from seed. Takket, is centis: 2 packets, 25 cents.

Margueri'e—An everblooming carnation, blooming in four months from seed. While the flowers are a little smaller than the regular carnations, their earliness and abundance more than make up for the difference in sizes. Mixed colors. Packet, 10 cents.

Giant Marguerite—Similiar to the Marguerite but the bloom is nearly double the size of

the other. Packet, 15 cents.

HASTINGS & Flowering Cannas

Few plants have shown so great improvement in recent years as the Canna. They retain their value as a tropical looking foliage plant, at the same time the magnificent bloom of these new varieties in many instances is equal to that of the most costly orchids. They are easily grown anywhere in the South, and bloom the first season from seed. Start the seed in boxes in February and March in a warm place. These boxes should be shallow and filled with rich garden soil sifted fine. The seeds have a hard outer covering. This must be either filed or cut through so that moisture can reach the germ. If not filed or cut, they often remain dormant for many years. When young plants show 4 or 5 leaves they can be transplanted to open ground, if a ldanger offrost is past and the ground is warm. Make soil very rich and set 1½ feet apart each way. After the tops are killed by frost in the fall, cut them off and cover them with a thick mulch. We have seed saved from the finest introduction embracing all the finest shades and colors. Packet, 10 cents; ounce, 15 cents.

Canna Roots Named varieties (order by color), 10 cents each; \$1.00 per dozen; postpaid. Assorted varieties, 6 for 40 cents; 75 cents per dozen; postpaid.

Clarkia One of the most popular of annual flowers. Better for Central South than considerable cold and of the earliest culture. Sow in good garden soil as early as ground can be worked. They are rapid growers and constant bloomers from May to September. Single Mixed—All colors. Packet, 5 cents. Doub.e Mixed—All colors. Packet, 5 cents.

Cleome or Spider Plant A very free flowering, hardy annual of branching habit, growing 4 to 6 feet in height; each plant terminates in a large spike of rosy-pink flowers. Plants grow freely from seed sown in open ground early, in summer and continuing until cut off by frost. Fresh flowers appear constantly at tops of the branches as they increase in height; they have long slender stems, making them quite feathery in appearance. The flowers are succeeded by long seed pods on slender stems, and as they are set thickly on the stalks, have a slight research to a giant centipede or spider. Packet, 10 cents.

Japanese and Chinese Chrysanthemums

Cyclamen

Persicum—Popular, free blooming bulbous plants for home culture. Seeds produce the bulbs which flower the following spring. These should be grown entirely in boxes and pots, never in the open ground. Colors range from pure white to deep crimson. Finest mixed colors. Packet, 10 cents.

Hastings' Large Flowering French Cannas

Chrysanthemuns (Chinese and Japanese)—This is one of the best flowers for the South and is easily raised from the seed, the plants from early sown seed flowering the same year. Almost all the new and striking varieties are the result of plants grown from seed, and the amateur is as liable to originate new and splendid varieties as is the professional florist. They are of the easiest culture and always give satisfaction to those who cultivate them. These are all hirdy in this latitude and further South, and can be left in the open ground through the winter. Sow seed in shallow boxes, barely covering the seed with finely sifted soil. Keep moist and place box in a warm sunny room. When young plants are three inches high transplant to open ground. Our supply of seed is saved from the finest Japanese and Chinese varieties (named sorts) and the bloom you get will surprise you with the odd and beautiful forms of the flowers and abundance of the bloom during the fall months. Packet, 20 cents; 2 packets, 35 cents.

Centaurea---Dusty Miller

Largely used for borders or edgings and thrives in all parts of the South. Flowers white, leaves grayish white. Height about one foot. Packet, 10 cents.

Centaurea--Bachelor's Button

Attractive and graceful flowers of easlest culture, plooming through the entire summer. Finest flixed. Packet, 5 cents.

Japanese Morning Glories (Convolvulus)

In recent years a new race of Morning Glories has come to us from Japan, of such large size, vigorous growth and rich colors, varied by all sorts of remarkable and beautiful variations, striped and blote ed in every manner imaginable, that we can hardly recognize it in the original type. These now embrace something over 30 distinct shades and colors, and some show variegated foliage, the rich dark green being blotched with white and golden yellow. Our strain of these embrace all of the best shades, colors and variegations. A packet of them will surprise you with the rich return of beauty and flowers covering your porches, trellises and fences. Packet, 10 cents; 3 packets, 25 cents.

Dwarf Morning Glories—A perfect bush form growing about one foot tall. Mixed. Packet, 5 cents; ounce, 10 cents.

Tall Morning Glories-The old favorite. Best mixed colors, Packet, 5 cents; unce, 10 cents.

12 TUBEROSES—35 CENTS

Imperial Japanese Morning Glories

Cosmos Handsome, very free flowering annuals, originally from Mexico. Adapted to the entire South. Do not plant in soil too rich, as it makes too tail a growth. Sandy or light clay soils are best. Sow as soon as danger from frost is entirely past, in open ground. They grow 4 to 6 feet tail and are covered profusely with flowers from August until frost. White, pink and crimson mixed. Packet, 5 cents.

Giants of California—A flowered strain, the flowers being more than double the size of the original strain. Flowers pink, white and crimson mixed. Packet, 10 cents.

Yellow Cosmos—Klondyke—Originated in Americus, Ga. The originator says that from early spring sown seed the plants begin to bloom by June 15th and are 2½ feet high. Blooms continuously until frost, being covered with rich, orange yellow flowers 2 to 3 inches in diameter. This is a superb variety. Packet, 15 cents or 2 for 25 cents.

Celosia or Cockscomb

Sow seed thinly in drills; when the trees come in lear, transplant to 12 inches apart when the plants are 3 inches high. They develop abnormally large flower heads or combs, are showy and of easiest culture.

Celosia Christata—The large, close headed form. Mixed colors. Packet, 5 cents.

Celosia Plumosa—This is a distinct form, different from the other. Heads, instead of being close. are loose and feathery, borne on long stems. Mixed colors. Packet, 5 cents.

Cobea Scandens A splendid climber from Mexico entirely dapted to the whole So th. A rapid grower, quickly attaining a height of 15 to 20 feet and covered profusely with deep reddish violet purple bell-shaped flowers as shown in the illustration. Leaves are in pairs on a central leaf stalk, which terminates in a slender tendril like these of the sweet peas, enabling the vines to cling closely to stripes, wires or trellises. Do not plant seed in open ground until quickly if set on edge and covered not more than a half inch; less than that is better. Can also be sown in pots and transplanted if care is taken not to disturb the roots. Packet, 10 cents.

Cypress Vine

Cypress Vine The most graceful of all vines and grows anywhere in the South. For a neat trellis or ornamenting the trunks of trees it is unexcelled. It has a profusion of searlet and white star-shaped blossoms, and its finely cut foliage is particularly adapted to ornamental work. Grows 10 to 12 feet high and if planted thick in good soil will make a dense growth. We can supply the colors, scarlet and white. separately or mixed. Packet, 5 cents.

Delphinium (Larkspur) Quick growing. ering annuals, producing erect spikes of beautiful flowers of various colors. Sow in early spring, thinly in shallow drills. Thin out, after well-up, to 10 to 12 inches apart. They make a pleasing display, and are very satisfactory.

Delphinium, Dwarf Double German Mixed—Of rather dwarf growth, 10 to 12 inches high. The branching spikes are thickly set with double flowers of many distinct colors. Packet, 5 cents.

Delphinium, Tall Double German Aixed—Grow 2 feet in height. The tall, rocket-like spikes are profusely covered with fully double flowers of various colors. Packet, 5 cents.

Cobea Scandens

12 GLADIOLI 25c

Hastings' Superb Mixed Dianthus Pinks

Digitalis (Fox Glove) Fox Glove is one of the easiest of curshaded locations, but does well in open. It is a beautiful plant and also valuable for medicinal purposes, for which the leaves of the second year's growth is used. Sow in early spring, in shallow drills, as soon as leaves on trees put out. A light, well enriched soil suits them best. Flowers large, 2 inches long, ranging from purple to white, and more or less spotted. Mixed colors. Packet, 5 cents.

Beautify Your Home With Flowers

Dianthus or Garden Pinks Chine'e, and J panese—Pinks the South from early spring sown seed. They are entirely hardy with us, and make larger and better flowers the second year. Sow seed in shallow drills as soon as the leaves on the trees start in the spring. When well up, transplant to beds or borders where they are to staud, putting them 6 to 8 inches apart. The rich and diversified colors in our collect in are only equaled by the pansies.

Chinensis—Double China Pink. Compact plants and free bloomer. All shades and colors. Packet, 5 cents.

Chinensis Alba—Double pure white. Packet, 5 cents.

Heddewiggii (Japanese)—Finest single mixed, very large flowers, frequently 2 to 3 inches in diameter. Packet, 5 cents.

H. Atrosanguinea—Double crimson. Packet 5 cents.

Mourning Pink—Extra double flowers with body covering of very dark velvet mahogany, almost black, in striking contrast to the finely fringed edges of pure white. Packet, 5 cents.

Double Diadem Pink—Very large double flowers finely marked. Magnificent in both solorious and colorious and colori

Double Diadem Pink—Very large double flowers finely marked. Magnificent in both coloring and varieties. Mixed colors. Packet, 5 cents.

Crimson Belle-Single. Large flowers of deepest glowing crimson, beatifully

Crimson Belle—Single. Large flowers of deepest glowing crimson, beatifully fringed. Packet, 5 cents.

Eastern Queen—Magnificent large, single flowers, 2 to 4 inches across. Finely fringed, beautifully stained in rich shadings on silvery white, each flower having crimson center. Packet, 5 cents.

The Bride—Large handsome flowers of silvery white with rich, purplish red eye surrounded by a still darker crimson ring. Packet 5 cents.

Lacinatus—Large single fringed flowers in many distinct colors. Packet, 5 cents.

Salmon Queen—Single flowers of beautiful rosy salmon color, a rare shade in pinks. Packet, 10 cents.

Imperialis—Double Imperial Pink. Double full centered flowers, large and showy. Fine range of colors and markings. Packet, 5 cents.

Most of our

Hastings' Superb Mixed Dianthus Most of our friends prefer a few plants of many sorts and do not wish to buy each variety separately. To meet this demand we have made up a magnificent mixture of all the above varieties and many others, giving a mixture of all the Chinese and Japanese Pinks, giving the widest range of form, color and markings imaginable. Large packet, 10 cents; 8 for 25 cents.

Hastings' Superb Dahlias No flower in recent years has shown greater improvement than has the Dahlia. The present strains produce flowers of large size and striking brilliancy of colors. The more we see of the improved strains the more we are convinced that it is one of the coming popular flowers, probably a rival of the chrysanthemum. They are easily raised from seed in the South, blooming late the first season. Sow seed in February, in shallow boxes, place in a warm, sunny position. When plants are 3 to 4 inches high, and danger of frost is past, transplant to open ground, 2 feet apart. Plant in rich or well manured soil, cultivate frequently and keep free from grass and weeds. After frost kills the tops, cut them off within a few inches of the ground and cover several inches with a mulch of stable manure, leaves or grass. This is sufficient protection for the bulbs anywhere in the South in ordinary seasons.

Dahlia, Double Mixed-A splendid strain of doub'e flowers, including all colors. Packet, 10 cents Hastings' Superb Double Mixed—This is the best strain of large, doub'e flowering Dahlia. Seed saved from the finest named varieties, including all shades and colors. This will give you a magnificent collection of the finest varieties. Packet, 15 cents; 2 for 25 cents.

Single Mixed—Seed saved from named single varieties. Flowers not so long as the double varieties but blooms earlier and more freely than the doubles. Packet, 10 cents.

Cactus Dahlias—The new strain is very popular wherever grown, being especially valuable for cut-flower work. Petals of the large flowers are beautifully pointed and the range of coloring is remarkably satisfactory. Mixed colors. Packet, 15 cents; 2 for 25 cents.

Delphinium and Larkspur

Eschscholtzia Or California Poppy—One of the most popular flowers for bedding in the South. Sow as early in the spring as ground can be worked, scattering seed thinly over the surface and raking in lightly. They are low spreading plants, as shown in our illustration. They are covered with large, showy flowers, making the most brilliant display beds that can be made. No plant is more popular in the South than this. the South than this

Single Mixed—Single, cupshaped flowers, in shades of bright yellow, orange and white, -Packet, 5 cents.

Double Mixed—Sama as the single in habit of growth and colors, except that the flowers are double. Packet, lu cents

Double Dahlia

Gaillardia Also known as Blanket Flower, and well adapted to our section. It thrives in the poorest and dryest of soils, and the plants are covered with large showy flowers during the season. Plants are of strong, spreading growth, 18 inches in height. The large, brilliant flowers are borne singly on long tems. Sow broadcast in early spring, covering seed lightly with a rake.

Gaillardia Picta-Mixed colors and finest shades, fine for cut flowers or for display bedding. Packet, 5 cents.

Godetia The Godetias are little known in the South, but are well worthy of attention, being a splendid bedding plant. Sow in the open ground in early spring like Gaillardia and Eschscholtzia. They are profuse and constant bloomers, and their delicate tints of crimson, rose-pink and white make them very attractive when in full bloom. Half dwarf varieties mixed. Packet, 5 cents.

Forget-Me-Not Favorite everywhere for beds or borders. Sow in open ground, thinly, as soon as ground can be worked, thinning out when well up, to 5 inches apart.

Forget=Me-Not, Blue-Packet, 5 cents.

Forget-Me-Not, White-Packet, 5 cents.

Forget-Me-Not, Blue and White Mixed-Packet, 5 cents.

Hibiscus Mixed Colors—Grow 2 to 3 feet high, branching freely, Flowers white, yellow, carmine and striped. Packet. mixed colors, 10 cents.

Double Hollyhocks Our Double Hollyhocks are far superior to the old single and semi-sow in early spring, in boxes or beds, and when 6 to 8 inches high transplant to their permanent place, placing them 1½ to 2 feet apart. Give them rich soil in a moist location, or where plenty of water can be given. We can supply separate colors, if desired, in pure white, sulphur yellow, crimson, lilac and salmon rose, each 10 cents per packet.

Firest Double Mixed-Contains all the above named colors and others. Packet, 10 cents.

Heliotrope This garden favorite, easily grown from seed, is always a favorite. Start seed in February, transplant to open ground in partially shaded location. A single spray of the deliciously fragrant bloom will perfume a whole room. All shades mixed, including dark blue, light bue, white and rose shades. These are from large flowered varieties. Packet, 10 cents.

Iberis—Candytuft A well-known garden favorite for beds, borders and edging. Sow seed as soon as soil can be worked in the spring. When well up, thin out to 4 or 5 inches apart.

Pure White-The common White Candytuft. Packet, 5 cents; ounce, 15 cents.

Empress-Very large spikes of pure white flowers. Fine for cutting. Packet, 10 cents; ounce, 25 cents. Dark Crimson-Dark shade of crimson. Packet, 5 cents.

Candytuft, Mixed-All shades and colors of the annual sorts. Packet, 5 cents; ounce, 15 cents.

Ice Plant Handsome trailing plant, for baskets or boxes. Easily grown from seed sown where plants are wanted to stand. The plants appear as if covered with crystals, shining brightly in the light. Packet, 5 cents.

Sow in spring where plants are to stand. Packet, 5 cents. Lantana—French Hybrids

Japanese Hop (Humulus Japonicus) annual climber, of the earliest culture, indispensable for covering verandas, trellises or unsightly fences.

Shrubby, verbena-like plants, continuous bloomers, delighting in the warm sunshine of Southern summers. Sow early in boxes or sheltered beds, transplanting after danger from frost to open ground, 11/2 to 2 feet

French Hybrids, Mixed-Packet, 10 cents.

Double Hollyhocks

White Moonflower

and transplanted when six inches high. nation cut or file through this hard outer shell before planting. Cover I inch deep.

Ipomea Grandiflora Alba—The true Mexican Moonflower with immense white blooms 4 to 5 inches in diameter. Packet, 10 cents.

Iromea—Heavenly Blue—A splendid companion plant for the white. Flowers very large and of a deep sky blue with reddish purple rays. There is nothing in a blue color excelling the shade of the "Heavenly Blue." In this section it is becoming more popular than the white. Packet, 10 cents.

Ipomea Setosa or Brazilian Morning Glory—Grows 40 to 50 feet in height making even a more dense shade than the White or Blue Moonflower. Flowers are often 5 inches in diameter and of a bright shade of lavender pink. Very popular wherever known. Packet 10 cents.

Mimulus Tigrinus (Monkey) Spotted and tigered varieties mixed. Packet, 5 cents.

HASTINGS' PROLIFIC CORN

IMMENSELY PROLIFIC, FINEST IN QUALITY MAKES SIX OR MORE EARS ON EACH STALK WONDERFUL PRODUCER of GRAIN and FORAGE

Why not grow plenty of corn in 1900? We have traveled some 30,000 miles in the South in the last three years, and one fact shows plainly in every state. We, of the South don't grow half enough corn. It's not so much a matter of more acres of corn, but more corn per acre. In the South the yield of 12 to 15 bushels of corn per acre is the rule. That kind of corn growing don't pay any profit, and no acre of ground should be cultivated that don't stand a chance of making a profit. The kind of corn growing that pays is the yields of 30 bushels or upwards.

Three causes make light yields. First, poor land; second poor plowing and cultivation; and last but not least poor seed or rather small yielding varieties.

We want to talk a little about prolific varieties of corn. We believe in prolific varieties for the South. They out-yield every one of the large-eared varieties, and in repeated tests year after year they have made from 25 to 50 per cent more actual grain and forage than any of the big-eared, one or two ears to the stalk varieties. This is especially true when corn is grown on the uplands. Pastings' Prolific makes good paying crops where other varieties fail entirely. You want to plant corn and you want to get a good crop back as a result of the use of your land and labor. That's why we urge you to plant prolific corn.

There are many varieties of prolific corn, but "Hastings' Prolific" is the best of them all. It has been grown successfully and profitably by thousands of our customers from the Carolinas to the Rio Grande border of Texas. They all like it and sales of "Hastings' Prolific" at from 10 to 25 cents per ear to neighbors who have seen it growing have been common. Our little illustration is taken from a photograph of a single stalk grown here near Atlanta. With good cultivation it makes six or more ears to the stalk for us. It will do the same for you on your farm.

Pastings' Prolific. Corn Is a wonder in production of both grain and forage It is the most prolific corn we have ever seen, the yield of

FIRST PRIZE GEORGIA STATE FAIR

The Georgia State Pair Association effered a prize in 1905 for the heaviest yield of corn on one measured acre. There were many contestants for this prize, although 1905 was a poor year for corn. The prize was won by a customer of ours from Spaulding County, Georgia; variety "Hastings' Prolitic;" with a yield of 101 bushels on a measured acre. In competition with it were all the old-time famous varieties of prolific corn as well as the "big-eared" kinds.

HEAVY YIELDS IN SOUTHERN STATES

Alabama On the 8 acres I planted in your Prolific Corn I am getting from 50 to 65 bushels per acre. On one measured acre I gathered 63 barrels of slipped shucked ears. Andrew J. Higgins, Mebile, County.

Arkansas Mr. T. J. Simmons, of Hempstead Co., Arkansas writes, "Have been planting your Prolific Corn since 1905. I get six ears from each stalk. I have just rathered and cribbed 137½ bushels from one acre."

Florida Mr. S. M. Johnson, Polk Co., Florida, writes us that his crop of Hastings' Prolific mode 70 bushels per acre. Mr. Frank Bugbee, St. Johns Co., Florida, stated to the writer that he considered his crop of Hastings' Prolific good for 75 bushels per acre.

Georgia Mr. W. M. Bryan, Laurens, Co., Georgia, writes "I got from one acre, 78 bushels of Hastings' Prolific." Am well pleased with it.

Texas "I have raised your "Prolific Corn" for two years. Last year I made 85 bushels per acre. It is the corn for Texas."—W. A. Lane; Waller Co., Texas. Mr. J. H. Walker, Orange Co., Texas, writes. "This corn resists all drought. It adverages 45 to 50 bushels per acre where the average yield heretofore has been about 17 bushels." Mr. Lane sends a photograph of some of this corn with his letter showing its prolific character.
